

Dear Secretary of State,

I assume that you have seen the article below from the Guardian, suggesting that EDF had been lobbying hard for public subsidies in order to make new nuclear power stations economically attractive (to EDF). I hope that you will stick to your position of no public subsidies for nuclear power generation, and will reverse the concessions that EDF extracted from the Labour government.

I would be grateful if my email could be considered as part of the response to the consultation process.

Yours faithfully

Brian Jones
