File Ref From Date	To Date	Part	Status	Description	Review Comments	IO Comments
NP 330/205/01 1/01/1979	31/12/1981		?Keep ✓K	Antarctic mineral resources: consideration of an international regime	An important subject. Mainly copies with FCO in the lead but some original material. Very inconclusive, with no indication of the files where action continued. There will probably be better versions of this story but K? as long stop. I have expanded the title	④
NP 500/204/05 01/1/1980	31/12/1980	B	Keep	Depletion policy: briefing and other material	Lots of copies but some significant original material on an important subject. Includes submissions to SoS.	
NP 500/204/05 01/1980	31/12/1980	C	?Keep ✓K	Depletion policy: briefing and other material	Lots more copies and less original material; all of a more routine nature than Pt B. Briefing for high level meetings rather than development of policy. A marginal case for retention	①

Ref conf #	To Date	Part	Status	Description	Review Comments	IO Comments
<del>ENP 500/403/03</del> <del>01/01/1979</del>	31/12/1980		<del>? Destroy</del> D	Iran: security of oil supplies	Interesting for AWTB's rejection of officials' original proposals for increased petrol taxation to reduce consumption (Mar 79). But CIP in overall lead and their files should provide a better record.	(D)
501/10 A <del>ENP 501/001</del> <del>01/01/1980</del>	31/12/1981	A	Keep	The 1981 budget: input from Department of Energy on energy pricing	The main file with significant original input and development of policy	
<del>ENP 501/001</del> <del>01/01/1980</del>	31/12/1980	C	<del>? Keep</del> K	Energy prices and the budget	Nothing vital, but includes, eg interesting, original exchange with the Chancellor at final doc	(M)
<del>ENP 501/001</del> <del>01/01/1980</del>	31/12/1981	H	Keep	Energy prices (general) and the budget	Plenty of meaty material and Ministerial input to policy, some of it original, including original letter of 29/12/80 from Geoffrey Howe as C of E.	
<del>ENP 501/002</del> <del>Undated</del>	Undated	B	<del>? Destroy</del> D	Proposals for changes in the tax laws: Petroleum Revenue Tax (PRT)	The subject matter certainly merits retention, but PP Div's files in the PET series should provide a better record: there is little original material on this file	(D)

Part	To Date	Status	Description	Review Comments	IO Comments
ENP 501/009	01/01/1980	Keep	Energy prices: Chemical Industries Association; proposals for concessions	Pressure for recognition of impact of prices on energy intensive industries: received sympathetically. The main file with original material	
ENP 505/501/02	31/12/1983	Destroy	Vehicle excise duty	Proposals for replacement by higher tax on petrol etc. DTp and Treasury in the lead and it seems that earlier parts D. Quite interesting, but better versions in files of other depts, which will include D/En input on energy implications.	(D)

File Ref	From Date	To Date	Part	Status	Description	Review Comments	IO Comments
ENP 512/205/08	01/01/1980	31/12/1981	A	Keep	Financial aid to objectors at public inquiries into proposed development of nuclear and other facilities	I have expanded the title as the file title is far too vague. This is the main D/En file with substantial original input raising constitutional and other issues. Interesting with substantial implications. Pt B not seen but Pt A well worth K	
ENP 512/206/11	01/01/1980	31/12/1981	G	Keep	Official Committee on Environmental Protection: working group consideration of lead in petrol	The main D/En file with original material recording D/En's reargurd action fighting proposals for lead free petrol	

12

File Ref From Date	To Date	Part	Status	Description	Review Comments	IO Comments
ENP 600/403/03 01/01/1980	31/12/1980	B	Keep	Oil substitution in industry: 1980 review	Original input on an important subject.	
ENP 600/403/03 01/01/1980	31/12/1981	C	Keep	Oil substitution in industry: 1980 review	Really meaty, original material, with this the lead file.	
ENP 600/403/03 01/01/1980	31/12/1981	D	Keep	Oil substitution in industry: 1980 review	Continues a very interesting story. Pt E still to be reviewed.	
ENP 600/509/01 01/01/1980	31/12/1982	B	Keep	Energy conservation: industrial support measures	Some overlap with ENP 600/403/03, but wider ranging. Complementary, with greater insight into Ministerial thinking - at least without having seen later parts of other file. Treasury being difficult! Worth K
