Thank you for your response of 22nd April 2014 re our community wind cluster at Hill of Lychrobbie.

Please forward a copy of the ADATS Level 3 assessment of the Lychrobbie turbines so that we can assess your conclusion re lack of shielding.

We also require copies of the other Level 3 assessments for the projects in the vicinity of Lychrobbie (i.e. Upper Smerral (at 84m), Lower Rumster, Upper Clyth, Burn of Whilk) to check consistency with your assessment of Lychrobbie.

Further, we also require a copy of the HQ Air Command operational assessment for Burn of Whilk. I believe Burn of Whilk is currently under construction but if it is in fact operational, is the experience of the radar operators that it is now operationally acceptable?

Once we have reviewed this information we may need to visit RAF Lossiemouth to discuss operational matters with ATC staff there. I'm sure you wouldn't object to this direct approach, given how useful it would be and the fact that Defence Estates does not have the manpower to undertake such visits itself.

It may also be relevant that the Newlands of Houstry project (which replaced the refused Upper Smerral project) has now itself been refused.

Regards
