Official Statistics

New Enterprise Allowance is a scheme for unemployed people who wish to start-up their own business. It was introduced in April 2011, and is open to people aged 18 and over who are: claiming Jobseeker's Allowance (JSA) or Employment and Support Allowance (ESA); the dependent partners of JSA/ESA claimants; Income Support claimants who are lone parents or who are sick/disabled; and some Universal Credit claimants.

169,880 starts on the NEA scheme by 161,780 individuals.

to 31<sup>st</sup> March 2016

84,850 businesses set up through the NEA scheme by 84,120 individuals.

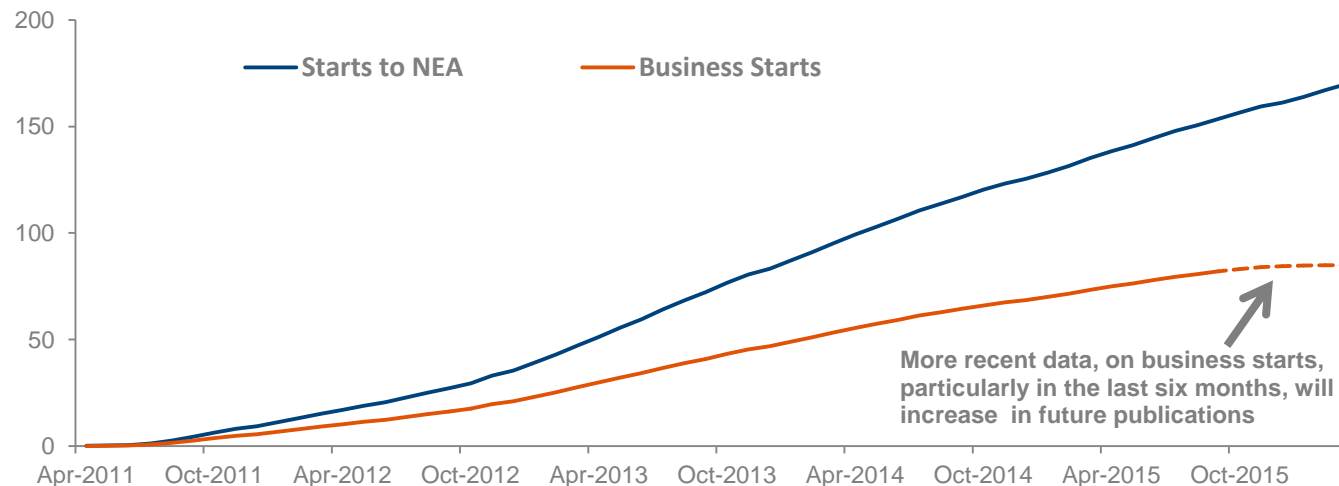

to 31<sup>st</sup> March 2016

69 % of people who started a business are in the 25-49 year old age group.

to 31<sup>st</sup> March 2016

## New Enterprise: Introduction

Participants receive access to a business mentor who provides them with guidance and support as they develop their business plan. **This is referred to as a start to NEA.**

Once a claimant has shown they have a viable Business Plan that demonstrates the business's sustainability potential, they are able to access financial aid alongside the business mentor continuing to provide support through the first six months of trading. **This is referred to as a business start.**

This financial aid consists of a weekly allowance worth £1,274 over 26 weeks, paid at £65 a week for the first 13 weeks and £33 a week for a further 13 weeks. Participants may also be able to access a start-up loan, if required.

New Enterprise Allowance is available across Great Britain. It was initially rolled out in stages across 17 target districts between April and July 2011. Roll out across the remaining 20 districts was completed at the end of August 2011.

It was introduced for people 18 and over, claiming Jobseeker's Allowance (JSA) for 26 weeks or more. Since October 2012, however, JSA claimants could apply from day one of their claim.

From January 2015, starts to NEA have been supported by contracted providers and eligibility extended to include claimants of Employment and Support Allowance (ESA), Incapacity Benefit (IB), Income Support (IS) and Universal Credit (UC).

