

10 February 2015

Year: 2015 Week: 6

In This Issue:

- Key messages.
- Diagnostic indicators at a glance.
- GP practices and denominator population.
- National syndromic indicators.
- Notes and further information.
- Appendix.

Key messages

Data to: 08 February 2015

There were further small increases in GP consultation rates for upper respiratory tract infection during week 6, mainly in children aged less than 15 years (figures 1-1a).

There was also a further increase in GP consultations for conjunctivitis, particularly in the <1 and 1-4 years age groups; these increases were within seasonally expected levels (figures 13-13a).

A Cold Watch System operates in England from 1 November to 31 March each year. As part of the Public Health England Cold Weather Plan for England the PHE Real-time Syndromic Surveillance team will be monitoring the impact of cold weather on syndromic surveillance data during this period.

Cold weather alert level (current reporting week): **Levels 2/3 - Alert & readiness/Cold weather action**
<http://www.metoffice.gov.uk/weather/uk/coldweatheralert/>

Diagnostic indicators at a glance:

Indicator	Trend	Level
Upper respiratory tract infection	increasing	similar to baseline levels
Influenza-like illness	no trend	similar to baseline levels
Pharyngitis	increasing	above baseline levels
Scarlet fever	no trend	similar to baseline levels
Lower respiratory tract infection	no trend	above baseline levels
Pneumonia	decreasing	above baseline levels
Gastroenteritis	no trend	similar to baseline levels
Vomiting	increasing	similar to baseline levels
Diarrhoea	increasing	similar to baseline levels
Severe asthma	no trend	above baseline levels
Wheeze	no trend	above baseline levels
Allergic rhinitis	no trend	similar to baseline levels
Conjunctivitis	increasing	similar to baseline levels
Mumps	no trend	below baseline levels
Measles	no trend	similar to baseline levels
Rubella	no trend	similar to baseline levels
Pertussis	no trend	similar to baseline levels
Chickenpox	no trend	similar to baseline levels
Herpes zoster	no trend	similar to baseline levels
Cellulitis	no trend	above baseline levels
Impetigo	no trend	similar to baseline levels

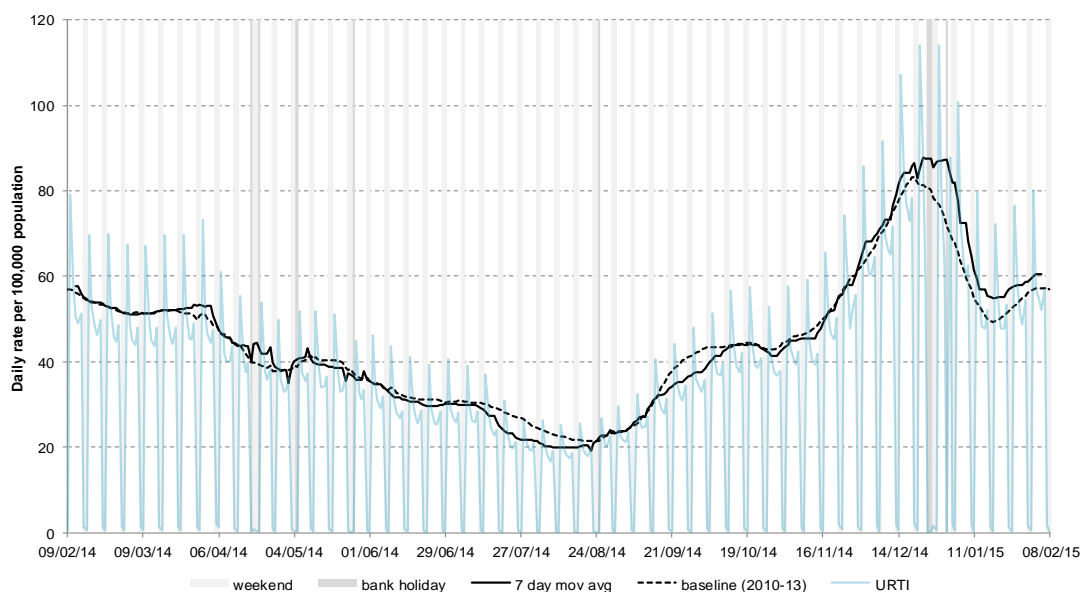

GP practices and denominator population:

Year	Week	GP Practices Reporting**	Population size**
2015	6	4765	34.9 million

**based on the average number of practices and denominator population in the reporting working week.

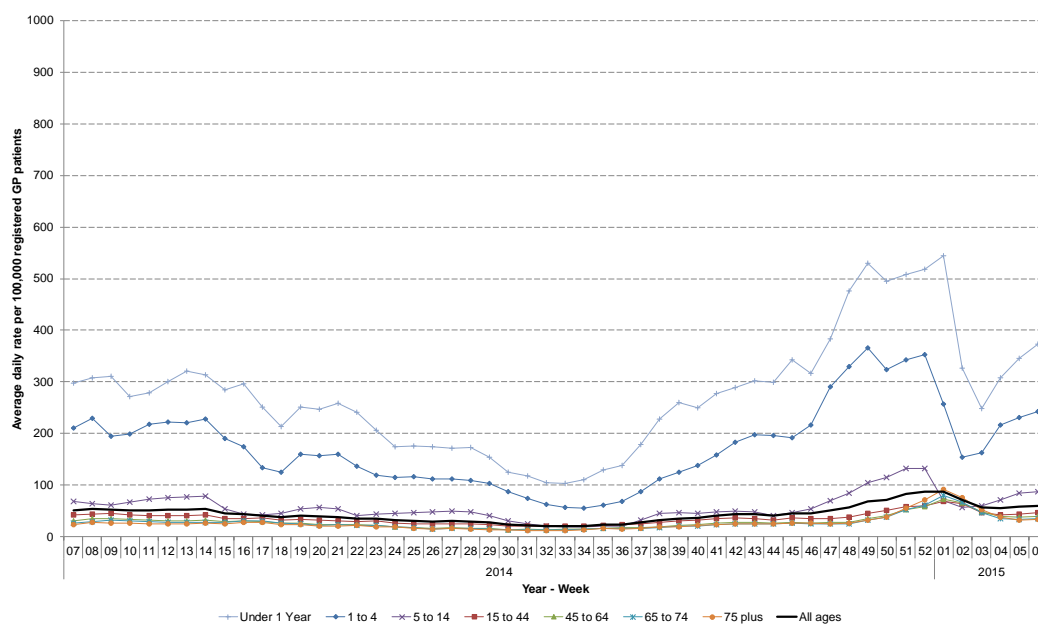

1: Upper respiratory tract infection (URTI)

Daily incidence rate (and 7-day moving average*) per 100,000 population (all England, all ages).

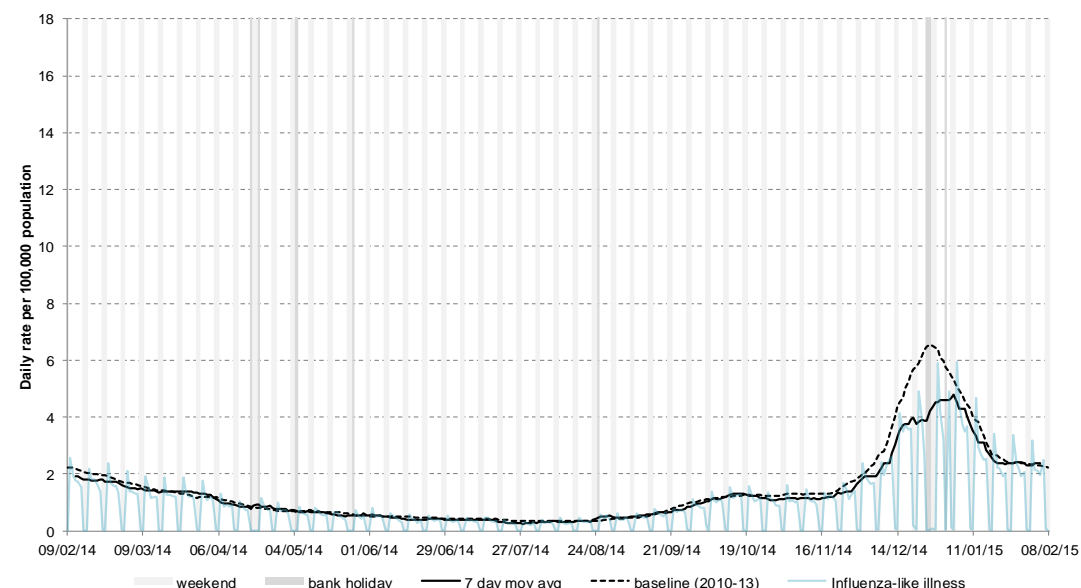

1a: Upper respiratory tract infection (URTI) by age

Average daily incidence rate by week per 100,000 population (all England)

