26/09/2016	M6 J19	<p><b>PAVEMENT SURFACE</b>  This email is notify of the following at M6 J19:  1. Road pavement breakup, such that significant depressions are developing on the roundabout between the lanes at the top of the J-slip and the west bound exit of the A556. These are now significant enough to de-stabilise a motorcycle when traversing the lanes exiting the roundabout to the A556.  Approx. location can be seen from the following link:  <a href="http://gridreferencefinder.com/?gr=SJ7232879393 Point_s_B 0&amp;t=Point%20B&amp;v=h">http://gridreferencefinder.com/?gr=SJ7232879393 Point_s_B 0&amp;t=Point%20B&amp;v=h</a>  2. It should also be noted that the lane demarcation paint is now so worn at entrance to the K slip it cannot be seen in the subdued light and is causing issues with lane discipline:  <a href="http://gridreferencefinder.com/?gr=SJ7219579468 Point_s_C 0&amp;t=Point%20C&amp;v=h">http://gridreferencefinder.com/?gr=SJ7219579468 Point_s_C 0&amp;t=Point%20C&amp;v=h</a>  I think it will not be long before these defects lead to a road traffic collision as the hours of daylight reduce..</p>
25/11/2016	M6	<p><b>SURFACE WEARING</b>  Caller advises that the surface of lane 1 on the M6 approaching J18 off slip southbound is deteriorating quite badly. Not logged with RCC as caller advises it is happening over time.  Can you investigate please.</p>
19/01/2017	M6	<p><b>POTHOLE/ CARRIAGEWAY DEFECT</b>  Dear Sir / Madam,  Who is responsible for the road condition of the M6 northbound between J17 and J19?  I use the motorway most weeks and between J17-19 the road surface in lane 1 and 2 has deteriorated to what I believe is now a dangerous condition. Pot holes have opened up, some big and some very deep. I damaged my wheel/tyre last week and I have a big car, my worry is they would throw a biker off the bike - EASILY if the biker was travelling at night and didn't see the holes.  I feel it is now dangerous and I will vocal about this message of alerting you if there are any accidents.  Please can you ensure the person / team / organisation responsible receives this message?</p>
07/02/2017	M6 J19	<p>Caller is contacting CCC to make a complaint in regards to the traffic lights at the Tabley Interchange. The caller states that the previous day these traffic light where not working correctly which caused large tailbacks of traffic and have caused her to be late for work. The same issue has occurred today.</p>

		<p>The caller would like to know why this is not monitored and why the phasing/traffic light issue has not been fixed.</p> <p>The caller states that this is not acceptable and she would like to know when the issue will be rectified. The caller has requested a response to her complaint please.</p>
07/02/2017	M6 J19	<p>J19, M6 travels every day</p> <p>Roundabout is an absolute nightmare, traffic lights controlling the flow and because of the amount of traffic involved, it's an absolute nightmare every morning and evening.</p> <p>Traffic lights seem to be out of sequence with the flow of traffic resulting in huge build ups</p> <p>This morning the queue from the roundabout from Hale was about a mile from the roundabout and in the opposite direction looking at the same length of queue</p> <p>Also the same situation at the other end of the day</p> <p>Customer understands the implications of having manpower on site to ensure drivers adhere but feels current situation can't continue.</p> <p>Customer travels 16 miles and this morning journey took one hour and ten minutes</p> <p>Because of the roadworks that are on the M6 anyway and other roadworks within the area which are creating issues every morning/evening.</p>
