

North West Region - Existing adopted Local Plans and saved policies

Introduction

In the North West there are 40 local authorities with adopted local plans. Development plan documents which were adopted shortly before the date of publication of the Regional Spatial Strategy in September 2008 will have been prepared in parallel with preparation of the Regional Strategy, and so are likely to have anticipated and may have reflected its policies. For the purposes of preparing this Environmental Report it has been assumed that only development plan documents adopted after September 2008 or afterwards are in general conformity. On this basis 16 local authorities have core strategies in place which are in general conformity with both the requirements of the 2004 Planning and Compulsory Purchase Act and the policies set out within the North West of England Plan. The other 24 authorities in the region have local plans at different stages of development, with adopted plans put in place before the North West of England Plan was adopted in September 2008 and therefore not necessarily in general conformity with the regional policies.

There are 23 mineral and waste authorities. Some are working together to prepare minerals and waste policies under a single plan or core strategy, others are working individually and have separate minerals and waste policies, whilst others include minerals and waste policies as part of their wider Core Strategy. Of the 22 (in total) plans covering minerals and waste policies, 6 are in general conformity with the policies set out within the North West of England Plan since they were adopted in or after September 2008 and 16 which were adopted well before September 2008 and therefore not necessarily in general conformity with the regional plan.

These Plans would form part of the Development Plan in the absence of the Revoked Regional Strategy.

Table 1 shows a summary of the housing, gypsy & traveller pitches and plots for travelling showpeople, renewables, and employment policies/targets within the North West Plan and in adopted local authority plans and core strategies.

Table 2 presents a summary of the Mineral and Waste policies/targets within the North West Plan and those in mineral and waste plans.

	Planning Authority	Current status ¹	Other relevant policies	North West Plan Provision/Targets ²	Local authority adopted Plan Provision/Targets
1	Allerdale (West Cumbria and Furness)	Local Plan (adopted 1999) Saved Policies		HOUSING PROVISION	No current Local Plan provision for new housing
				Local Authorities should monitor and manage the availability of land identified in plans and strategies and through development control decisions on proposals and schemes, to achieve the housing provision (net of clearance replacement) set out in the plan period of 2003-21 as outlined in the RSS. For the North West Region total Housing provision = 416,000, with an Annual Average of 23,111 For Allerdale total Housing provision = 4,800, with an Annual Average = 267	
				GYPSY & TRAVELLER & SHOWPEOPLE PITCHES	Policy within Local Plan but no specific numbers of pitches available.
				There is a requirement to assess the housing needs of gypsies and travellers in the Region. In this respect, the Regional Planning Body, in partnership with the Regional Housing Board has undertaken research on the future requirements of gypsies and travellers. This will inform a future review of both RSS and the Regional Housing Strategy.	

¹ Including where saved policies from earlier local plans remain in place, pending approval of the core strategy

² Housing Provision - Minimum dwelling provision 2001 to 2021 (less already built to Mar 06) = still to be built

				RENEWABLES	
				<p>Opportunities should be sought to identify proposals and schemes for renewable energy. In line with the North West Sustainable Energy Strategy, by 2010 at least 10% (rising to at least 15% by 2015 and at least 20% by 2020) of the electricity which is supplied within the Region should be provided from renewable energy sources. To achieve this new renewable energy capacity should be developed which will contribute towards the delivery of the indicative capacity targets set out in the RSS. In accordance with PPS22, meeting these targets is not a reason to refuse otherwise acceptable development proposals.</p> <p>Cumbria target 2010 = 44-49 schemes (237.3 MW) 2015 = 52-58 schemes (284.8 MW) 2020 = 51-57 schemes (292.4 MW)</p>	Policy in Local Plan to support renewable energy developments but no reference to renewable energy targets.
				EMPLOYMENT	
				Plans and strategies should promote opportunities for economic development (including the provision of appropriate sites and premises, infrastructure, and clustering where appropriate) which will strengthen the economy of the North West.	Supportive policies but no reference to current employment land figures available in Local Plan
