Energy for Growth - Government's new approach to buying energy

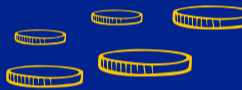

Government buys over **£1.6bn** of energy every year

That's enough **electricity** to power over **3 million households**, and enough **gas** to supply almost **1 million households** for a year

The first Energy for Growth project will supply **2%** of the government's annual energy demand for **20 years**, worth **£25m** every year

The contract will allow us to buy electricity at a fixed price for **20 years**

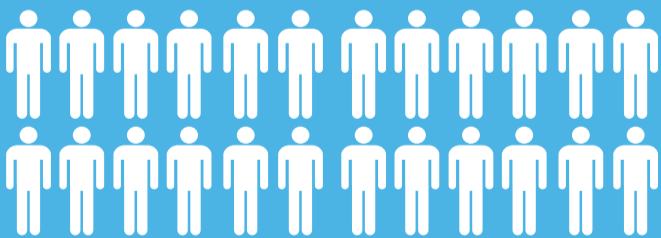

THIS IS PROJECTED TO SAVE

£97m

(based on current market forecasts)

100% of this energy will be generated in the UK

A **£320m** investment will build a dedicated 'energy from waste' generator in Teesside, supporting **750 jobs**

As the largest and most reliable purchaser of energy, we are generating savings for taxpayers and growth in UK jobs.
