CSoCNE - Consolidated Combined Statement of Comprehensive Net Expenditure

CSoCF - Consolidated Combined Statement of Cash Flows

CSoCiTE - Consolidated Combined Statement of Changes in Taxpayers Equity

2013–14 Magenta Pension Scheme: illustrative pension scheme statement

- 1. The illustrative resource accounts for the fictitious "Magenta" Pension Scheme consist of:
 - a. Report of the Managers;
 - b. Report of the Actuary;
 - c. Statement of the Accounting Officer's Responsibilities;
 - d. Governance Statement
 - e. Certificate and Report of the Auditor
 - a. Statement of Parliamentary Supply;
 - b [Combined] Statement of Comprehensive Net Expenditure (*);
 - c.[Combined] Statement of Financial Position (*);
 - d. [Combined] Statement of Changes in Taxpayers' Equity
 - e. [Combined] Statement of Cash Flows (*);
 - f. Notes to the accounts.
 - * these statements will be "combined" if they reflect transactions relating to both pensions and early departure costs (see paragraph 3 below)
- 2. The accounts are for illustration only and should only be followed as the circumstances of an individual pension scheme dictate. The accounts do not show every line item which may be necessary in the circumstances of an individual scheme, but they do show the main headings and line items which most schemes would be expected to include.
 - <u>Preparers should assess whether disclosures are relevant and material and tailor disclosures accordingly. Where the headings are not appropriate they do not need to be disclosed.</u>
- 3. As noted in Chapter 12 of the FReM, the accounts of pension schemes may include transactions relating to early departure costs (also known as compensation payments) payable under a compensation scheme. In this example, the accounts combine the transactions of the Magenta Pension Scheme and the Violet Compensation Scheme. The latter is considered to act as an agent and hence recognises liabilities to the former employees or amounts due from employees only to the extent that these represent year-end timing differences. Nevertheless, the scheme statements reflect transactions relating to a now-discontinued arrangement whereby part of the liability to former employees was met from central funding and was not wholly recharged to employers. Different accounting arrangements will apply if the Scheme acts as a principal, or if different pre-funding arrangements apply.
- Text is provided in certain notes. Pension scheme statements should use this text in their notes where the relevant circumstances apply.

Report of the Managers

The Report of the Managers should include information under the following headings, to the extent that they are relevant and not included elsewhere in the Foreword, for example in the Governance Statement. Additional information may be given if this will aid understanding of the Scheme. Similar information should be provided if there is a separate Compensation Scheme.

Background to the Scheme

- Statutory basis for the Scheme
- Eligibility to join the Scheme
- Main features of the Scheme, including benefits and how they are funded
- Management of the Scheme
- Organisations responsible for managing the Scheme
- Corporate governance of the Scheme, including management team
- Arrangements governing determination of contribution rates and benefits

Key developments in year:

- · Changes in contributions
- Changes in benefits
- Membership statistics (movement in year)
- Financial position at 31 March 2014, significant features of results for year
- Events after the reporting period [reference to Note 29]
- Issues arising for 2013-14

Information for Members:

- · Supplementary information available to members
- Information about FSAVCs and Stakeholder Pensions
- The names and addresses of the Scheme's (or Schemes'):
 - Accounting Officer;
 - managers or administrators;
 - actuary;
 - bankers;
 - legal advisers;
 - auditors; and
 - employers (this may be given in categories of employer, rather than by individual employer).
- Contact for enquiries

Report of the Actuary

The Scheme's Actuary will be responsible for preparing this section of the Financial Statements. The content is likely to include:

- Introduction
- Membership data
- Methodology for determining key financial information, such as Scheme liabilities
- Financial assumptions underpinning the financial statements
- Demographic assumptions
- Details of liabilities and current service costs

Statement of the Accounting Officer's Responsibilities

Drafting note: This draft-illustrative Statement assumes that the Accounting Officer for the Pension Scheme is the same person as for the Compensation Scheme. If this is not the case, appropriate responsibilities will need to be clarified in the Statement. See also Annex 1 of the FReM.

Under the [name of the relevant Act], the [name of relevant authority]/[Secretary of State with the consent of the relevant authority] has directed the [name of the pension scheme] to prepare for each financial year a statement of accounts in the form and on the basis set out in the Accounts Direction.

In the following paragraph Schemes will need to insert the terms of the Accounts Direction they are subject to. The text provided below is based on a Scheme funded by the UK Parliament.

