

INFORMATION NOTE

The use of corrugated stainless steel semi-rigid gas piping in domestic and non-domestic installations

Number: IN 04/11

Strategy & Policy Directorate Sponsor:
Robin Cawthorne

Date of issue: 2 March 2011

Contact if different from above Sponsor: Mark Spooner, DE Ops North-PTS9d,
mark.spooner@de.mod.uk (9) 205238 5835 / 01638 545835

Who Should Read this: CEstOs, Top Level Budget Holders, MOD Project Managers, SETLs & SEATs, Organisations appointing Authorising Engineers (AE) including: Commanding Officers/Heads of Establishment, Defence Estates (DE) Deputy Heads (Estates), DHE, DTE, DE Intl, DE Advisors and Maintenance Management Organisations.

When it takes effect: Immediately

When it is due to expire:
3 March 2012

Health, Safety & Environment

1. Document aim. To raise awareness of the Gas Safe Technical Bulletin No.120 (TB120), concerning the use of corrugated stainless steel semi-rigid gas piping (CSST) in domestic and non-domestic installations.
2. Background. TB120 provides guidance as to the use of CSST in domestic and non-domestic installations. It also clarifies Gas Safe's position in relation to the use of CSST in unventilated ducts or voids and in protected shafts containing a stair and/or lift shaft, or other means of escape.
3. Action required. Any individual involved in the design, specification or installation of this type of gas pipe is to read, understand and comply with Gas Safe's TB120.
4. References. A pdf copy of Gas Safe's TB120 is attached to this Information Note.