## Status of the statistics

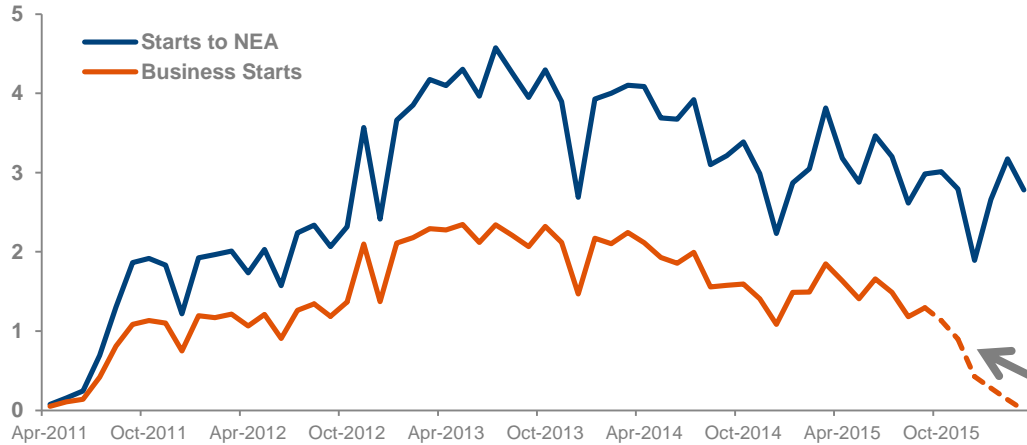

This document includes figures from April 2011 to March 2016 for the New Enterprise Allowance scheme.

These statistics are official statistics. Quarterly statistics have been produced on the number of starts and business starts in the past, this publication is a first look at how the data can be presented to show progression from starts to business set up and comments are invited on its content.

We will explore ways in which a measure of business sustainability can be incorporated in these statistics for the next publication.

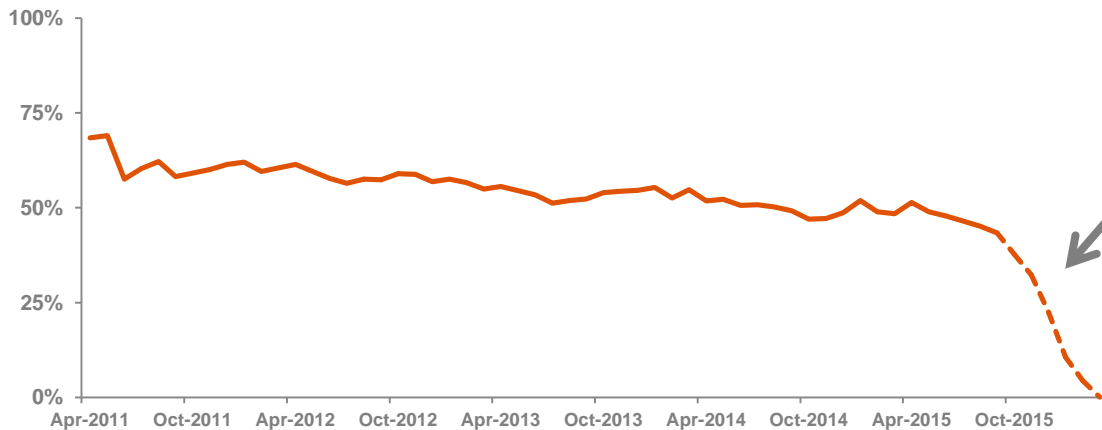

# All starts to New Enterprise Allowance

Total number of starts to NEA and number of businesses set up, by month of start on NEA  
Thousands

The end of the series under-represents the number of business starts due to the lag between starting on the scheme and launching a business.

Percentage of starts to NEA progressing to set up a business, by month of start on NEA

## Main findings

There have been **169,880 starts to NEA** and **84,850 businesses** set up through the scheme since April 2011.

Over the last year (April 2015 to March 2016), there have been **34,640 starts to NEA**. This is 13.5% lower than the previous 12 month period, and is set against a backdrop of a falling claimant count over this time.

