

Statistical Release

17 November 2011

LOCAL AUTHORITY REVENUE EXPENDITURE AND FINANCING

ENGLAND 2010-11 FINAL OUTTURN

- Total net current expenditure by local authorities in England was estimated to be £121.3 billion in 2010-11 compared with £119.2 billion in 2009-10, an increase of 1.8%.
- In real terms (using 2010-11 market prices), net current expenditure has decreased from £122.5 billion in 2009-10 to £121.3 billion in 2010-11. This is a decrease of 0.9%.
- 37.4% of net current expenditure in 2010-11 was on education, 17.4% on social care, 15.3% on housing benefits and 9.9% on police.
- 55.3% of revenue expenditure (on a non-International Accounting Standard 19 basis) in 2010-11 was funded by government grants, 25.2% by council tax and 20.6% by redistributed non-domestic rates.

This release provides final outturn estimates of local authority revenue expenditure and financing for the financial year April 2010 to March 2011. These estimates are on a non-International Accounting Standard 19 (IAS19) and PFI "Off Balance Sheet" basis except where stated otherwise.

Headline figures for previous year (2009-10) were published on a non-FRS17 and PFI "off-Balance" sheet basis.

This information is derived from Department for Communities and Local Government Revenue Outturn (RO) returns submitted by local authorities in England. This release is based on returns from all 444 local authorities in England that complete the return.

The release has been compiled by the Local Government Finance - Data Collection Analysis and Accountancy division of Communities and Local Government. For additional uses please see "uses made of the data" section.

Net current expenditure by service

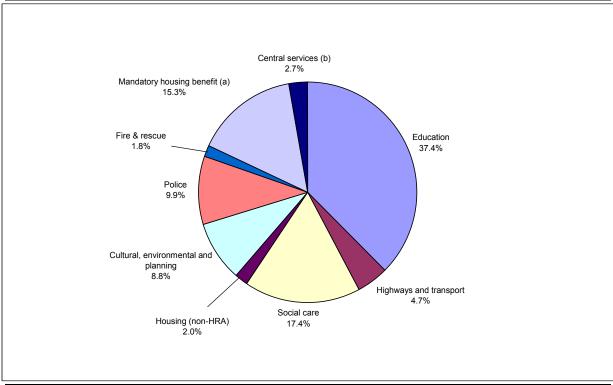

- 1. Net current expenditure in 2010-11 is summarised in Table 1 and Chart A. Table 1 also shows net current expenditure in 2009-10 and the percentage change to 2010-11. Service expenditure is based on information from the RS forms, which can be found in Annex A. The service breakdowns have been created from this detailed information, according to Annex C of this release. It should be noted that year on year comparisons may not be valid due to local government changes in function and responsibility.
 - Total net current expenditure by local authorities in England was estimated to be £121.3 billion in 2010-11 compared with £119.2 billion in 2009-10, an increase of 1.8%.
 - In real terms (using 2010-11 market prices), net current expenditure has decreased from £122.5 billion in 2009-10 to £121.3 billion in 2010-11. This is a decrease of 0.9%.
 - Of the core public services, Highways and Transport net current expenditure
 has seen the highest decrease in net current expenditure of 13.3%. This is
 partly owing to the movement of Revenue Expenditure funded from Capital by
 Statute (RECS) from net current expenditure (in 2009-10) to capital charges (in
 2010-11).
 - Mandatory housing benefits had the largest percentage increase of 7.2%; from £17.3 billion in 2009-10 to £18.6 billion in 2010-11.
 - 37.4% of net current expenditure in 2010-11 was on education, 17.4% on social care, 15.3% on housing benefits and 9.9% on police.

Table 1: Net current expenditure by se			0 '11'
			£ million
	Net current	Net current	
	expenditure	expenditure	%
	2009-10 ^(b)	2010-11	Change
	(R)		•
Education	44,471	45,365	2.0
Highways and transport	6,541	5,669	-13.3
Social care of which:	20,963	21,062	0.5
Children's Social Care	6,396	6,654	4.0
Adult Social Care	14,567	14,408	-1.1
Housing (excluding Housing Revenue Account)	2,715	2,484	-8.5
Cultural, environmental and planning of which:	11,083	10,678	-3.7
Cultural	3,465	3,278	-5.4
Environmental	5,308	5,202	-2.0
Planning and development	2,310	2,198	-4.9
Police	12,022	11,948	-0.6
Fire and rescue	2,177	2,165	-0.6
Central services	3,771	3,573	-5.3
Other services ⁽²⁾	9	-262	
Mandatory Housing Benefits of which:	17,308	18,550	7.2
Rent allowances	12,807	14,127	10.3
Rent rebates to non-HRA tenants	582	470	-19.2
Rent rebates to HRA tenants	3,919	3,953	0.9
Appropriations to (+) / from (-) accumulated absences accounts	_	64	
Reversal of revenue expenditure funded from capital by statute (RECS)	-1,883	-	
Total net current expenditure	119,176	121,296	1.8