2: Influenza-like illness (ILI)

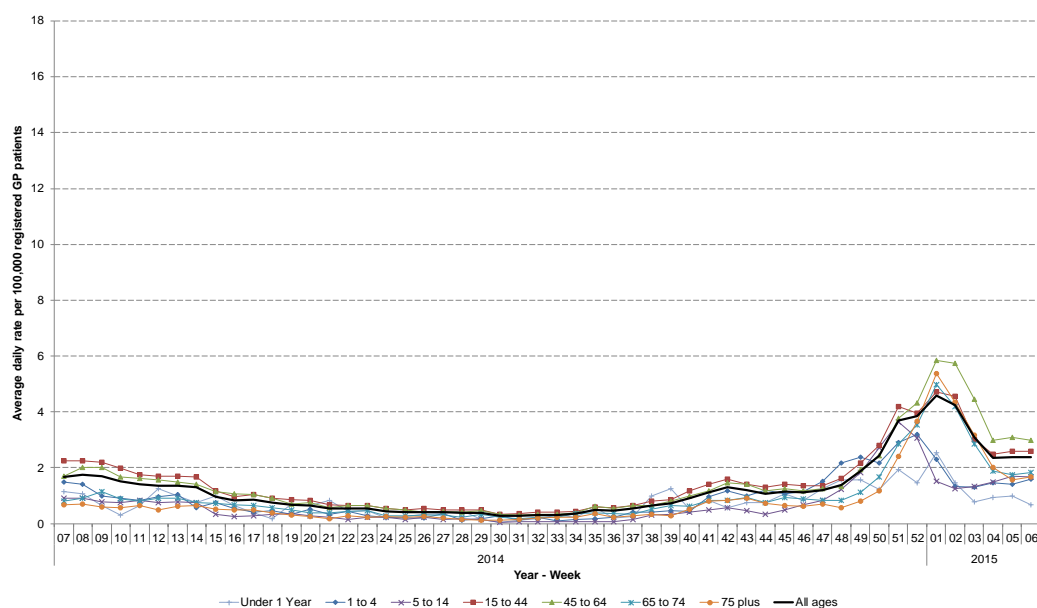

Daily incidence rates (and 7-day moving average*) per 100,000 population (all England, all ages).

* 7-day moving average adjusted for bank holidays.

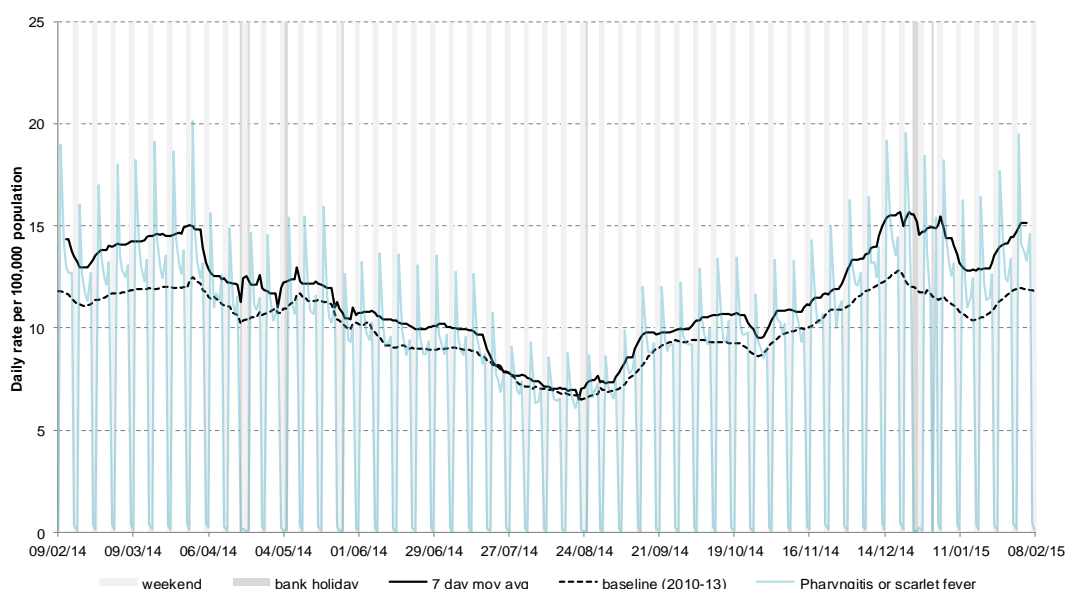

2a: Influenza-like illness (ILI) by age

Average daily incidence rate by week per 100,000 population (all England)

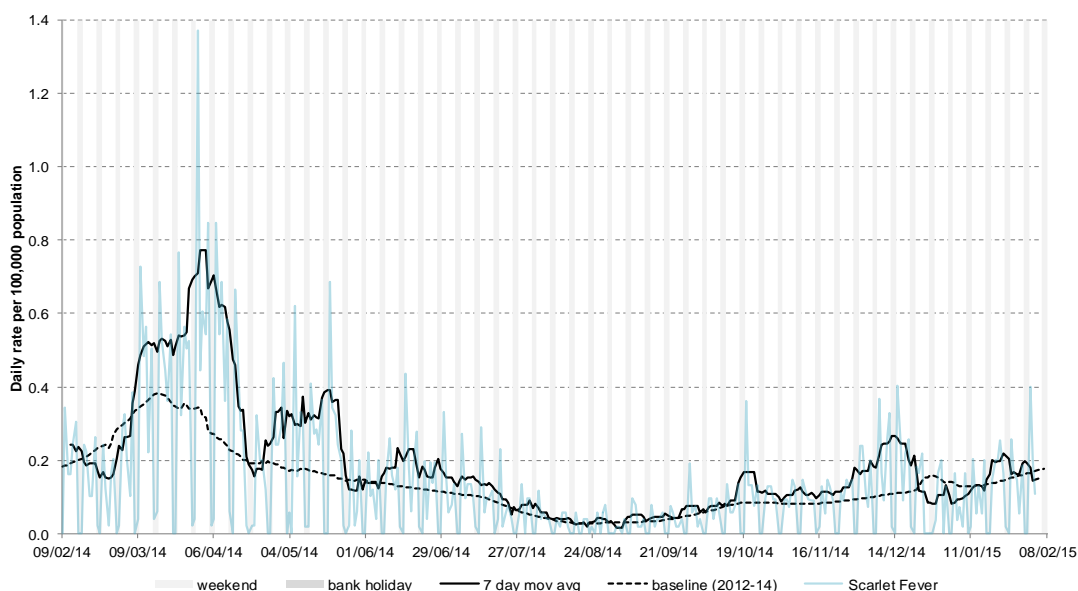

3: Pharyngitis or scarlet fever

Daily incidence rate (and 7-day moving average*) per 100,000 population (all England, all ages).