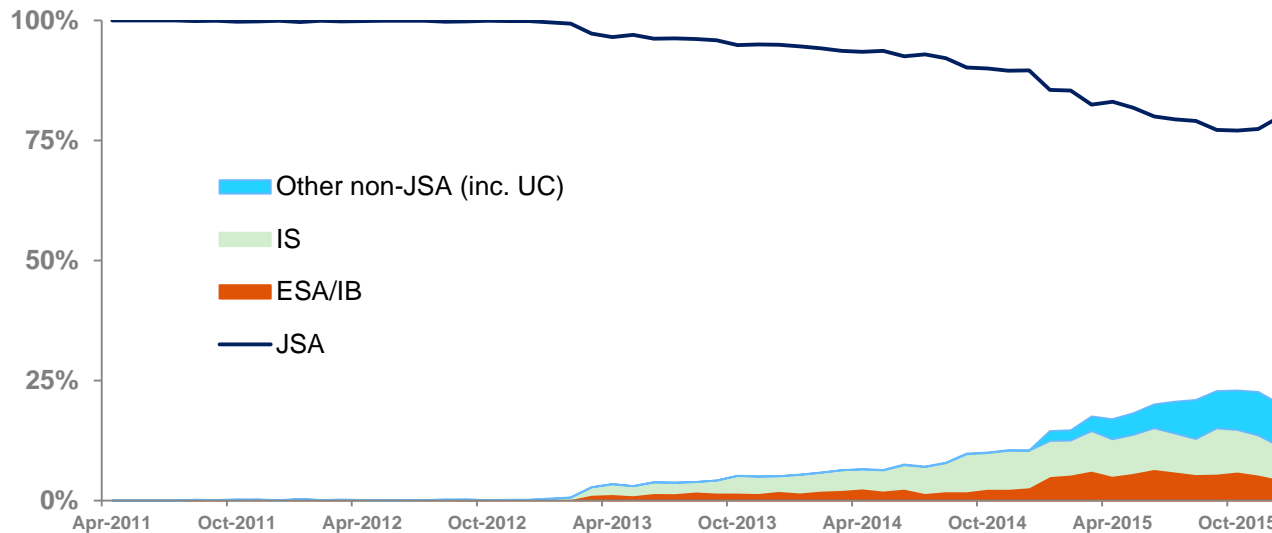

48% of NEA starts in the twelve months to September 2015 have progressed to set up a business.

A time lag is expected in the data as participants may take up to 6 months after starting on NEA to develop their business plan and set up their business. For example, only a very small number of those who have started NEA in March 2016 will have moved on to set up their business in the same month.

It is possible that people will participate more than once on NEA. Since April 2011 **161,780 individuals have started on the scheme**, and up to March 2016 52%, **84,120 individuals, have progressed to set up a business**. The following pages set out some of the characteristics of these individuals.

# Main benefit of individuals starting New Enterprise Allowance

Percentage of individuals starting NEA on JSA and non-JSA benefits over time <sup>(1)</sup>

<sup>(1)</sup> Chart does not include benefit status for just over 2k individuals where the status is not known.

## Main findings

Initially, New Enterprise Allowance was only available to JSA claimants. It has since been gradually rolled out to ESA/IB, IS and UC Claimants. Further explanation of the history of this roll-out, can be found in the, 'Eligibility and Phases of NEA' section on page 7.

There is a time lag in being able to match NEA starts to the national benefits database which means the data in this chart can only be taken up to December 2015. Of those starting on NEA in December 2015 where the benefit status is known, around 80% were on JSA with a further 5% on ESA and 7% on IS, with around 9% on other benefits (including those on UC).

The chart shows the earliest start date for those who may have started on the NEA scheme more than once.

