

When
WINTER
bites...

Check the latest traffic and weather

It's easy to check the latest weather and traffic situation. Then perhaps you could leave earlier, leave later or change your route or your plans.

Journey around the bad weather – not through it

Road and weather conditions may change, drive with care

When you're on the road, pay attention to the changing road, traffic and weather conditions. Be ready to slow down and take more care if you need to, particularly on bends and exposed roads. Don't be lulled into a false sense of security - even if you drive every day on the same stretch of road.

Updates on the move

There are still lots of ways to get Highways Agency live traffic information.

On overhead message signs – motorway control centres will flash up important travel messages, including warning you of delays and advising of alternative routes.

When you take a break

On long journeys, you should take a break at regular intervals - and that's an ideal time to check the traffic conditions on the road ahead.

While you are safely parked, check the latest information via your smartphone, tablet or laptop. **Never stop on the hard shoulder to do this and never use your mobile phone while driving.**

Listen to the radio

“ Don't forget to check the forecast for your return journey as well ”
