# Statistical notice – Ministry of Justice statistics policies

The Ministry of Justice today announces how you can get involved in informing us of your requirements from Ministry of Justice Statistics, as well as setting out other key policies and procedures required under the Code of Practice for Official Statistics.

Today, we published the following key statistical policy documents; which sit alongside the already published Revisions Policy and statement of Compliance with Pre-Release Access.

## **Customer Service Statement, Engagement Strategy and Complaints procedure**

This document sets out our customer service statements; shows how you can follow the latest statistical announcements be it from the MoJ website; through Twitter or by email.

It also sets out how we will consult with customers on developments to statistics and how users can get involved by telling us of their requirements in our annual consultation on our work plan and also announcing an independently-chaired advisory panel to oversee the process.

## **Statistical Quality – policies and procedures**

This sets our commitments to statistical quality and how users can assess the quality of our products.

## **Statement of Administrative Sources**

This document sets out the key business processes and IT systems in the Department which feed our statistical products, so users can see for themselves how the business of the department feeds into our Statistics. This is an initial statement covering the systems feeding our main statistical publications. The statement will be renewed and updated every 6 months to ensure its relevance and accuracy.