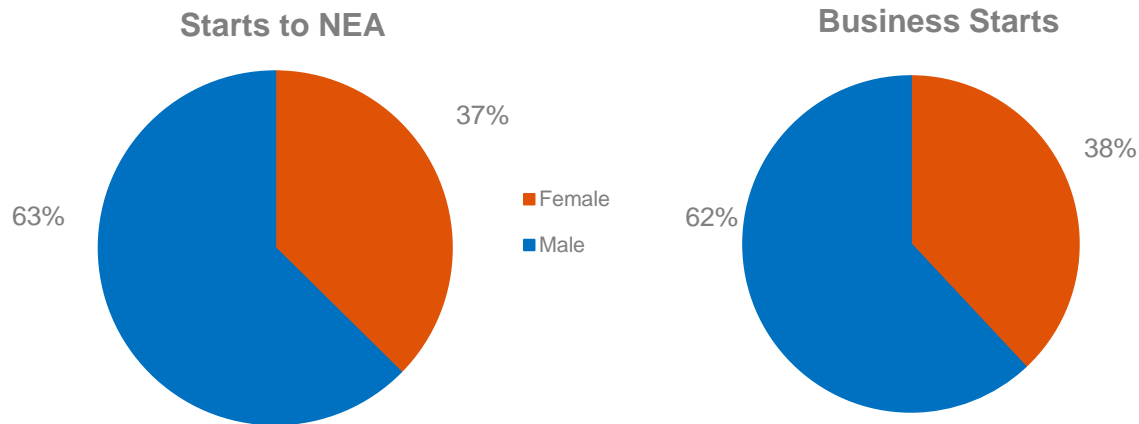

Universal Credit is being rolled out nationwide, and will eventually replace all non-contributory benefits, including Jobseeker's Allowance, Employment and Support Allowance and Income Support.

It is expected that when Universal Credit roll-out has been completed, the majority of people will claim Universal Credit before they take part in New Enterprise Allowance. While some Universal Credit claimants are in-work, but require in-work financial aid, the NEA scheme is only available to those claimants who are not in employment, education or training.

# Characteristics of those on New Enterprise Allowance

## Just over a third of those starting on NEA are women

Percentage, by gender

## Main findings

Out of the people who started on NEA, **60,320** are women (37%) and **31,930** of these have progressed to set up a business.

This means that almost the same proportion of women who started on the programme, then went on to start a business.

## Around 7 out of 10 of those starting on NEA are aged 25-49

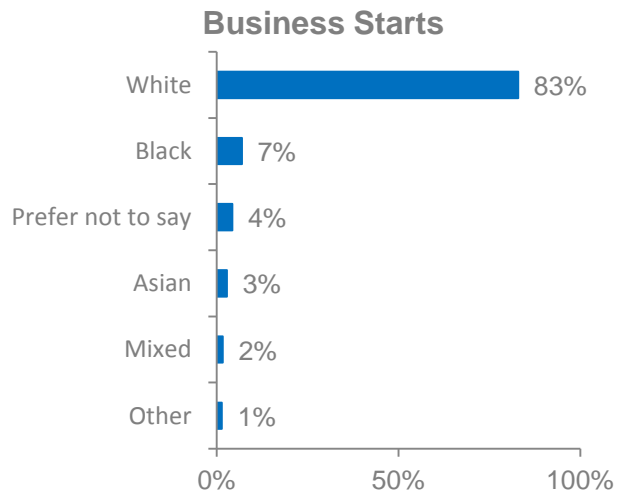

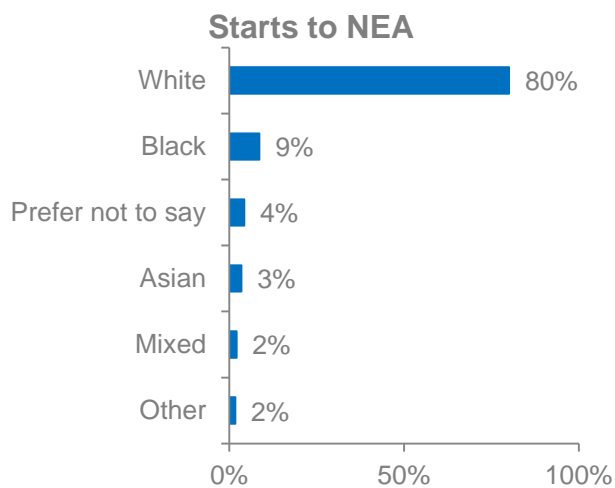

Percentage, by age group

The largest number of those on NEA are in the 25-49 year old age range, with **112,310** individuals starting NEA in this age group.

