## **Schedule Reasons for Refusal**

The Application is refused on the grounds that the proposed measures to reduce fugitive emissions of PM10 and PM2.5 are deemed not satisfactory for a site in an AQMA (Air Quality Management Area).

This is in accordance with paragraph 7.7 of the Environmental Permitting Guidance core guidance for the Environmental Permitting (England and Wales) Regulations 2010 (last revised March 2013) (the Core Guidance) which states “The regulator may also decide to refuse an application in certain circumstances.” where “the environmental impact would be unacceptable. For instance, an operator might propose siting a new facility close to an extremely sensitive environment, but with no means of providing adequate control”
