Circus Mondao – Risk Assessment for animals

Date of Assessment: 07 February 2016

Assessment Team: Circus Mondao Management

Potential Hazard	Potential Harm	Who may be at risk	Controls that are in place	Like-lihood	Severity	Risk Rating
The site	Toxic plants, Insufficient fencing, barbed wire, pot holes,	The animals	<ul style="list-style-type: none"> • Visual inspection of entire site. • Cordon of any dangerous areas. • Remove hazardous objects when possible • Fence of were appropriate. 	3	1	3
performing	Unusual noise. Faulty Equipment. ill fitting or worn harness. Injury from stakes on the way to big top	Animals Members of the general public and circus employees.	<ul style="list-style-type: none"> • The animal are lead around the ring by a trained handler. • If the animal is startled the handle has full control. • All harness is checked on a regular basis • Animal are lead to and throw for the own safety. 	2	1	2
Rides (camels) And ponies.	Injury from falling off. To handler bitten or kicked.	Members of the general public and circus employees.	<ul style="list-style-type: none"> • Staff are given adequate training on how to handle the animals before working with them. • Only trained competent staff work in contact with the animals. • All riders are held in place while riding animals. • Animals only walk during rides. 	2	1	2

Transporting of animals	Loading and unloading, treading on handler as loading /unloading. Slipping on ramp,	The animal and the handler.	<p>All animals are loaded and unloaded with suitable fitted head collar and lead rope. Specific category A staff load and unload animals.</p> <p>If ramp is slippery we will put straw or sawdust onto it.</p> <p>Transport is purpose built for the animals . Zebras have partitions where they stand and can brace themselves against the walls, and wooded slats on the floor to aid stability and stop hooves slipping under partitions.</p> <p>Camels have large area were they travel together and can lie down as this is how camels like to travel.</p> <p>Reindeer have large area where they travel together and are able to lie down, when rutting/shedding antlers they are travel in separate partitions so as not to cause injury to each other or their antlers.</p> <p>Zebras and camels have haynets when travelling.</p> <p>Reindeer have a metal hay rack .</p>	2	2	4

COMMENTS: water is available to the animals 24 hours a day. Unless they are in the transporter which they are watered before they are loaded and watered as soon as unloaded. They are only on the transporter a short amount of time. Once a week or once a fortnight. Hay is also available ad-lib all day.

THIS IS WHAT WE DO ON A DAILY BASIS, WE HAVE NOW ADDED "RECORD OF NOT EATEN". NORMALLY IF ANY ANIMAL SHOWS ABNORMAL BEHAVIOR WE MAKE A NOTE OF IT IN THIS COMMENT BOX.

Subject: Camel

This is to confirm that on the 02 July 2015, I examined a camel calf on behalf of [REDACTED]

The calf had a lump on it's knee. To treat the animal, I injected it with 5ml of Pen & Strep, 3ml of Meloxidyl and 2ml of Vitesel.

[REDACTED] B.V.Sc., D.B.R., M.R.C.V.S.