4: Scarlet fever

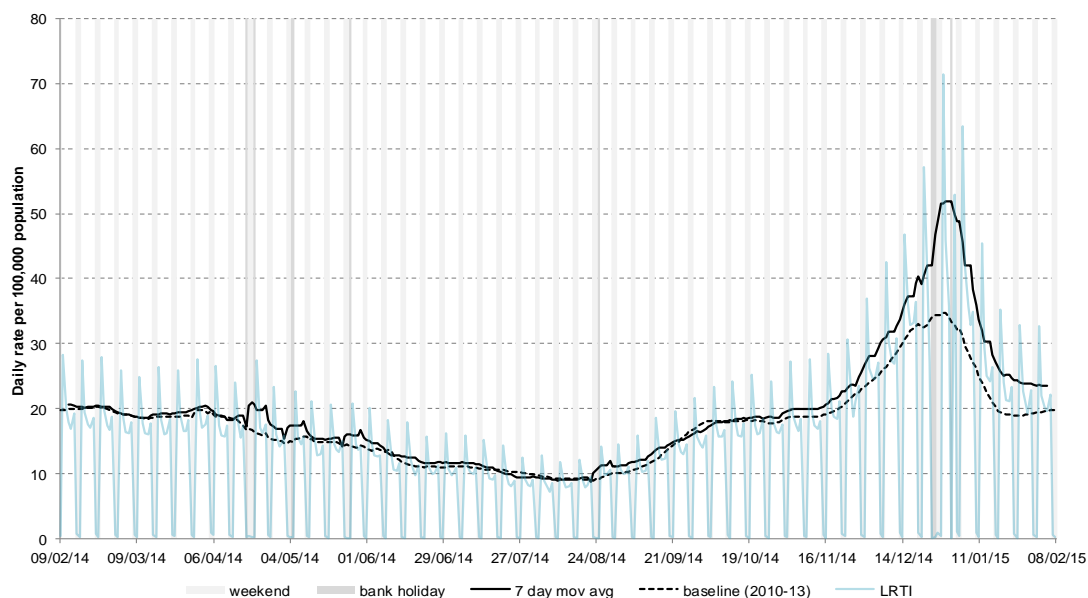

Daily incidence rate (and 7-day moving average*) per 100,000 population (all England, all ages, based on a population denominator of approximately 5.5 million patients).

* 7-day moving average adjusted for bank holidays.

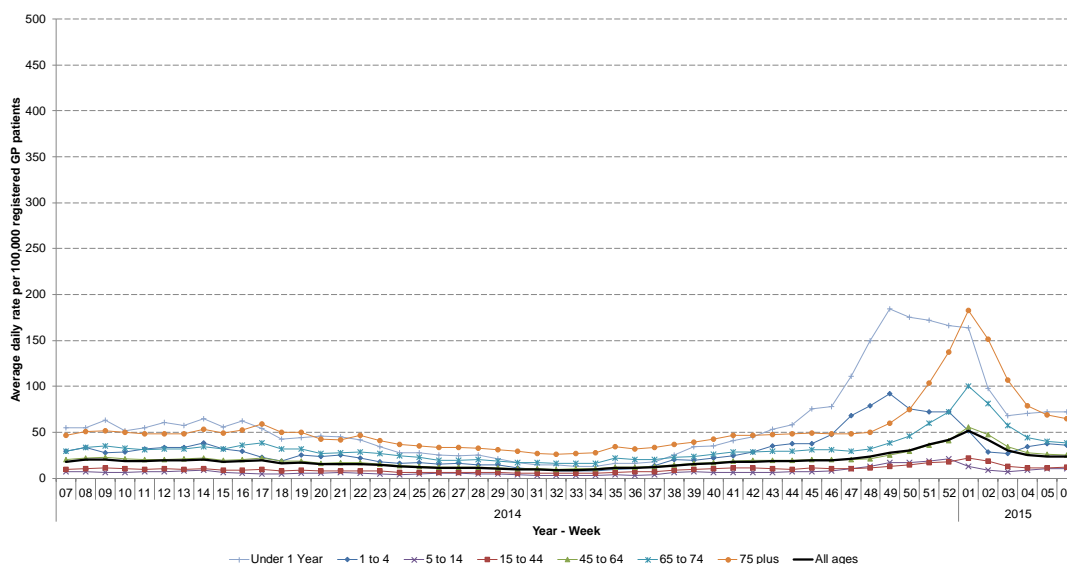

5: Lower respiratory tract infection (LRTI)

Daily incidence rate (and 7-day moving average*) per 100,000 population (all England, all ages).

5a: Lower respiratory tract infection (LRTI) by age

Average daily incidence rate by week per 100,000 population (all England)

Intentionally left blank

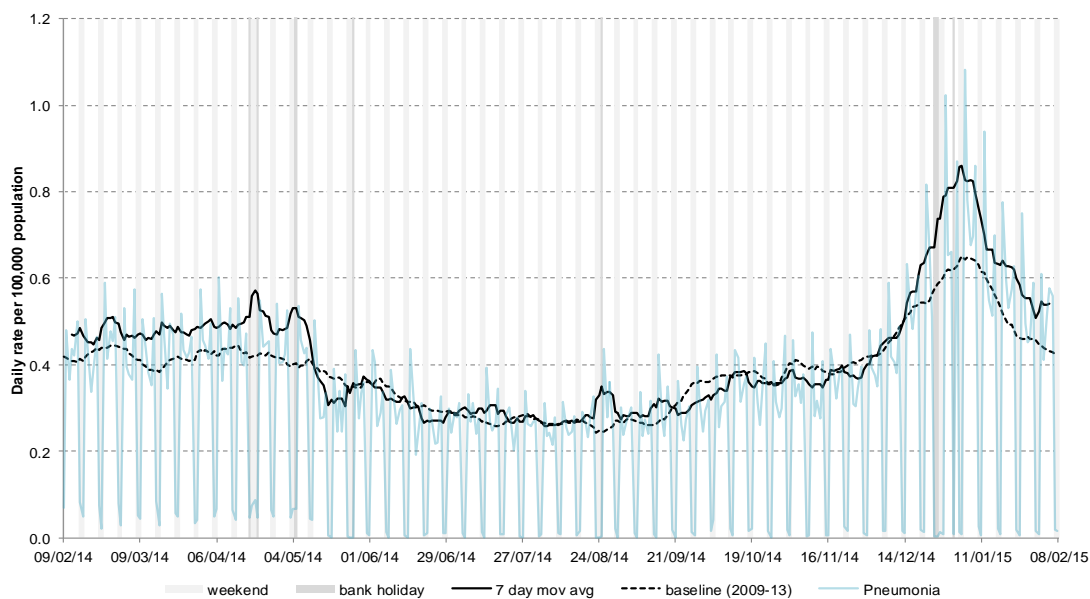

* 7-day moving average adjusted for bank holidays.

10 February 2015

Year: 2015 Week: 6

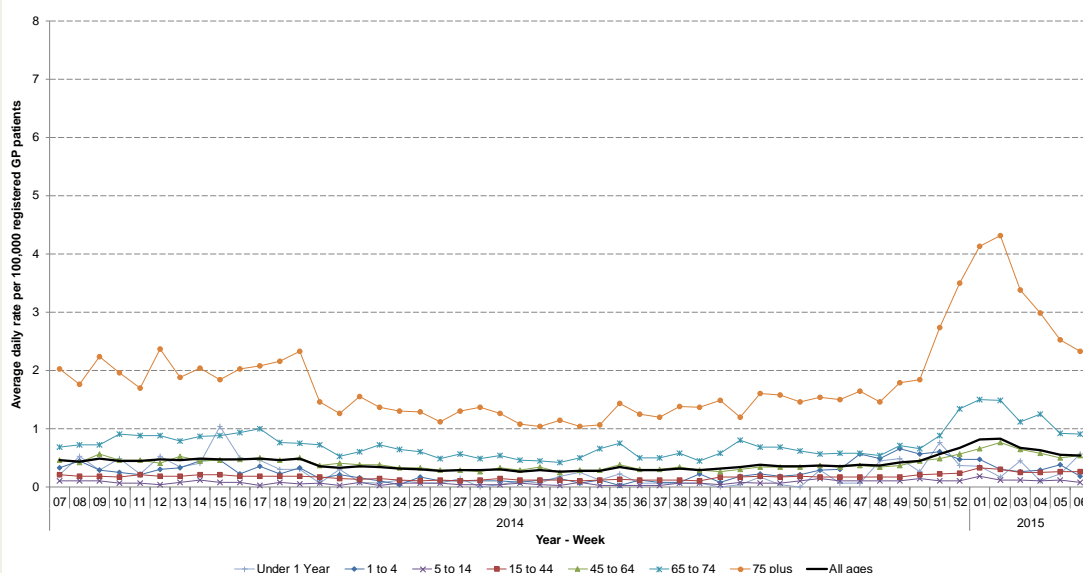

6: Pneumonia

Daily incidence rate (and 7-day moving average*) per 100,000 population (all England, all ages).

