

Settlement Body/Agent (TBD) ✓

NOTES

This is a case process. It is activated on notification of a Stress Event's having occurred. It deals with all bonuses and penalties for all CPs during the relevant settlement periods.

The following information is required for the necessary processing:

- the related warning and its time of issue
- the system demand corrected for demand reduction
- for each CMU at the time of the warning and at the time of stress: its output, PN, and CFN
- for each CMU whether or not transmission was constrained, the net CO from the relevant auction, the net CO including capacity trades, which portfolio it belongs to, its metered output
- the metered output of "non-CMUs" (whatever is specified in the Demand Curve)
- the SO instructions
- DSR performance
- CONE
- the value of Z
- VoLL

Handle all Bonuses and Penalties for a Stress Event
