# EHS 2010-11 Headline Report Errata

This note summarises revisions made to the **2010-11 English Housing Survey**, **Headline Report** which was originally published on the DCLG website on 9 February 2012.

### 1. Section 1, Para 1.3

The number of owner occupied households is stated as 14.5 million. The actual figure is 14,449,781 and should have been reported as 14.45 million as it has in the subsequent annual reports.

Annex tables in the report and in Excel spreadsheets are correct and provide greater precision. Users are asked to refer to these instead.

### 2. Section 1, Table 1.1

This should include some figures in italics to show they are based on small sample sizes (counts of between 30-50).

The table has been corrected in the 2010/11 Households report, Table 1.1 and users are asked to refer to this instead.

#### 3. Section 2, Table 17

Data was updated between original analysis and final publication resulting in incorrect figures in the table. The correct figures are shown here.

all dwellings	rising	penetrating	condensation/	any damp
	damp <sup>1</sup>	damp <sup>1</sup>	mould <sup>1</sup>	problems
	dump	dump		ds of dwellings
2001	625	1,032	860	2,032
2003	740	1,066	1,003	2,283
2004	750	1,035	951	2,251
2005	759	952	941	2,210
2006	724	886	947	2,158
2007	640	833	881	1,916
2008	584	759	865	1,746
2009	651	701	895	1,799
2010	542	548	784	1,474
				percentages
2001	2.9	4.9	4.1	9.6
2003	3.4	5.0	4.7	10.6
2004	3.5	4.8	4.4	10.4
2005	3.5	4.4	4.3	10.1
2006	3.3	4.0	4.3	9.8
2007	2.9	3.8	4.0	8.6

### 4. Section 2, Figure 16

This refers to Annex table 18 for underlying data. Users are directed to consult Annex table 17 instead.

## 5. Annex Table 17

Data in Annex table 17 was updated between original analysis and final publication resulting in incorrect figures in the table. The correct figures are shown here.

all dwellings				
	•	penetrating	condensation/	any damp
	damp	damp	mould	problems
				s of dwellings
owner occupied	309	295	299	726
private rented	178	169	272	467
private sector	488	464	571	1193
local authority	32	52	119	161
housing association	*	32	94	121
social sector	281	84	213	281
all tenures	769	548	784	1,474

# Annex Table 17: Dwellings with damp problems by tenure, 2010

Notes:

1) \* indicates sample size too small for reliable estimate

2) figures in *italics* are based on small samples and should be treated with caution Source: English Housing Survey, dwelling sample

### 6. Glossary, entry 'Usable floor area', p. 63

The definition of 'Usable floor area' was incorrectly defined in the wording of the glossary entry in the publication. The glossary previously reported that integral garages and integral balconies were excluded from the total usable floor area. However, this statement is incorrect. Since the EHCS 2005-06 data, integral garages and integral balconies have been included in the calculation of usable floor area. The correct definition of usable floor area is as follows:

"The total usable internal floor area of the dwelling as measured by the surveyor, rounded to the nearest square metre. The total usable internal floor represents the floor space that could reasonably be used for habitation. It includes the area within the footprint of the dwelling, minus the area under the external walls, the area under internal partition walls and the area occupied by staircases. Integral garages and integral balconies are included as usable floor area. Loft space is not included unless the loft is habitable, with a fixed stair in place to access it."

# 7. Decent Homes 2006 and 2007 figures

The 2007 Housing Association figure for non-decent homes was updated for the 2008 Annual Stock Report, but this correction was not carried through to the following year's Headline Report. Similarly the 2006 figures for non-decent homes for all tenures were updated for the 2010 Annual Stock Report following improvements to modelling, but the updates were not carried through into the following year's Headline Report.

The table below contains the updated figures for table 15:

#### Non-decent homes, by tenure, 2006 to 2014

all dwellings

	2006	2007	2008	2009	2010	2011	2012	2013	2014

### 8. Main heating system, boiler types and insulation measures 2001 figures

The figures for 2001 from the English House Condition Survey had not been updated, following a recalibration in light of the 2001 Census results. A time series from 1996 to 2014 is presented in the 2014-15 Headline Report: Annex Tables 2.7, 2.9 and 2.11. The table below contains the updated 2001 figures for the 2010-11 Headline Report: Annex Tables 8, 10 and 12.

# Main heating system, Boiler types, Insulation measures, 2001
