

15th December 2017

[Address of Hospital]

Product name: Fludara 10mg film-coated tablets PL 12375/0040 (MRP) pack sizes 15's and 20's

Dear Pharmacist,

Summary

- You may receive a batch (70785A) of Fludara 10mg film-coated tablets containing Polish language blisters

Background

A supply problem means that the UK is being supplied with Fludara 10mg film-coated tablets that were originally intended for the Polish market. With the exception of the Polish blister packs, the product is the same as previously supplied to the UK market. The UK Carton and Patient information leaflet are used and an additional insert to the pack will explain the difference to the patient.

The MHRA have reviewed this exceptional packaging case and have approved it for the above batch. These supply conditions are expected to resolve in approximately 6 months.

If you would like any further information regarding the above please contact:

SANOFI Medical Information, One Onslow Street, Guildford, Surrey, GU1 4YS, UK

Tel: +44 (0) 845 372 7101
