PREFIX ENP CLASS NUMBER EG 20

Please second review the above series for the following years

YEAR 2004 NUMBER 92 files – 23 boxes
YEAR 2005 NUMBER 84 files - 21 boxes

This is the first review of the series
First Last Neither ✓

Name of Directorate and any other comment
Energy conservation and stocks

Please remember to count the files while you are taking them out of the boxes and record the amount of files on the 2nd review register

Please check whether there are previous reviews of this series on Druid.
If there are, contact Robin Payne before you start the review

2nd review of ENP Series (EG20): 2004-2005

This 2nd review was conducted with only K, K? and D? files entered on DRUID. All file numbers were recorded but definite Ds were destroyed without the need for them to be considered by TNA. The following comments summarise in general terms the content of all files assessed as D. Files/issues identified below are illustrative rather than comprehensive.

Briefing and other files – eg NEDC – with no original material, all D. Ditto district and structure plans circulated by local authorities for comment.

File dealing with public ownership of nationalised industries D as this energy file had no significant original material

Later parts of files on energy forecasts D as limited original material and earlier parts already D

Files on H&S, environmental issues, etc all D as limited original input with others in the lead.