The combined financial statements must give a true and fair view of the state of affairs of the [combined] scheme at the year end and of the net resource outturn and cash flows for the year then ended. The financial statements are required to provide disclosure of any material expenditure or income that has not been applied to the purposes intended by Parliament or material transactions that have not conformed to the authorities that govern them. In addition, the financial statements must be prepared so as to ensure that the contributions payable to the Scheme during the year have been paid in accordance with the Scheme rules and the recommendations of the Actuary.

In preparing the financial statements, the Accounting Officer is required to comply with the requirements of the *Government Financial Reporting Manual* and in particular to:

- observe the accounts direction issued by [the name of the relevant authority as above] including the relevant accounting and disclosure requirements, and apply suitable accounting policies on a consistent basis;
- make judgements and estimates on a reasonable basis;
- state whether applicable accounting standards, as set out in the Government Financial Reporting Manual have been followed, and disclose and explain any material departures in the financial statements; and
- prepare the financial statements on a going concern basis.

The [relevant authority] has appointed the [Permanent Head of the Department] as Accounting Officer for the [name of the pension scheme]. The responsibilities of an Accounting Officer, including responsibility for the propriety and regularity of the public finances for which the Accounting Officer is answerable, for keeping proper records and for safeguarding the assets of the Pension Scheme are set out in [name of guidance] published by the [relevant authority].

				Es	stimate		Outturn		Outturn

Figures in the areas outlined in bold are voted totals or other totals subject to Parliamentary control.

Explanations of variances between Estimate and outturn are given in SoPS Note 2 and in the Management Commentary.

Where the Scheme has an Excess Vote for one of the reasons given in 'Managing Public Money' or 'Government Accounting Northern Ireland' (as appropriate) the Scheme should insert this note here:

Explanations of variances between Estimate and outturn are given in Note 3 and in the Management Commentary

The Scheme has incurred an Excess of [insert amount]£000 because [insert reason]___ The Scheme will seek Parliamentary approval by way of an Excess Vote in the next Appropriation Act [Budget Act in Northern Ireland].

All Schemes must insert this note here:

Explanations of variances between Estimate and outturn are given in Note 3 and in the Management Commentary

Where the pension-Scheme has a reportable Prior Period Adjustment, the department-Scheme should insert this note here:

Prior Period Adjustments (PPAs) that have resulted from an error in previous recording or from a change in accounting policy initiated by the department or which is otherwise the result of pension scheme action have a potential impact on net budgets. It is proper for the department to seek parliamentary authority for the provision that should have been sought previously. In 201X-1Y, the following such PPAs have been made, which have been included within voted Supply in the Estimate:

PPA Description	Resource/ Capital	DEL/AME	Amount/ £000	

Notes to the Departmental Resource Accounts (Statement of Parliamentary Supply)

SOPS1. Statement of accounting policies

The Statement of Parliamentary Supply and supporting notes have been prepared in accordance with the 201X-1Y Government Financial Reporting Manual (FReM) issued by [insert name of issuing authority]. The Statement of Parliamentary Supply accounting policies contained in the FReM are consistent with the requirements set out in the 201X-1Y Consolidated Budgeting Guidance and Supply Estimates Guidance Manual.

SOPS1.1 Accounting convention

The Statement of Parliamentary Supply and related notes are presented consistently with Treasury budget control and Supply Estimates. The aggregates across government are measured using National Accounts, prepared in accordance with the internationally agreed framework 'European System of Accounts' (ESA95). ESA95 is in turn consistent with the System of National Accounts (SNA93), which is prepared under the auspices of the United Nations.

The budgeting system and the consequential presentation of Supply Estimates and the Statement of Parliamentary Supply and related notes, have different objectives to IFRS-based accounts. The system supports the achievement of macro-economic stability by ensuring that public expenditure is controlled, with relevant Parliamentary authority, in support of the Government's fiscal framework. The system provides incentives to departments to manage spending well so as to provide high quality public services that offer value for money to the taxpayer.

The Government's objectives for fiscal policy are set out in the Charter for Budget Responsibility. These are to:

- ensure sustainable public finances that support confidence in the economy, promote intergenerational fairness, and ensure the effectiveness of wider government policy; and
- support and improve the effectiveness of monetary policy in stabilising economic fluctuations.

