Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation of an environmental permit.

This variation notice introduces changes to the permit that arise from an application by LLW Repository Ltd in October 2013 to dispose of further waste at the Low Level Waste Repository near Drigg in Cumbria. It also updates the permit to standard template format for Environmental Permitting Regulations permits. All conditions of the previous permit have been varied. Important changes are described in a Decision Document and include:

- Permission to dispose of further radioactive waste beyond Vault 8 in accordance with the conditions of the permit and the environmental safety case and waste acceptance criteria for the Low Level Waste Repository
- Removal of annual radiological limits on disposals by burial, but instead to limit disposals against a lifetime capacity for the site
- To remove a number of other specific restrictions in the current environmental permit
- To include a number of information and improvement requirements and a pre-operational measure for future development

A consolidated permit will be issued for clarity as all conditions have changed, resulting from the change to Environmental Permitting Regulations format.

The Schedules specify the changes made to the permit. A varied and consolidated environmental permit, reflecting the changes made to the permit, has been issued.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
