Ref: EIR 2017/11491

13 December 2017

Dear [REDACTED]

Thank you for your email of 14 November 2017 requesting the following information:

"When I was employed by Defence Infrastructure Organisation (formerly Defence Estates), I was based at RAF St. Mawgan in building 95. During this time the drinking water was regularly a rusty brown colour, but the MOD water contractor, under Project Aquatrine, assured us that all tests were within safe parameters and that it was ok to drink. I request copies of all the test results during the period 2004-2014 relating to the quality of the water provided as drinking water, and particularly iron levels, as we were advised that the discolouration was from old cast iron pipes. I request that results are provided alongside the parameters at the time of the test, so as to give a clear understanding of whether there were any test results that failed."

I am treating your correspondence as a request for information under the Environmental Information Regulations 2004 (EIR).

A search for the information has now been completed within the Ministry of Defence (MOD) and I can confirm that all the information in scope of your request is held.

The information you have requested can be found enclosed at annex A.

Under Regulation 9(1) (Advice and Assistance) of the EIR you may find it helpful to note that Kelda Water Services (KWS) take samples as per the requirements of the Private Water Supply Regulations.

Regulatory waters samples previously taken at random points in the distribution at St. Mawgan displayed elevated results of Iron (Fe), Aluminium (Al), Manganese (Mn), Potential of Hydrogen (pH), and Turbidity; therefore KWS took additional investigatory water samples (also included within the data) to fully understand the extent of any water quality issue. The sample data included breaches of regulatory requirements for Iron (Fe), Aluminium (Al), Manganese (Mn), Potential of Hydrogen (pH), and Turbidity; and also included some positive taste and odour results.

In 2012, subsequent to the completion of the investigation, KWS replaced a section of the water main in the area to address the issues which were caused by the aging cast iron network, rectifying the problem. KWS ensured that the water was safe to drink throughout this time.

If you have any queries regarding the content of this letter, please contact this office in the first instance.

If you wish to complain about the handling of your request, or the content of this response, you can request an independent internal review by contacting the Information Rights Compliance team, Ground Floor, MOD Main Building, Whitehall, SW1A 2HB (e-mail CIO-FOI-IR@mod.uk). Please note that any request for an internal review should be made in writing within 40 working days of the date of this response.

If you remain dissatisfied following an internal review, you may raise your complaint directly to the Information Commissioner under the provisions of Regulation 11 under the Environmental Information Regulations. Please note that the Information Commissioner will not normally investigate your case until the MOD internal review process has been completed. The Information Commissioner can be contacted at: Information Commissioner's Office, Wycliffe House, Water Lane, Wilmslow, Cheshire, SK9 5AF. Further details of the role and powers of the Information Commissioner can be found on the Commissioner's website at <https://ico.org.uk/>.

Yours sincerely,

DIO Secretariat
