Dear All

For information.

Our corporate response to the second draft of the Energy Climate Change Risk Assessment which I have just passed to DEFRA.

Dear All

Thanks for your contributions. I have compiled a response (attached). If colleagues have anything to add, could I have your comments by COP today.

Thanks

**Subject:** FW: Climate Change Risk Assessment - Policy Review 2011: Sector Reports v2

Colleagues – please note the deadline and access password to the energy and other reports (attached email) . You will recall that we sent our views before Christmas and arranged the comments by policy lead in DECC. I you need a reminded of what you said, I have also attached the XL spreadsheet.

I will go through this report, but could colleagues have a quick check and let me know if you are content with the changes you requested by **18<sup>th</sup> February**.

I will then get back to DEFRA with our corporate response.

Many thanks,

Dear NAME REDACTED

Hope all is well with you. As promised, I am sending you information on how to access the revised version of the Sector Reports. Apologies I did not send you the information yesterday – we were still waiting for one piece of information from HRW.

See below information on how to access the report and how we would like you to send through your comments to us. I will send you an email shortly with the passwords for the reports and comments log.

The deadline is **18<sup>th</sup> February** – do let me know if this will cause a problem. I'll give you a ring early next week to just check how you are getting on – but do give me a ring any time if you have any questions or if I can help with anything.

Thanks

## **Background**

As you will know, over the next few months we will be receiving several key evidence outputs on the CCRA from the contractors (HR Wallingford).

These outputs will be coming to you for policy review and this email marks the start of that process for 2011.

The first reports for review are second drafts of the Tier 2 Sector Analysis Reports. You kindly provided us comments on the first drafts of these reports in December last year and the contractors have been working to incorporate the 1500 policy comments and 600 academic peer review comments we received. Thank you once again for the significant effort you went to in looking through these reports and for your comments.

We are uploading 9 of the 11 reports today, as before, on the web site (<http://workshop39.dialoguebydesign.com/doct/sectorreview.asp>) for your comments. The final 2 (Biodiversity and Agriculture) will become available shortly and we will extend the deadlines for review accordingly.

## **Changes to the Reports from first to second drafts**

Please see attached a paper briefly outlining general changes to the reports and a short narrative on specific changes to the individual reports.

Also attached is a table which summarises comments received specifically relating to 'gaps' identified in the analysis in the previous versions of the Reports. The table provides a brief summary of the comments and a narrative on how these have been addressed (including comments from ACC and subsequently HRW). In some cases the additional work identified is not being taken forward – either because of budgetary or time constraints, the work being out of the scope of the analysis or lack of data. We have tried as much as possible to cover all the points raised and to take forward further analysis but do come back to me if you would like to discuss any specific points you raised which you feel have not been adequately addressed.

## **What we need from you**

### Comments Logs

Along with the reports, the website contains the comments logs in which comments from all OGDs, DA and scientific reviewers have been recorded. There is an OGD/DA comments logs for each report and a separate academic peer review log.

- Alongside each comment is a response from the Adapting to Climate Change programme in Defra coloured red, yellow and green (and a few in lilac) and a response from the contractor.

1. Red comments are those that Defra does not think should be taken forward by the contractor and a reason will be given.
2. Yellow are those that may be addressed and more detail will be given in the comment.
3. Green are those that we have agreed should be addressed by the contractor.
4. Lilac are those that we did not understand and we will have chased the comment maker for clarification.

#### *Your feedback/comments*

**Please provide your feedback on the comments log by downloading the relevant logs and making additional comments in a separate column alongside previous comments (please include your name and Department alongside your comments).**

**If you have any additional comments on the report(s) please provide these in a new rows at the end of the log (again please include your name and Department alongside your comments).**

As with the first drafts, we would appreciate it if you co-ordinate the comments for your Department and send us back **one set of updated comments logs (one per sector that you comment on) to [ccra@defra.gsi.gov.uk](mailto:ccra@defra.gsi.gov.uk).**

**The date that we would appreciate your comments back on the second drafts is 18<sup>th</sup> February.**

We want to make sure all comments have been addressed and we will instruct HRW to draft final draft versions of the sector reports based on this second round of review.

#### *How to access the reports*

The second draft Sector analysis reports are available to download from this website link: <http://workshop39.dialoguebydesign.com/doct/sectorreview.asp>

As before they will only be available for 2 weeks for you to download.
