**MRRS 3801: GAMA Healthcare Limited – Clinell Alcoholic 2% Chlorhexidine Wipes**

16/01/2014

**Recommendation 1:** Basic research and development, validation and recent in use evaluations have shown benefits that should be available to NHS bodies to include as appropriate in their cleaning, hygiene or infection control protocols.

**Use:** This is a 2% chlorhexidine gluconate in 70% isopropanol wipe specifically designed for use on the connection hubs and access ports of long-term vascular access devices