6a: Pneumonia by age

Average daily incidence rate by week per 100,000 population (all England)

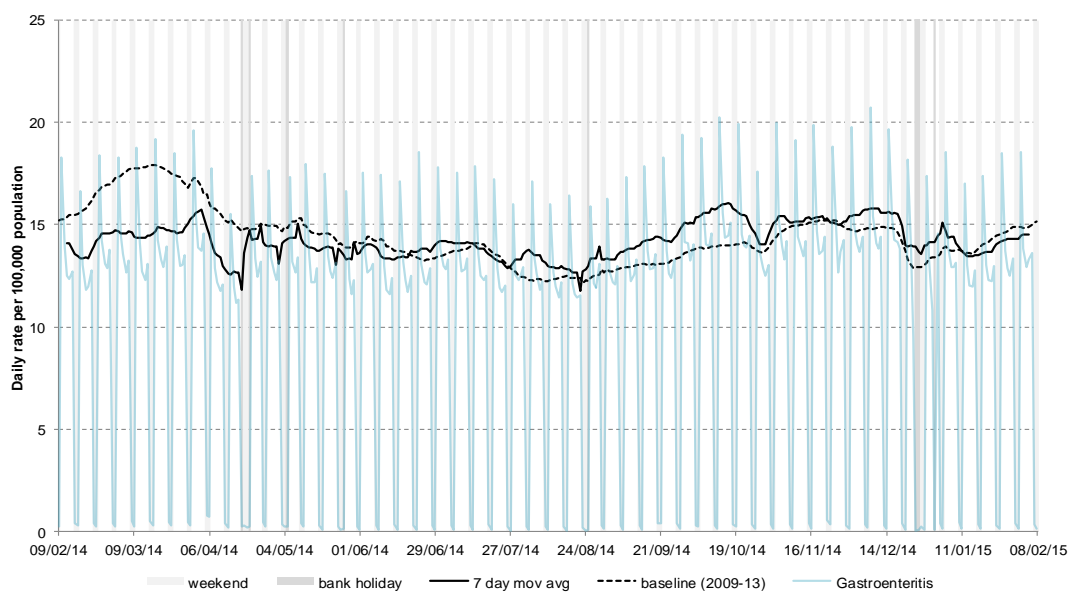

Intentionally left blank

* 7-day moving average adjusted for bank holidays.

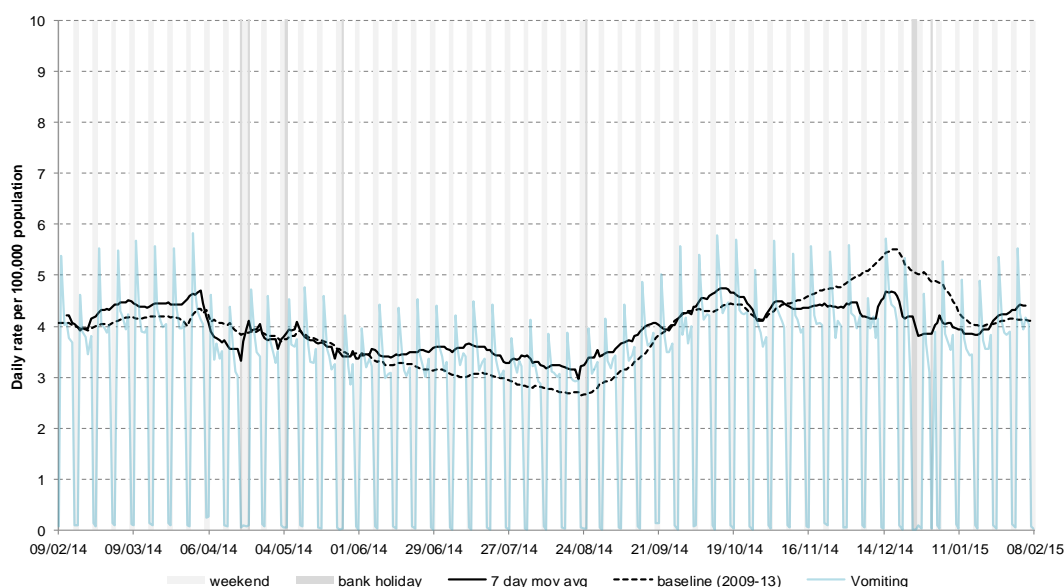

7: Gastroenteritis

Daily incidence rate (and 7-day moving average*) per 100,000 population (all England, all ages).

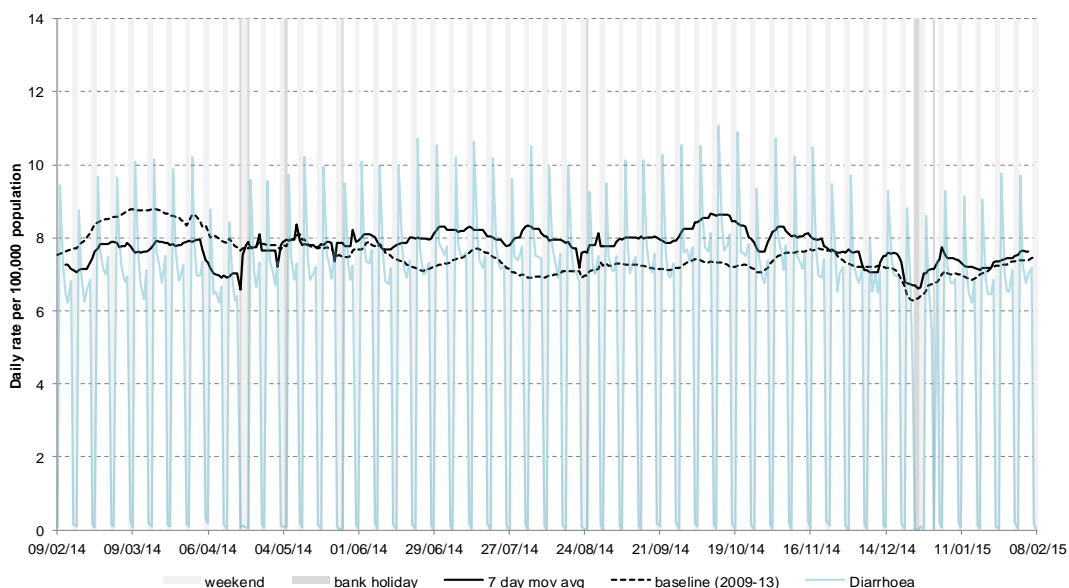

8: Vomiting

Daily incidence rate (and 7-day moving average*) per 100,000 population (all England, all ages).