## Around 1 in 6 of those starting on NEA come from ethnic minorities

Percentage, by ethnicity

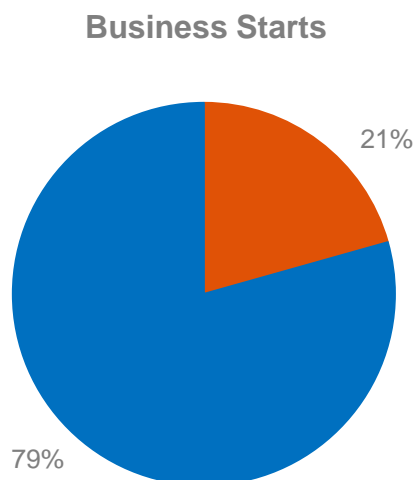

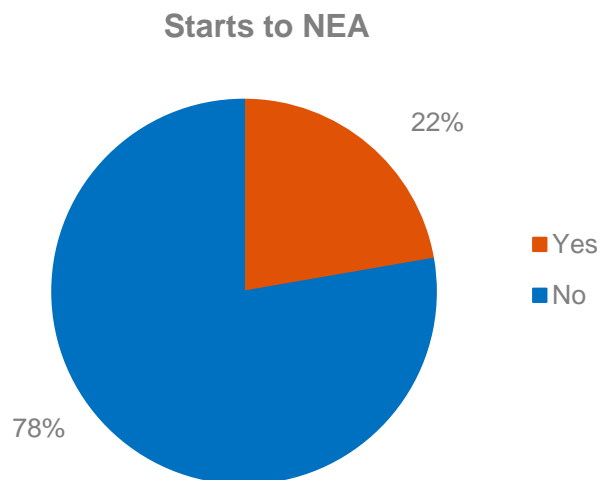

### Main findings

**128,970** (80%) of those who started the scheme have identified as white, with a further 14% from ethnic minorities and 6% where ethnicity was not identified.