⁽¹⁾ Net current expenditure estimates for 2009-10 are not fully comparable to 2010-11 figures owing to revenue expenditure funded from capital by statute (RECS) distributed across all services. Furthermore 2010-11 net current expenditure figures include liabilities for short term accumulated compensated absences (e.g. untaken annual leave entitlement), distributed across all the services, which makes comparisons against previous years not fully comparable. However total net current expenditure has been adjusted for both 2009-10 and 2010-11 so that they can be compared.

⁽²⁾ The 2009-10 & 2010-11 'other services' line now includes capital charges for internal and external trading services, therefore total net current expenditure has been adjusted, for both years, to account for this.

- (a) Housing benefit includes mandatory rent allowances and mandatory rent rebates
- (b) Central services includes courts and other services

Revenue expenditure and financing

- 2. **Table 2** shows the link between the definitions of net current and revenue expenditure and how revenue expenditure was financed in 2010-11 compared to 2009-10. A more detailed breakdown of this information can be found in **Annex A**.
 - Revenue expenditure on a non-IAS19 basis was £104.3 billion in 2010-11, compared with £103.3 billion in 2009-10, an increase of 1.0%.
 - Non-current expenditure in 2010-11 includes the payment of council tax benefit of £4.1 billion, but this is netted off by income from specific grants outside Aggregate External Finance (AEF).
 - Specific grants outside AEF increased from £25.0 billion in 2009-10 to £27.2 billion in 2010-11, an increase of 9.0%.
 - Interest Receipts have fallen from £780 million in 2009-10 to £663 million in 2010-11, a decrease of 15.0%.

⁽¹⁾ Includes provision for repayment of principal, leasing payments, external interest payments and HRA item 8 interest payments and receipts
(2) Adjustments permitted by regulation to the revenue account charges for financial instruments.

⁽³⁾ The deferral of revenue account charges for unequal pay back pay as permitted by regulation and the reversal of the deferral in the year that payment of the back pay is due.

⁽⁴⁾ Aggregate External Finance; see Background Notes for definition

⁽⁵⁾ Inter-authority transfers in respect of reorganisation

Expenditure from 2006-07 to 2010-11

1. **Table 3** gives a summary of net current expenditure by service between 2006-07 and 2010-11. It should be noted that year on year comparisons may not be valid due to local government changes in function and responsibility.

Table 3: Net current expenditure (1) by service 2006-07 to 2	010-11				
					£ million
	2006-07	2007-08	2008-09 (R)	2009-10 ⁽²⁾ (R)	2010-11

Other services (5)	-24	19	47	9	-262
Reversal of revenue expenditure funded from capital by statute (RECS)				-1,883	
Appropriations to (+) / from (-) accumulated absences accounts					64
Total Net current expenditure	101,730	107,119	113,058	119,176	121,296

⁽¹⁾ Net current Expenditure for 2006-07 to 2009-10 is on a non-FRS17 and PFI "off-balance sheet" basis. For 2010-11, net current expenditure is on a non-IAS19 and PFI "off-balance sheet" basis.

⁽²⁾ The 2009-10 net currrent expenditure figures across all services include an additional element of spending: RECS, which for other years is included only in capital charges and therefore excluded from net current expenditure. However, for 2009-10 the total amount of RECS has been reserved out; therefore the total net current expenditure figure is comparable with other financial years.

⁽³⁾ Includes mandatory rent allowances and mandatory rent rebates to non-HRA tenants and mandatory rent rebates to HRA tenants

⁽⁴⁾ Central services includes court services expenditure, which was previously included as a separate service prior to 2009-10

⁽⁵⁾ Other services includes other levies, internal and external trading services gross surplus/deficit and adjustments to net current expenditure

Income from specific grants

- 3. **Table 4** shows the top five incomes from the specific grants inside and outside Aggregate External Finance. Details on all income from specific grants can be found in **Annex A3**.
 - In 2010-11, Dedicated Schools Grant (DSG), which is ring-fenced, was estimated to account for 66.4% of the income received by local authorities through specific grants inside AEF.
 - In 2010-11, DSG was estimated to account for 38.4% of the total income received by local authorities through central government grants (which include redistributed non-domestic rates, although not including specific grants outside AEF). In 2009-10, DSG accounted for 38.4% of the income received by central government grants.