9: Diarrhoea

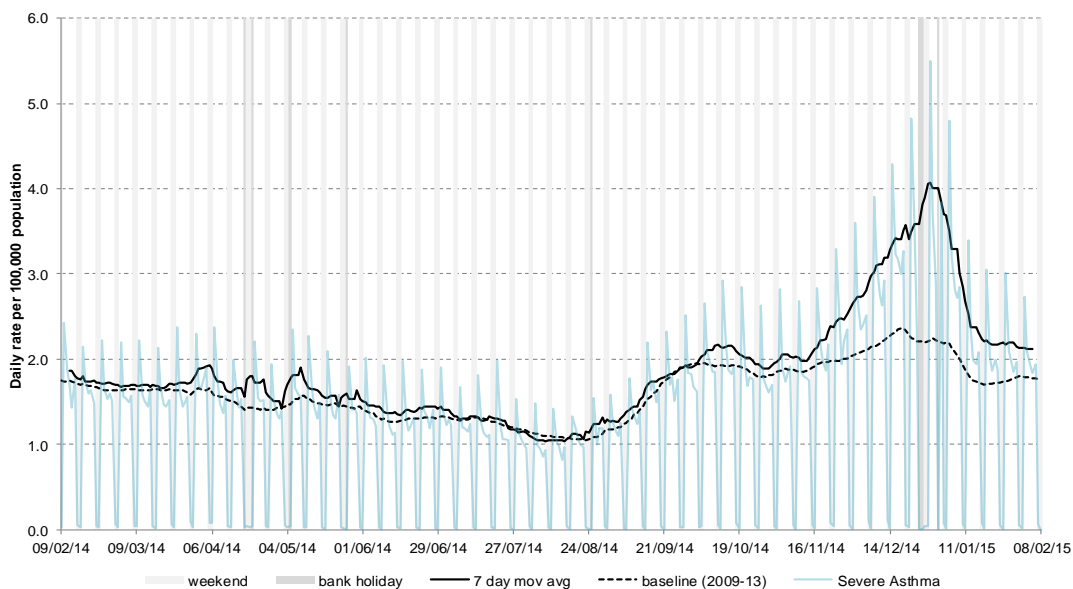

Daily incidence rate (and 7-day moving average*) per 100,000 population (all England, all ages).

* 7-day moving average adjusted for bank holidays.

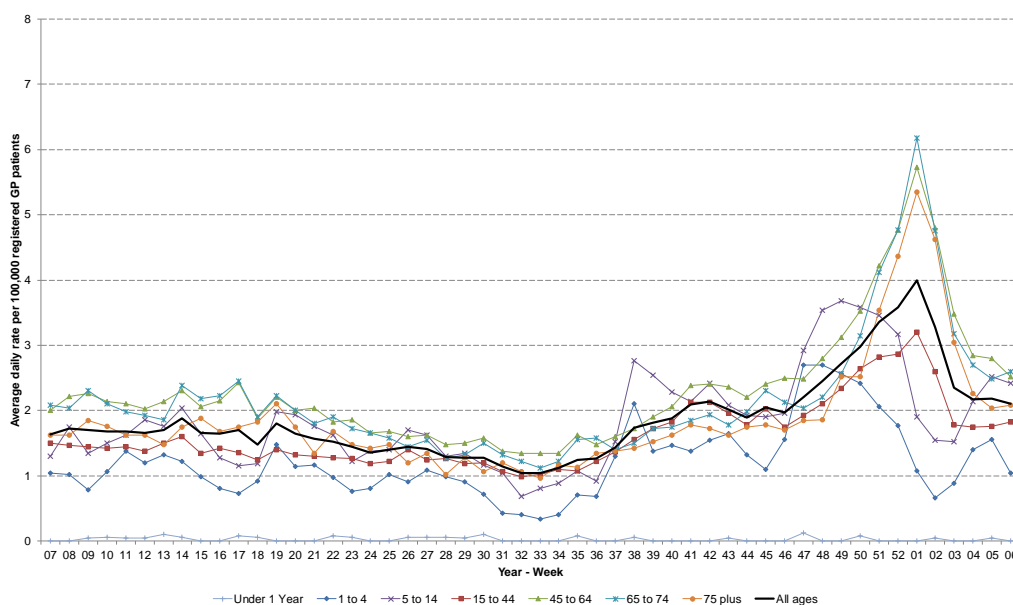

10: Severe asthma

Daily incidence rate (and 7-day moving average*) per 100,000 population (all England, all ages).

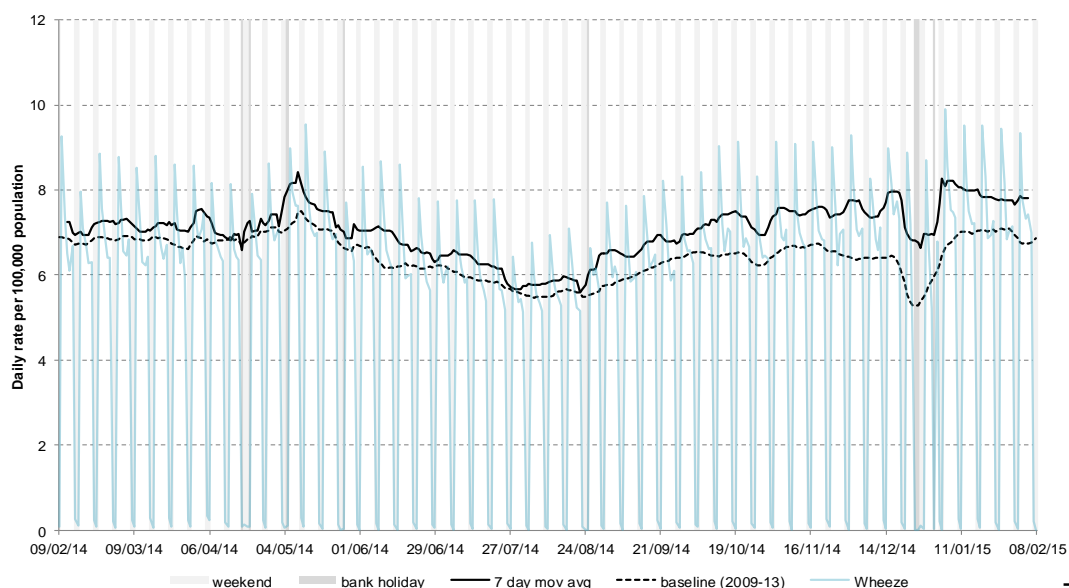

10a: Severe asthma by age

Average daily incidence rate by week per 100,000 population (all England)

11: Wheeze

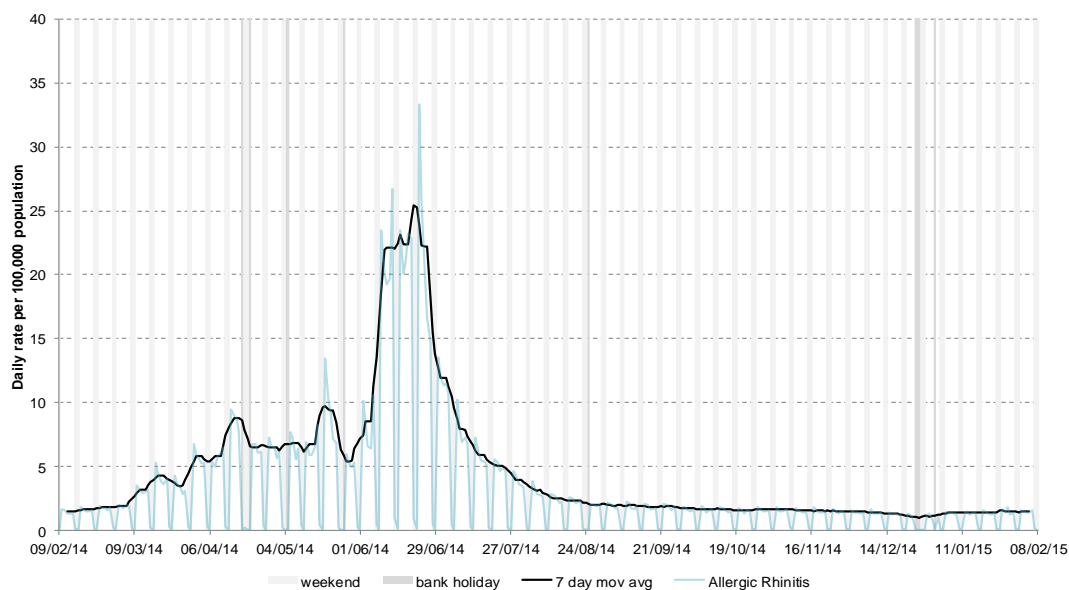

Daily incidence rate (and 7-day moving average*) per 100,000 population (all England, all ages).