SOPS1.2 Comparison with IFRS-based accounts

Many transactions are treated in the same way in National Accounts and IFRS-based accounts, but there are a number of differences as detailed below. A reconciliation of the department's outturn as recorded in the SoPS compared to the IFRS-based SoCNE is provided in SoPS note 3.2

Departments should include the following notes where material and tailor them to the department's circumstances. Departments should provide additional details of other transactions accounted for differently between the Statement of Parliamentary Supply and IFRS-based accounts.

SOPS 1.aa PFI and other Service Concession arrangements

The National Accounts basis for recognising service concession arrangements is broadly similar to UK-GAAP, applying a risk-based test to determine the financial reporting. IFRS-based recognition of service concession arrangements (IFRIC 12) is determined using control tests, which can result in a different on/off balance sheet treatment.

SOPS1.ab Capital Grants

Grant expenditure used for capital purposes are treated as capital (CDEL) items in the Statement of Parliamentary Supply. Under IFRS, as applied by the FReM, there is no distinction between capital grants and other grants, and they score as an item of expenditure in the Consolidated Statement of Comprehensive Net Expenditure.

SOPS1.ac Equity Withdrawals

Dividends received from investments will typically be recorded as resource income in IFRS-based accounts, but they may be recorded as capital equity withdrawals (repayment of capital from a investee to the department) in the Statement of Parliamentary Supply where the dividend is greater than the investee profits for the current reporting period and previous two periods.

SOPS1.ad Prior Period Adjustments (PPAs)

PPAs resulting from an error in previous recording, or from an accounting policy change initiated by the department, need to be voted by Parliament in the current year, whereas in IFRS-based accounts (IAS 8) they are treated as adjustments to previous years. PPAs resulting from a change in accounting policy brought in by a new or modified accounting standard are not included in Estimates, so there is no misalignment.

SOPS1.ae Receipts in excess of HM Treasury agreement

This applies where HM Treasury has agreed a limit to income retainable by the department, with any excess income scoring outside of budgets, and consequently outside of the Statement of Parliamentary Supply. IFRS-based accounts will record all of the income, regardless of the budgetary limit. This situation may arise in the following areas: (i) profit on disposal of assets; (ii) income generation above department Spending Review settlements; and (iii) income received above netting-off agreements.

SOPS1.af Provisions - Administration and Programme expenditure

Provisions recognised in IFRS-based accounts are not recognised as expenditure for national accounts purposes until the actual payment of cash (or accrual liability) is recognised. To meet the requirements of both resource accounting and national accounts, additional data entries are made in the Statement of Parliamentary Supply across AME and DEL control totals, which do not affect the Statement of Comprehensive Net Expenditure. As the Administration control total is a sub-category of DEL, Administration and Programme expenditure reported in the Statement of Parliamentary Supply was differ from that reported in the IFRS-based accounts.

Magenta Pension Scheme – Financial Statements 201X-1Y Notes to the Financial Statements

1. Basis of preparation of the Scheme financial statements ———

The financial statements of the [combined] Scheme have been prepared in accordance with the relevant provisions of the 201X-1Y Government Financial Reporting Manual (FReM) issued by [insert name of issuing authority]. The accounting policies contained in the FReM apply International Financial Reporting Standards as adapted or interpreted for the public sector. IAS 19 Employee Benefits and IAS 26 Accounting and Reporting by Retirement Benefit Plans are of particular relevance to these statements.

In addition to the primary statements prepared under International Financial Reporting Standards, the FReM also requires the Scheme to prepare an additional statement – a Statement of Parliamentary Supply. This <u>statement</u>, and its supporting notes, show outturn against Estimate in terms of the net resource requirement and the net cash requirement.

1.1 ____Magenta Pension Scheme

The Magenta Pension Scheme is a contracted out, unfunded, defined benefit pay-as-you-go occupational pension scheme operated by the [name of entity] on behalf of members of the [name of group] who satisfy the membership criteria.

Contributions to the Scheme by employers and employees are set at rates determined by the Scheme's Actuary and approved by [governing body]. The contributions partially fund payments made by the Scheme, the balance of funding being provided by [Parliament/the Northern Ireland Assembly] through the annual Supply Estimates process]. The administrative expenses associated with the operation of the Scheme are borne by [name of entity] and reported in [the entity's financial statements].

The financial statements of the Scheme show the financial position of the Magenta Pension Scheme at the year end and the income and expenditure during the year. The Statement of Financial Position shows the unfunded net liabilities of the Scheme; the Statement of Comprehensive Net Expenditure shows, amongst other things, factors contributing to the change in the net liability analysed between the pension cost, enhancements and transfers in, and the interest on the Scheme liability. Further information about the actuarial position of the Scheme is dealt with in the Report of the Actuary, and the Scheme financial statements should be read in conjunction with that Report.