		£ million
Grants inside Aggregate External Finance	Line Reference

Financing of revenue expenditure

- 4. **Table 5** shows the financing of revenue expenditure by its various components, which include government grants, redistributed non-domestic rates and council tax requirement across different local authority classifications, for 2010-11.
- 5. Table 6 shows the funding of revenue expenditure in terms of government grants, redistributed non-domestic rates and council taxes from 2006-07 onwards. Figures for 2006-07 to 2009-10 are produced on a non-FRS17 and 2010-11 figures are produced on a non-IAS19 basis. This is because local authorities set their council tax with regard to their expenditure on a non-FRS17 basis. A fuller definition of FRS17 & IAS19 can be found in the Terminology used in this release section.
- 6. **Chart B** shows the real changes in Government Grants, Council Tax, Revenue Expenditure and non-school reserves (unallocated & other earmarked financial reserves as at the start of the year, 1 April) from 2000-01 to 2010-11. The indexes are calculated from financial figures on a non-FRS17/non-IAS19 accounting basis, for year-on-year comparisons.
 - In 2010-11, 55.3% of revenue expenditure on a non-IAS19 basis was funded by government grants (including Revenue Support Grant, specific grants inside Aggregate External Finance and police grant), 25.2% by council tax and 20.6% by redistributed non-domestic rates.
 - If excluding "Other Authorities";
 - Greater London Authority (GLA), proportionally, requires the lowest amount of council tax to finance their revenue expenditure, at 12.7%.
 - o GLA has the highest percentage of revenue expenditure which is being financed by central government grants, at 71.2%. The second highest class of authorities being shire counties, at 58.3%.
 - Over the last decade (from 2000-01 to 2010-11) in real terms;
 - o Revenue expenditure has risen by 42.9%
 - Government grants awarded to local authorities has risen by 44.1%
 - Council Tax has risen by 45.1%

Council Tax has increased in the same pattern as revenue expenditure and government grants.

In real terms, non-school reserves have increased by 79.9% from 1st April 2000 to 1st April 2010.

⁽a) Other items and use of reserves have not been included, although they part finance revenue expenditure. Therefore percentages would not add to 100% because of these missing elements

⁽b) Central Government Grants includes Local Services Support Grant, Specific Grants inside Aggregate External Finance, Revenue Support Grant, Police Grant and General GLA Grant

⁽c) Re-distributed non-domestic rates; business rates tax which has been paid into the non-domestic rating pool, and redistributed between local authorities on the basis of population, as part of the formula grant

⁽d) Council Tax Requirement is the amount local authorities expect to collect from all domestic properties within their boundary, including parish and town councils.

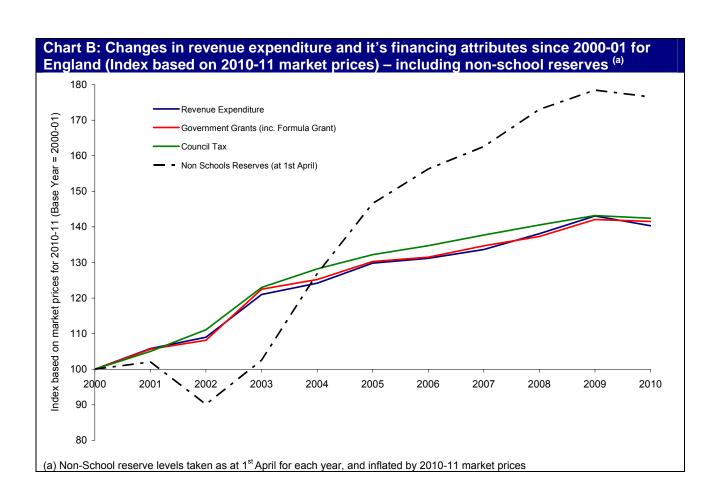

⁽e) Unitary Authorities includes Isle of Scilly.

⁽f) Other authorities comprise of Waste Disposal Authorities (WDA), Integrated Transport Authorities (ITA) and National Park Authorities. For WDA and ITA, the core financing of their service expenditure comes from Waste Disposal and Integrated Transport levies respectively, funded by their constituent authorities, which is already included in revenue expenditure.