* 7-day moving average adjusted for bank holidays.

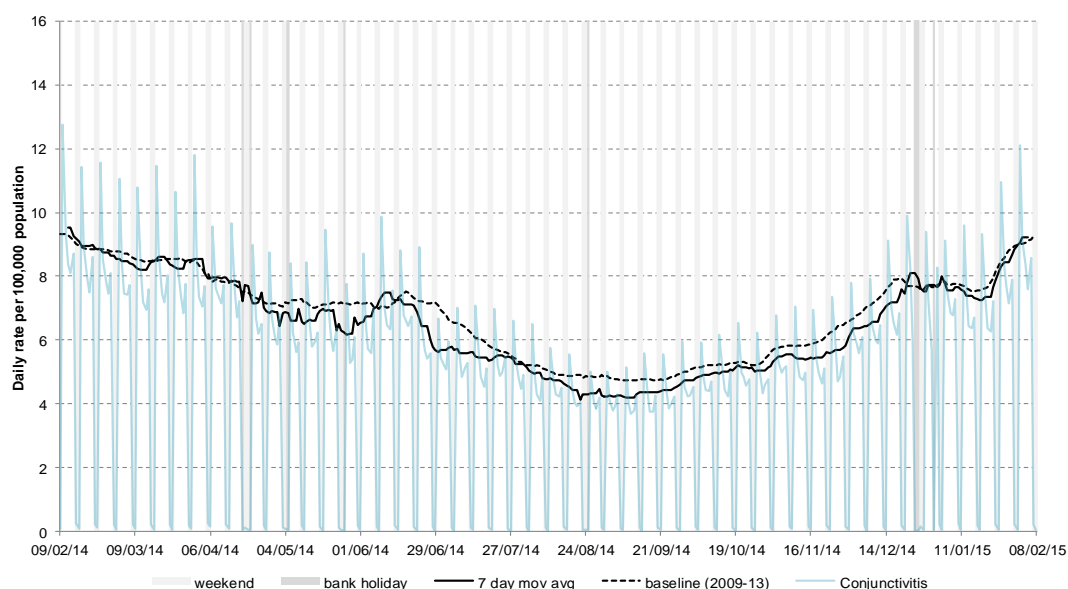

12: Allergic rhinitis

Daily incidence rate (and 7-day moving average*) per 100,000 population (all England, all ages).

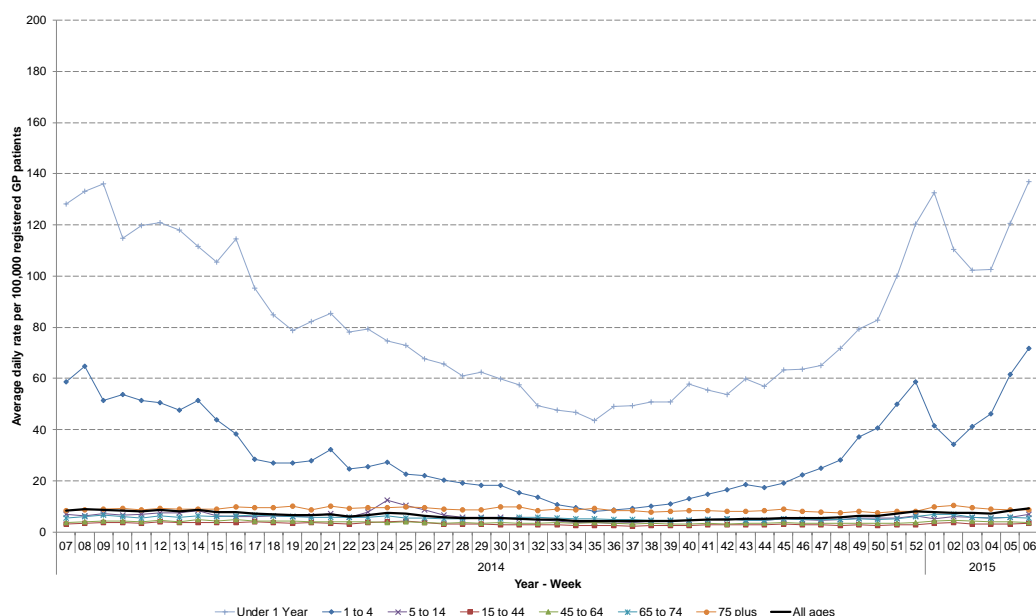

13: Conjunctivitis

Daily incidence rate (and 7-day moving average*) per 100,000 population (all England, all ages).

13a: Conjunctivitis by age group

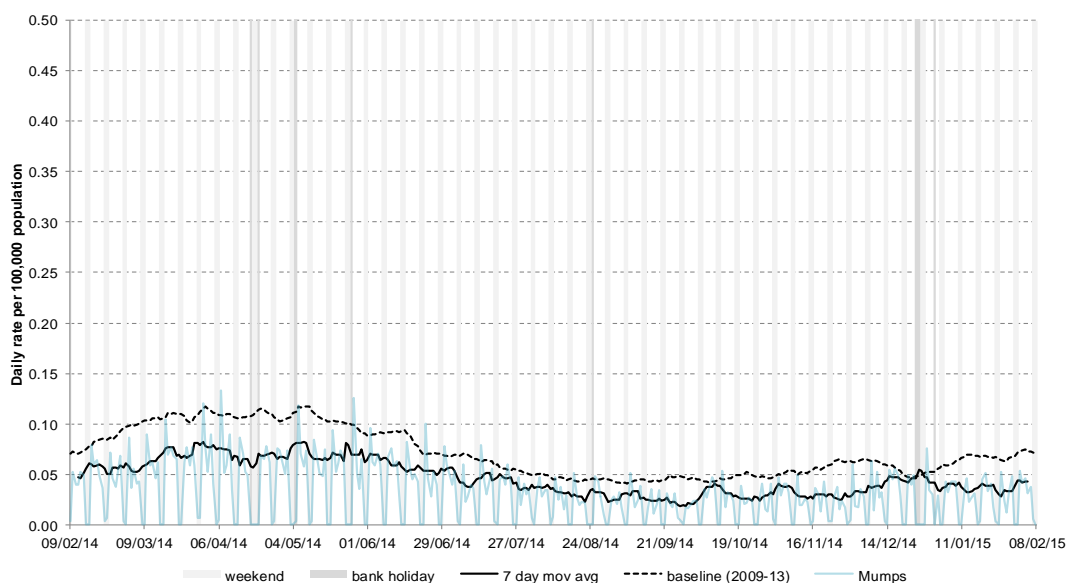

Average daily incidence rate by week per 100,000 population (all England)

* 7-day moving average adjusted for bank holidays.