## Around 1 in 5 people who have participated have a self-declared disability

Percentage, by self-declared disability

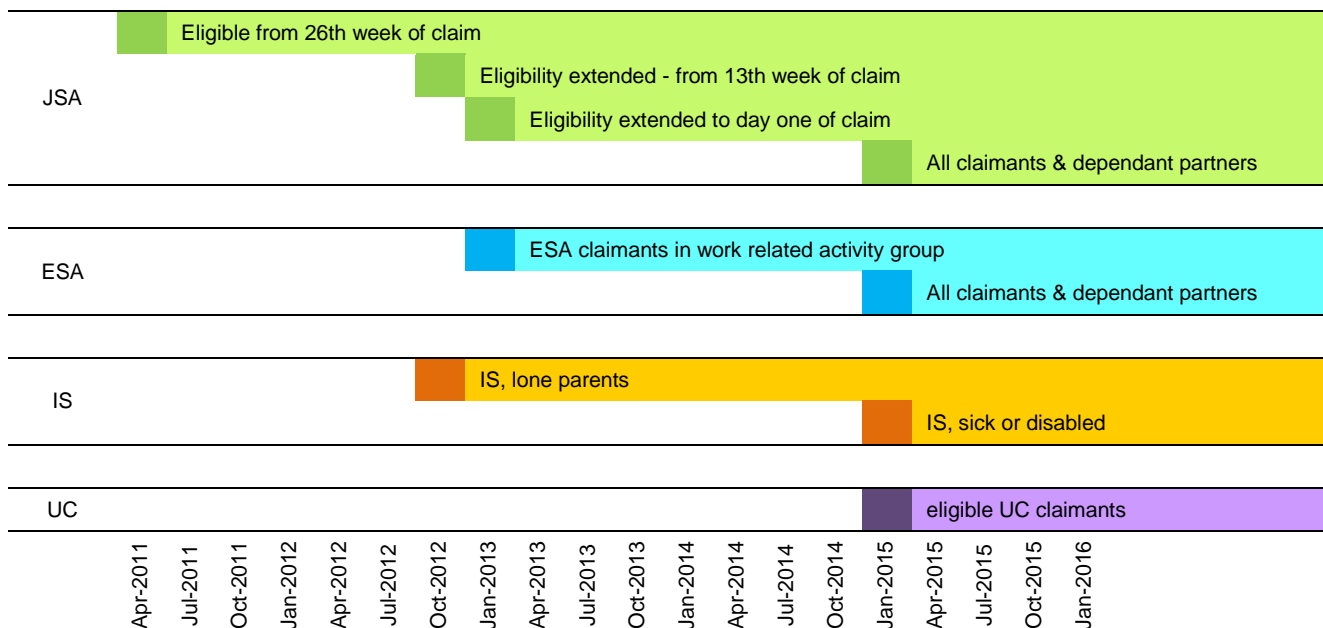

Of those starting on NEA **35,920** had a self-declared disability, with **17,330** of these progressing to set up a business.

# Eligibility for New Enterprise Allowance

## Over time, many more participants are eligible for the scheme

A timeline demonstrating month of introduction for changes in eligibility of the scheme

Initially, NEA was only introduced for JSA Claimants after 26 weeks of claiming.

From October 2012, eligible claimants were able to participate from day one of their claim.

As of January 2015, eligibility was expanded to cover all claimants in receipt of Jobseeker's Allowance and Income Support, Employment and Support Allowance in the Work Related Activity Group, and some UC claimants.

From **January 2015** new starts to NEA have been delivered by contracted providers. The way data is collected for these official statistics has changed to reflect this; data for starts prior to January 2015 is taken from the Labour Market System and data for starts since January 2015 taken from the Provider Referral and Payment (PRaP) system.

For starts prior to January 2015 a **start to NEA** is defined as the date the claimant first met with their business mentor. For starts since January 2015, a **start to NEA** is defined as the date the provider accepted the claimant on the programme. These starts have previously been recorded in the Official Statistics as "mentor starts".

For starts prior to January 2015, a **business start** is recorded when the claimant begins claiming the weekly allowance. For starts since January 2015, a **business start** is recorded when the claimant starts trading. Therefore a claimant who starts trading but does not claim the allowance will now be counted in the statistics since January 2015.

# NEA delivery

## The delivery model for NEA changed in January 2015

New Enterprise Allowance is delivered by private providers on behalf of the Secretary of State for Work and Pensions. Providers compete via competitive tender, and contracts are awarded regionally. DWP assesses these contracts in order to ensure value for public funds is met.

### Role of the Provider

Jobcentre Plus will inform those eligible about the NEA Mentoring Scheme

The JCP Adviser will make a referral which will create a referral in the Provider referrals and payment (PRaP) System. The provider then can accept or reject the referral

Providers conduct an initial assessment within 10 days of referral date in order to assess if participant has a viable business plan with a reasonable chance of success. Providers notify Job Centre Plus via the PRaP system within 2 days of the outcome.

Providers assign a business mentor which assists the participant to develop a business plan. For the participant with actively seeking work in their conditionality, this is replaced with participants must make full commitment to the NEA mentoring scheme.

Participants submit business plans for consideration; if approved participants proceed to trading. Participants are no longer eligible for out of work benefits. In order to support the participants, the business mentor continues to support the participant for the first 6 months and is entitled to a New Enterprise Allowance which is administered by Job Centre Plus. A New Enterprise Allowance weekly allowance of £65 is paid for the first 13 weeks of trading followed by a weekly allowance of £33 for the remaining 13. Providers must also ensure participants are informed of start-up loans provided by the Department for Business, Innovation and Skills in order to access additional start-up capital.

## About these statistics

These official statistics have been compiled using data from the Labour Market System (LMS) and Provider Referral and Payment System (PRaP).