The financial statements also have regard to [whatever other legislation governs the particular accounts under review].

1.2 _____Violet Compensation Scheme – agency arrangements ——

Drafting note: t_This note will need to be amended if the scheme acts as a principal in respect of early departure costs (or compensation payments) as the scheme statements will need to reflect the scheme's obligations to the former employees and amounts recoverable from employers.

The Violet Compensation Scheme acts as an agent for employers in the payment of compensation payments arising under the Scheme. Compensation payments are generally recovered from employers on a monthly basis. The financial flows associated with these transactions are not brought into account in the financial statements. However, the financial statements recognise the liabilities arising from the central funding of compensation payments which amount to $\frac{\text{Some} - \text{E}[A]000\text{m}}{\text{E}[B]000\text{m}}$ (201W-1X: E[a]m000) (see note $\frac{1923}{\text{E}[B]000\text{m}}$) amounts that have been pre-funded or prepaid by employers E[B]000m (201W-1X: E[b]000m) (see note $\frac{2218}{\text{E}[B]000\text{m}}$).

2. Statement of accounting policies

The accounting policies contained in the FReM follow International Financial Reporting Standards to the extent that they are meaningful and appropriate in the public sector context.

Where the FReM permits a choice of accounting policy, the accounting policy which has been judged to be most appropriate to the particular circumstances of the Scheme for the purpose of giving a true and fair view has been selected. The accounting policies adopted have been applied consistently in dealing with items considered material in relation to the Scheme financial statements.

2.1 Accounting convention

These accounts have been prepared under the historical cost convention.

A description of the accounting policies for all <u>material</u> items should then follow. Headings might include:

- Contributions receivable
- Transfers in and out
- Income received from departments in respect of enhancements
- Other income
- Current service cost
- Past service cost
- Interest on Scheme liabilities

2016. Pension liabilities

2016.1 1 Pension liability

Assumptions underpinning the pension liability

The [name of scheme] is an unfunded defined benefit scheme. [Name of actuary] carried out an assessment of the Scheme liabilities as at 31 March 201Y. The Report of the Actuary on pages [x] and to [y] sets out the scope, methodology and results of the work the actuary has carried out.

The [Scheme managers/trustees] together with the actuary and the auditor have signed a Memorandum of Understanding that identifies, as far as practicable, the range of information that the [Scheme managers/trustees] should make available to the actuary in order the meet the expected requirements of the Scheme auditor. This information includes, but is not limited to, details of:

- Scheme membership, including age and gender profiles, active membership, deferred pensioners and pensioners;
- benefit structure, including details of any discretionary benefits and any proposals to amend the Scheme;
- income and expenditure, including details of expected bulk transfers into or out of the Scheme; and
- following consultation with the actuary, the key assumptions that should be used to value the Scheme liabilities, ensuring that the assumptions are mutually compatible and reflect a best estimate of future experience.

The major key assumptions used by the actuary were:

At 31	At 31	At 31	At 31	At 31
March	March	March	March	March
201Y	201X	201W	201V	200U

Rate of increase in salaries Rate of increase in pensions in payment and deferred pensions Inflation assumption Nominal discount rate

Discount rate net of price inflation

Mortality rates at age 60 Current retirements

Females

Females

Males

Males

Retirements in 20 years time

Females
e
m
a
l
e
s
M Males
a

0 0

These key assumptions are inherently uncertain, since it is impossible to predict with any accuracy future changes in the rate of salary increases, inflation, longevity or the return on corporate bonds. The actuary uses professional expertise in arriving at a view of the most appropriate rates to use in the annual valuation of the Scheme liabilities. However, the [Scheme managers/trustees] acknowledge that the valuation reported in these accounts is not certain, since a change in any one of these assumptions will either increase or reduce the liability. For example, on its own, even a small rise in the assumed rate of inflation will result in an increase in the pension liability.

The assumption that has the biggest impact on the amount of the reported liability is the discount rate net of price inflation. As set out in the FReM, and as required by IAS 19, the discount rate net of price inflation is based on yields on high quality corporate bonds. The rates are set out in the above table. Any decrease in the discount rate net of price inflation leads to a significant increase in the reported liability.