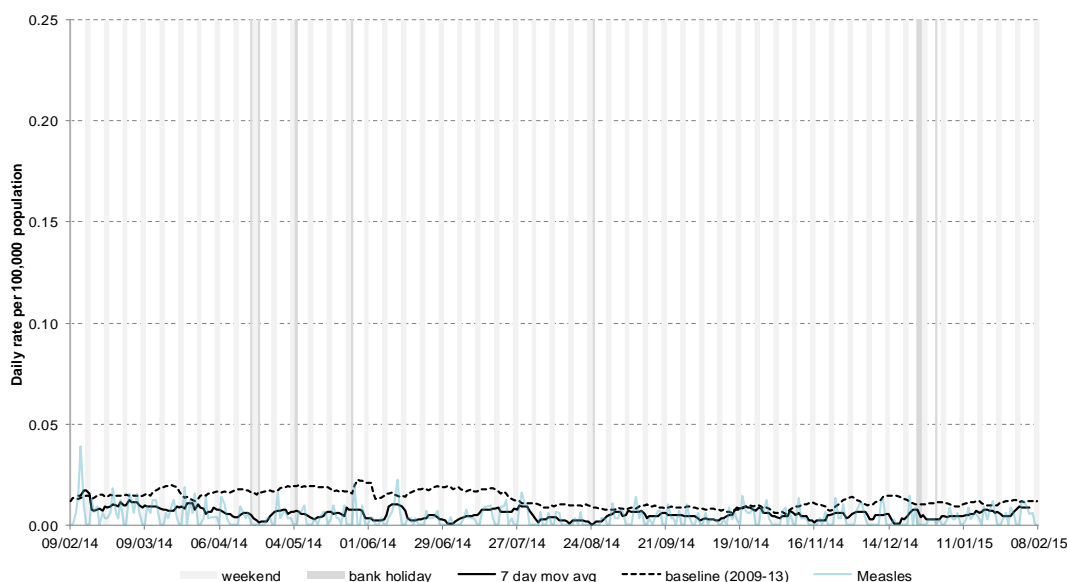

14: Mumps

Daily incidence rate (and 7-day moving average*) per 100,000 population (all England, all ages).

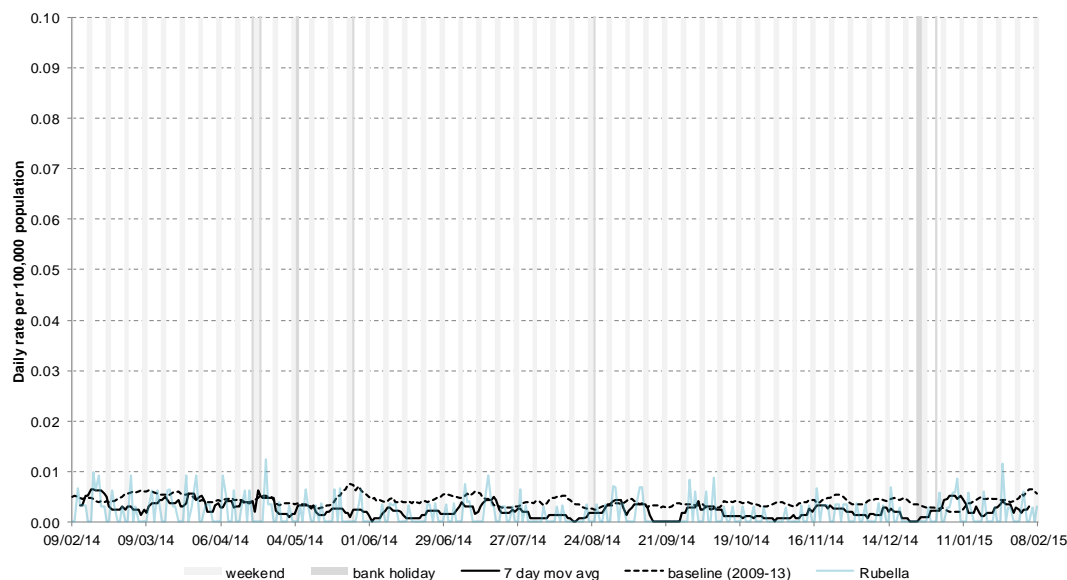

15: Measles

Daily incidence rate (and 7-day moving average*) per 100,000 population (all England, all ages).

16: Rubella

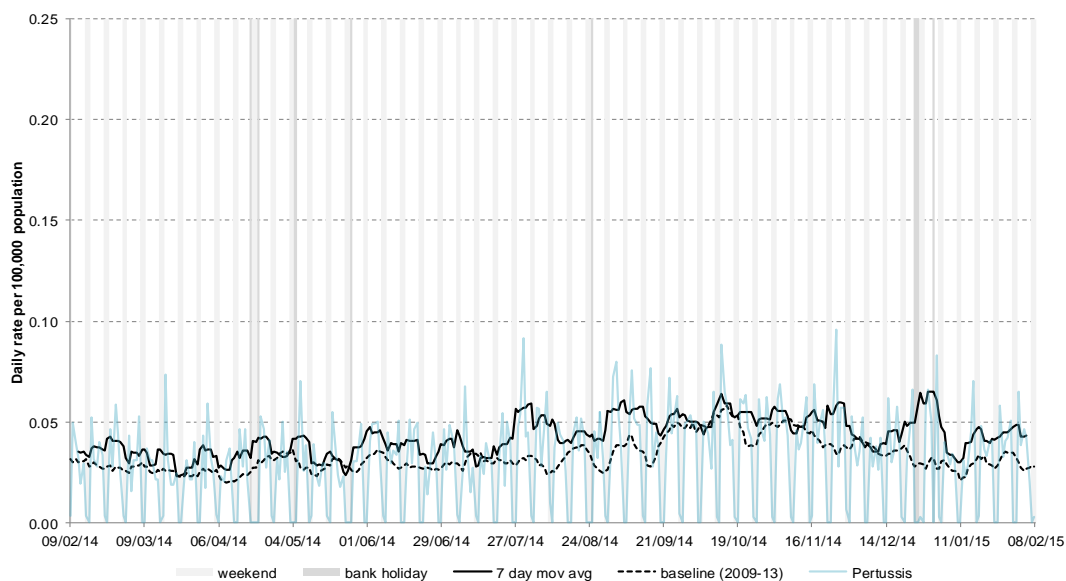

Daily incidence rate (and 7-day moving average*) per 100,000 population (all England, all ages).

* 7-day moving average adjusted for bank holidays.

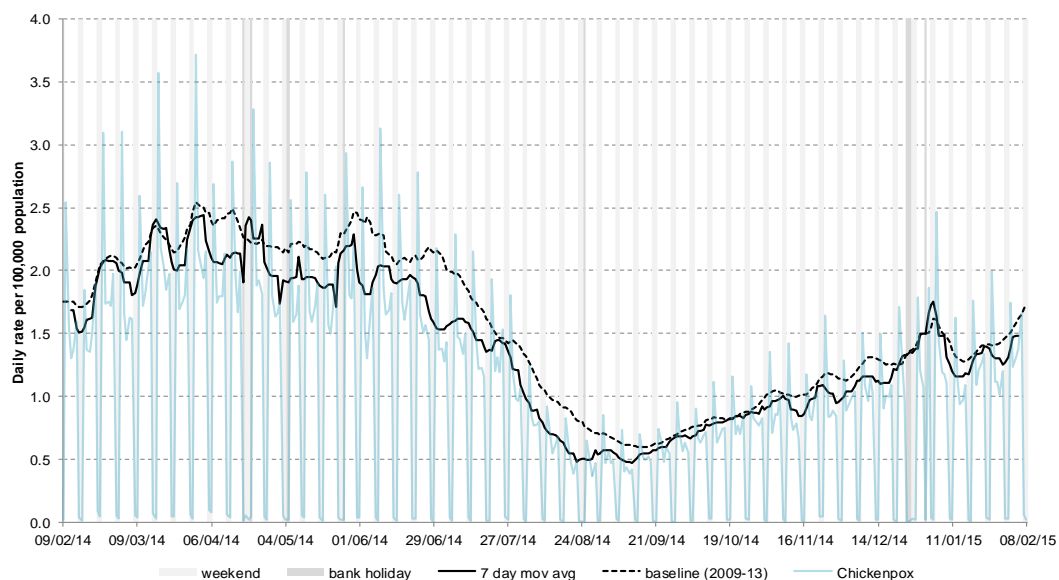

17: Pertussis

Daily incidence rate (and 7-day moving average*) per 100,000 population (all England, all ages).

