Subject: Fw: Carnedd Wen & Llanbrynmair Wind Farms

- *RE-DETERMINATION OF THE APPLICATION BY RES UK & IRELAND LIMITED ("RES") DATED 27 MARCH 2009 FOR CONSENT TO CONSTRUCT AND OPERATE A 100 MW WIND TURBINE GENERATING STATION IN POWYS, MID WALES ("LLANBRYNMAIR")*
- *RE-DETERMINATION OF THE APPLICATION BY RWE NPOWER RENEMABLES LIMITED ("RWE") DATED 11 DECMEBR 2008 FOR CONSENT TO CONSTRUCT AND OPERATE A 130-250MW WIND TURBINE GENERATING STATION IN POWYS, MID WALES ("CARNEDD WEN")*

We wish to **object** strongly to the applications of both of these proposed wind farms. Representations have already been made on behalf of people/organisations/bodies that object to these windfarm proposals – these objections still stand.

My family and I live on a beef and sheep hill farm. We need (and have) to work in harmony with the wildlife and surrounding countryside. Our heritage and uplands are important to us all – and not just to the developers, who seek a site to build on.

Apart from the inefficiency of wind power, with these proposals there are real ecological drawbacks, including damage to habitats, wildlife and the far from insignificant aesthetic drawback of the assault upon the natural beauty of the striking Welsh rural landscape which wind turbines entail. This is unacceptable for the generations now, and the ones that follow us.

What will it mean if all of these proposed turbines and associated infrastructure are erected? An "improved" countryside? I don't think so.

If these proposals are to be re-determined, then I expect that the whole proposal be re-determined, not just the parts the Developers would like to challenge.