In accordance with IAS 19 the Scheme Managers/trustees are required to undertake a sensitivity analysis for each significant actuarial assumption as of the end of the reporting period, showing how the defined benefit obligation would have been affected by changes in the relevant actuarial assumption that were reasonably possible at that date. This analysis, including details of the methods and assumptions used in preparing the sensitivity analyses, the limitations of these methods, and the reasons for any changes in methods and assumptions used in preparing the sensitivity analyses, are included in the analysis of the pension liability below.

16.2 Analysis of the pension liability—

[Insert here a table analysing the liability between active <u>members</u>, deferred <u>pensions</u> and <u>current</u> pension<u>sers</u> – as currently provided in the Report of the Actuary – but expanded to provide comparative figures. Comparatives should ideally be for the number of years for which major assumptions are provided in the table earlier in this note.]

NB: this As with the rest of this pro-forma, the -wording below is illustrative and should be tailored to . The note should reflect the actual-circumstances of the Scheme-itself.

20.2—Pension Scheme liabilities accrue over employee's periods of service and are discharged over the period of retirement and, where applicable, the period for which a spouse or eligible partner survives the pensioner. In valuing the Scheme liability, the Actuary must estimate the impact of several inherently uncertain variables into the future. The variables include not only the key financial assumptions noted in the table above, but also

assumptions about the changes that will occur in the future in the mortality rate, the age of retirement and the age from which a pension becomes payable.

20.3—The value of the liability on the statement of financial position may be significantly affected by even small changes in assumptions. For example, if at a subsequent valuation, it is considered appropriate to increase or decrease the assumed rates of inflation or increases in salaries, the value of the pension liability will increase or decrease. The managers [trustees] of the Scheme accept that, as a consequence, the valuation provided by the Actuary is inherently uncertain. The increase or decrease in future liability charged or credited for the year resulting from changes in assumptions is disclosed in note 20.4. The note also discloses "experience" gains or losses for the year, showing the amount charged or credited for the year because events have not coincided with assumptions made for the last valuation.

16.3 Sensitivity analysis

A sensitivity analysis for each significant actuarial assumption as of the end of the reporting period is included below.

-[Insert here a sensitivity analysis for each significant actuarial assumption as of the end of the reporting period, showing how the defined benefit obligation would have been affected by changes in the relevant actuarial assumption that were reasonably possible at that date. This could take the format of an expanded version of the sensitivity analysis that is currently included in the Report of the Auditor but Schemes are encouraged to disclose in the manner that best suits their own individual circumstances. Also include details of the methods and assumptions used in preparing the sensitivity analyses, the limitations of these methods, and the reasons for any changes in methods and assumptions used in preparing the sensitivity analyses. The actuary will need to provide this information!

Use of provisions in year	15.2		
Revaluation at year-end			
Balance at 31 March 201Y		-	-

2419. Financial Instruments

ONLY where the scheme is exposed to risk should the appropriate IFRS 7 disclosures be made. Disclosures should be given only where they are necessary because the scheme holds financial instruments that are complex or play a significant medium to long-term role in the financial risk profile of the scheme. The headings in IFRS 7 should be used to the extent that they are relevant. Where the scheme does not face significant medium to long-term financial risks, then it is sufficient to make a statement to that effect – similar to that above. (Given that all schemes have financial instruments within the scope of IAS 32, silence is not an option.)

As the cash requirements of the Scheme are met through the Estimates process, financial instruments play a more limited role in creating and managing risk than would apply to a non-public sector scheme of a similar size. The majority of financial instruments relate to contracts for non-financial items in line with the Scheme's expected purchase and usage requirements and the Scheme is therefore exposed to little credit, liquidity or market risk.

ONLY where the scheme is exposed to risk should the appropriate IFRS 7 disclosures be made. Disclosures should be given only where they are necessary because the scheme holds financial instruments that are complex or play a significant medium to long term role in the financial risk profile of the scheme. The headings in IFRS 7 should be used to the extent that they are relevant. Where the scheme does not face significant medium to long-term financial risks, then it is sufficient to make a statement to that offset—similar to that above. (Given that all schemes have financial instruments within the scope of IAS 32, silence is not an option.)

2520. Contingent liabilities disclosed under IAS 37

The Scheme should give here information about contingent liabilities disclosed under the requirements of IAS 37. This will probably need to mention guarantees to make pension payments in the event of a default by an approved AVC provider.

2621. Losses and special payments

2621.1 Losses Statement (Drafting note: if any)

Schemes should include a note on losses if the total value exceeds £300,000. Individual losses of more than £300,000 should be noted separately.

201X-1Y	201W-1X
0003	£000