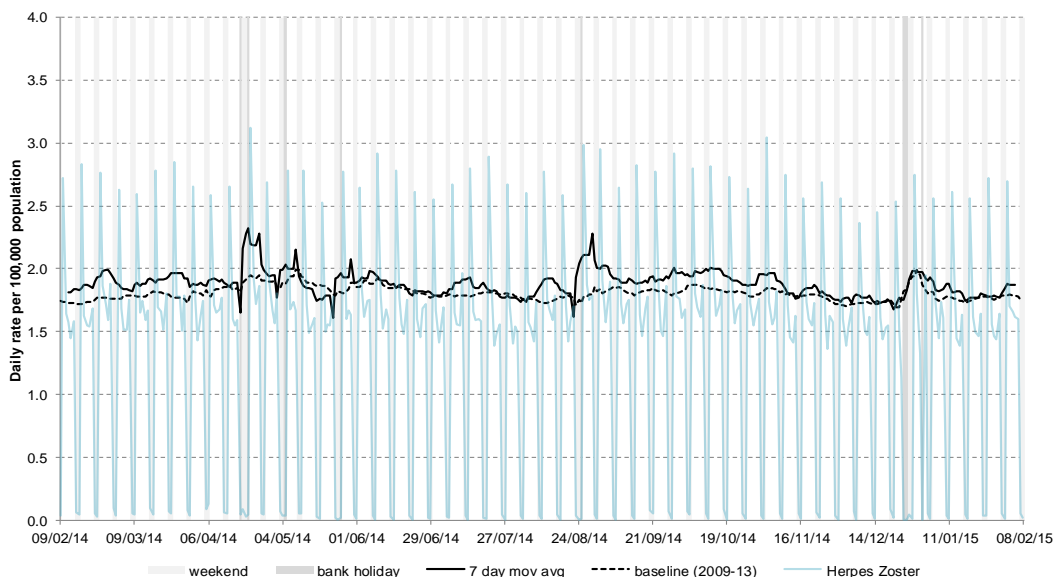

18: Chickenpox

Daily incidence rate (and 7-day moving average*) per 100,000 population (all England, all ages).

19: Herpes zoster

Daily incidence rate (and 7-day moving average*) per 100,000 population (all England, all ages).

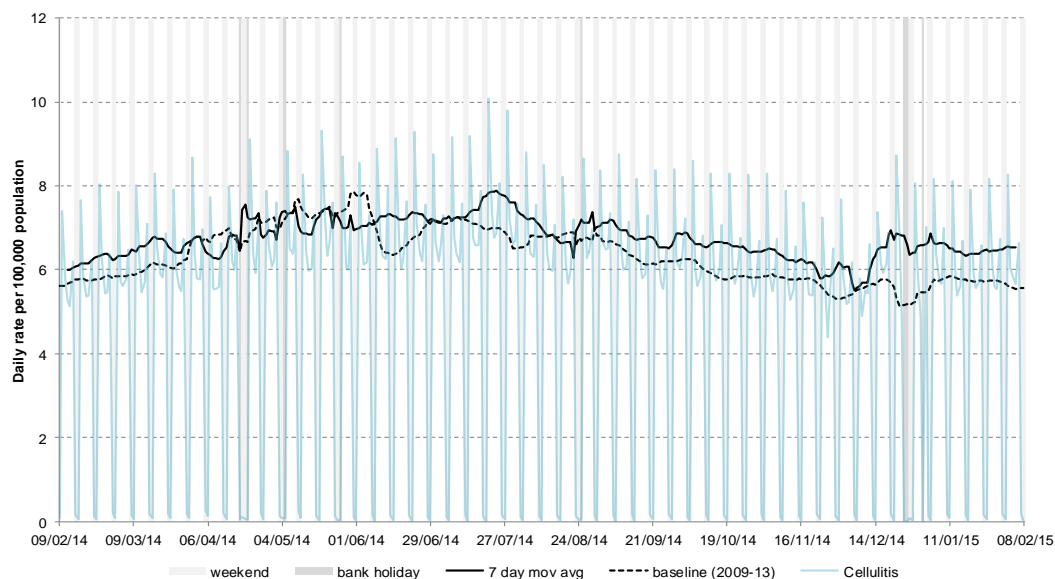

* 7-day moving average adjusted for bank holidays.

10 February 2015

Year: 2015 Week: 6

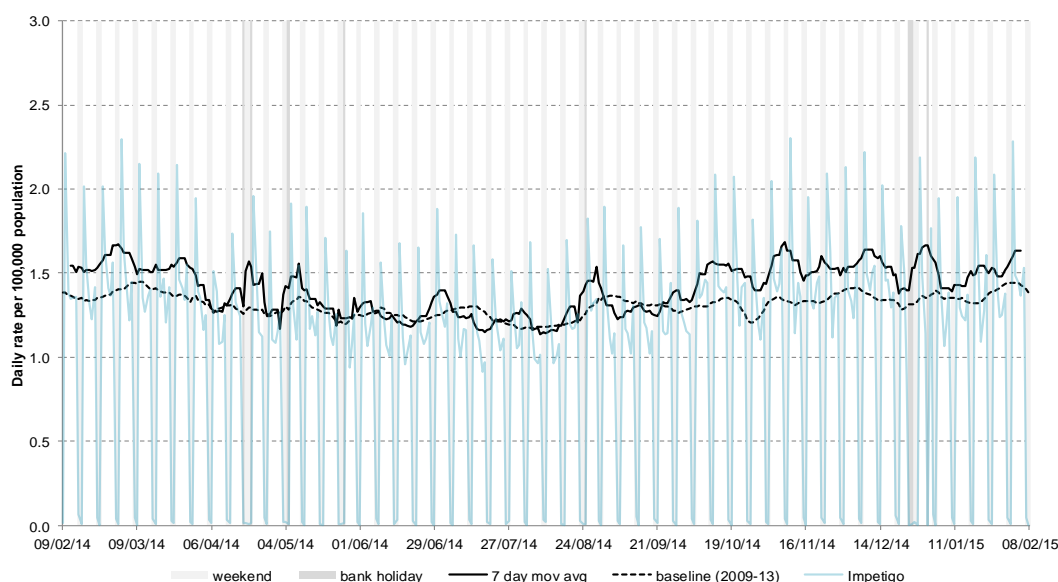

20: Cellulitis

Daily incidence rate (and 7-day moving average*) per 100,000 population (all England, all ages).

21: Impetigo

Daily incidence rate (and 7-day moving average*) per 100,000 population (all England, all ages).

22: Intentionally left blank

Intentionally left blank.

* 7-day moving average adjusted for bank holidays.

Notes and further information

- The Public Health England GP in hours surveillance system is a syndromic surveillance system monitoring community-based morbidity recorded by GP practices.
 - This system captures anonymised GP morbidity data from two GP clinical software systems, EMIS, from version 1 of the QSurveillance® database, and TPP SystmOne.
 - Historic baselines are smoothed to remove bank holiday effects. Data from 2009 has been excluded for selected indicators which were affected by the H1N1 influenza pandemic. No baseline is currently included for allergic rhinitis.
 - The appendix illustrates weekly GP in hours consultation data for influenza-like illness (ILI). Each PHE Centre is represented by a thematic map showing its constituent local authorities (LA) coloured according to the weekly consultation rate of ILI per 100,000 population. LAs where less than 5 cases of ILI have been reported are suppressed and illustrated as no data.
 - The maps on the following pages contains Ordnance Survey data © Crown copyright and database right 2014. Contains National Statistics data © Crown copyright and database right 2014.
-

Acknowledgements:

We thank and acknowledge the University of Nottingham, ClinRisk® and the contribution of EMIS and EMIS practices. Data source: version 1 of the QSurveillance® database.

We thank TPP, ResearchOne and the SystmOne GP practices contributing to this surveillance system.
