Commentary

The trained regular strength (including FTRS regular personnel) of the RN/RM service continues in surplus against the liability at 1 July 2014. This surplus of 80 (0.3%) is slightly lower than last quarter, April 2014 (surplus 160, 0.5%).

Trained regular strength have increased by 80 (0.3%) since 1 June 2014, largely due to an increase in Able Ratings (+60 paid rank). This is the first increase in trained regular strength since January 2014, although is an overall decrease of 740 (2.4%) since July 2013.

The trained regular RN outflows to civil life have decreased from the 12 month period ending 31 March 2014 to the 12 month period ending 30 June 2014 despite increases in Voluntary Outflow. This is largely driven by a decrease in Time Expiry across most branches.

The largest branch increase in Voluntary Outflow rates between the 12 months to 31 March 2014 and the 12 months to 30 June 2014 was Engineering FAA (ratings) from 4.0% to 5.1%. The largest decrease in the same period was Medical (ratings) from 5.4% to 3.9%.

The proportion of females are the same for both officers and ratings in trained regular RN strength and remains the same as last quarter, April 2014 (11.4%).

1. RN/RM Service Strength Against Liability at 1 July 2014
