Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the surrender in part of an environmental permit.

Following plant upgrades there has been a review of the use of diesel at the facility. This identified that diesel storage tanks are no longer considered to be a Directly Associated Activity (DAA) to the main permitted activity on site. Therefore this low-risk partial surrender is to remove the fuel storage tanks as a DAA and surrender the associated part of land on which the storage tanks are situated. Schedule 4 of this notice shows the revised installation boundary.

The rest of the permit remains unchanged.

Any changes made as a result of the part surrender are set out in the schedules.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
