Subject: LLANBRYNMAIR & CARNEDD WEN - OBJECTION

Ref letter dtd 20/09/16

Full and democratic process has not been observed.

This has been turned down by local planning authority and at appeal .

Opportunity to comment invited by insufficiently stamped letter which arrive less than one week before final submission and reference number on footer was incomplete.

Contravenes DECCs – Environmental Impact Act 2000

Damage to local economy – 50% employment in this area is relates to Tourism. The Proposed Pylons supplying this windfarm would have severe detrimental affect on the footfall to local caravan sites.

Arguments in favour – Jobs ? Specialists. Pylon are built outside the UK and transported by specialist Carriers
External Street Furniture on Site ? Nothing gates only and unsightly sub station which requires minimal (Specialist) attendance.

Income for local area? – one off annual payment to local residents will do nothing to offset the drop in property value/Noise caused by construction linked to Windfarms and Pylon construction./delayed business journey's – for impact see affect of existing of convoys travelling through Newtown Powys

Compensation does not reach indirectly impact associated community who will suffer considerable inconvenience and devalued property an will get absolutely no benefit whatsoever.

I Urge the Secretary of state to observe the democratic process and refuse this application. The Power generated is uneconomic and expensive, the cost to the local economy will vastly outway any minimal benefits .

Construction will have negative impact on rare and unique upland areas, local communities and tourism

Yours Sincerely