	Revenue	Government		Redistributed		Council	
	expenditure	grants	% of	non-domestic rates	% of	tax	% of
	(£ million)	(£ million)	total	(£ million)	total	(£ million)	total

⁽a) Produced on a Non-Financial Reporting Standard 17 basis. Sum of government grants, redistributed non-domestic rates and council tax does not normally exactly equal revenue expenditure because of the use of reserves and other adjustments

⁽b) Produced on a Non-International Accounting Standard 19 basis. Sum of government grants, redistributed non-domestic rates and council tax does not normally exactly equal revenue expenditure because of the use of reserves and other adjustments

Revenue Expenditure by region, since 2006-07, in cash and real terms

7. **Table 7** shows revenue expenditure per capita, in both cash and real terms, across the financial years 2006-07 to 2010-11. Year-on-Year comparisons may not be valid owing to changes in local authority responsibilities.

One year change from 2009-10 to 2010-11:

- In Cash Terms; some regions of England experienced an increase in revenue spending per capita, whereas others experienced a decrease. The North West Region of England experienced the largest increase in revenue spending per capita, of 1.7%. South West Region of England experienced the largest decrease, of 0.8%.
- In Real Terms; all regions of England experienced a decrease in revenue spending per capita. The North West Region of England experienced the smallest decrease of 1.0%. The South West Region of England experienced the largest decrease, of 3.5%, in revenue spending per capita.

Five year change from 2006-07 to 2010-11:

- In Cash Terms; all regions of England experienced an increase in revenue spending per capita. The North East Region of England experienced the largest increase in spending per capita, of 17.4%. Both, Yorkshire & the Humber and East of England Regions experienced the smallest increase, of 13.5%.
- In Real Terms; all regions of England experienced an increase in revenue spending per capita. The North East Region of England experienced the largest increase, of 6.6%. Both Yorkshire & the Humber and East of England Regions experienced the smallest increase, of 3.1%.

Revenue reserves

- 8. Revenue reserves are an accumulated surplus income, which can be used to finance future expenditure and to provide working balances. The transfer of money into reserves increases the budget requirement for the year.
- 9. **Table 8** shows the level of local authority revenue reserves at the beginning of each of the last five financial years. Pension reserves are not included in this table because they do not represent resources available to spend.
 - The total level of non-schools revenue reserves stood at £14.3 billion at 31 March 2011 compared with £13.2 billion at 1 April 2010, an increase of 8.0%.
 - Schools' reserves stood at £2.1 billion at 31 March 2011 compared with £1.8 billion at 1 April 2010, an increase of 12.2%.
 - Between 2009-10 and 2010-11 the introduction of the new International Financial Reporting Standard (IFRS) accounting code resulted in a restatement of other earmarked financial reserve levels. Previous years reserve level figures (both outturn and budget figures) have not been adjusted to remove this effect. The main change relates to grant income, which, where no outstanding conditions existed, had to be recognised immediately in the General Fund Revenue Account. This has meant that balances previously held as receipts in advance are switched to reserves.

Service Net Current Expenditure

- Net Income on Parking Services (off-street and on-street parking) has risen from £489.4 million in 2009-10 to £511.6 in 2010-11, which is a 4.5% increase.
- Net Income on Congestion Charging has increased from £153.0 million to £190.3 million, which is a 24.4% increase.
- Spending on Community Safety (which includes Crime Reduction, Safety Services and CCTV) has decreased from £504.1 million in 2009-10 to £463.0 million in 2010-11. This is a reduction of 8.2%.

CONTINUER	JJ -1	NECO)	-10,010	continued

⁽a) Change to the impairment charge calculated in 2009-10

⁽b) Interest credited in respect of impaired Icelandic investments (from April 2010 to March 2011)

⁽c) The reversal of any impairment charge and the reversal of any interest credited in reliance on regulation 30G (see terminology) of the 2003 Regulations (impairment of certain investments). Any voluntary write back of the credit permitted by the regulation is also included. This debit with equal the total of credits made in previous years.

(d) Any impairment charge capitalised under the authority of a direction under section 16(2)(b) of the Local Government Act

Survey Design for collecting Revenue Outturn (RO) Estimates in 2010-11

12. During May 2011 until July 2011, all 444 local authorities in England were requested to complete the Revenue Outturn (RO) form to show all their transactions related to the general fund revenue account. This included all elements of gross and net current expenditure, capital charges, net total costs and also elements that finance net current expenditure, which include; levy payments, interest receipts, central government grants, use of reserves,, council tax and other non current expenditure items. Annex D shows the distribution of local authorities responsible for completing the RO forms by classification and region.

