

Convoy Commanders Report

I was the Convoy Commander of the Ch Inspector Ch Inspect
The preparation for the preparation for the operation went well and there were no major issues identified with the briefing or indeed departure processes from the Southern termini.
were utilised on this leg of the operation. No issues were identified at them.
During transit the convoy although this only consisted of operation.
Mid way between the sudden and dramatic loss of power and was forced to pull onto the hard shoulder of the motorway together with the rest of the convoy assets. whilst the problem was identified and resolved. As a result of this stop and the requirement Although no definitive explanation was given for the breakdown it was topped up with fuel and started again without too much problem. This proved to be somewhat of a mystery as the vehicle had been filled prior to the operation and there was no sign of leakage.
Prior to arrival at the same problem returned in relation to a decision was made to continue utilising a traffic unit as the lead element.
De-prep and handover went without and further issues being identified with the exception of a u/s radio in
The convoy departed the in accordance behind schedule. This was as a result of the experiencing mechanical problems with experience vehicle before their arrival at the CCL. I felt it was a

the decision was made to use the police Landrover, which had been carrying out the role of	•