		Local Authority Classification									
	Greater London Authority	Shire Counties	Shire Districts	Inner London Boroughs ^(a)	Outer London Boroughs	Unitary Authorities	Metropolitan Districts	Police Authorities	Fire Authorities	Other Authorities	ALL

⁽b) Other Authorities include National Park Authorities, Waste Disposal and Integrated Transport Authorities

<u>Survey Design and Methodology for Grossing SAR 2010-11 data</u>

During May 2011 until July 2011, all 444 local authorities in England were requested to complete the Revenue Outturn form to show all expenditure and income transactions from their General Fund Revenue Account. Out of 444, 128 local authorities were selected to complete an additional Subjective Analysis Return (SAR) form which is essentially is an extension of the subjective analysis in the General Fund Revenue Account Outturn suite. In principle, therefore, its totals are designed to agree with the Net Current Expenditure on the individual Revenue Outturn forms, and the Total Service Expenditure line on the Revenue Summary form. The three main components of SAR cover:

- (a) Pay Estimates Direct employee expenses; which include total salaries, employers' national insurance contributions, employer' pension contributions and local allowances
- (b) **Running Expenses**; which includes premises and transport related expenditure, supplies and services and third party payments (including agency staff costs)
- (c) **Income**; which includes recharges, rental income and other sources of income (including sales, fees and charges)

The 128 local authorities were selected to ensure all classes of authorities in England are adequately represented. Below is a table showing the five main classes (stratum) for which local authorities in England are differentiated, and the total number of the local authorities selected to complete the SAR form and total in England, for each class:

Authority Class	Total number of authorities completing the SAR form	Total number o authorities in England that complete the Revenue Outturn forms
Shire Districts		201
Shire Counties	14	27
London Boroughs, Metropolitan Districts and Unitary Authorities & Isle of Scilly ^(a)	51	125
Single Purpose (b)	34	90
Greater London Authority	1	1
Total no. of authorities	128	444

<u>Grossing methodology for producing Subjective Analysis Returns</u> (SAR) figures:

The grossing process to create the England totals using SAR information from the selected sample of authorities is done in three stages, as below:

Stage (1):

The first stage involves aggregating the raw SAR information for each of the five classes separately (e.g. Shire Districts, Shire Counties). The 'Total All Service' column (on the SAR form) is made of eleven core services (which include Education Services, Highways and Transport Services, Social Care, Housing Services etc.). If we consider the first component of SAR (Pay Estimates) and only consider one of the stratums (say k, where k = 1 to 5):

Let X(i, j, k) denote the aggregated raw data for subjective expenditure line i (within the Pay Estimates category, where i = 1 to n) and core service j (where j = 1 to 11). This total would be the aggregate of all authorities in stratum k that completed the SAR information.

Let **T(j, k)** denote the actual overall total figure (which would be derived from the RO forms) for core service j. This total would be the aggregate of all local authorities in Stratum k.

Let **G(i, j, k)** denote the grossed figure for subjective expenditure line i (within the Pay Estimates category, where i = 1 to n) and core service j (where j = 1 to 11). This total would be an estimate of how much expenditure we hypothesise all local authorities would have spent for subjective expenditure line i under core service j if we had collated information from all local authorities in stratum k (contrary to a sample of authorities).

Therefore, for core service j and stratum k:

 $G(i, j, k) = [T(j, k) / \sum X(i, j, k)]*X(i, j, k)$, summing across all subjective expenditure lines i = 1 to n, which fall under the 'Pay Estimates' category.

Using the above method we can generate grossed values for all subjective expenditure lines i, for all core services j and for all stratum k.

Stage (2):

The next stage involves generating 'Total All Services' figures (across all eleven of the core services) for each of the subjective expenditure lines i and stratum k.

Let $T_s(i, k)$ denote the 'Total All Services' figure for subjective expenditure line i (within the Pay Estimates category) and stratum k.

Therefore:

 $T_s(i, k) = \sum G(i, j, k)$, summing across all the core services j (j = 1 to11)

Stage (3):

The last stage involves generating the 'Total All Services' figures for England level (i.e. across all of the five stratums) for each of the subjective expenditure lines i.

Let $T_E(i)$ denote the 'Total All Service' figure at England level for subjective expenditure line i (within the Pay Estimates category).

 $T_E(i) = \sum T_s(i, k)$, summing across all the stratum k (k = 1 to 5).

The overall England total figure for Pay Estimates (summing across all subjective expenditure lines i) should equate to the figure provided on the RSX under employee costs, for Total Service Expenditure.

The same process is used to calculate expenditure estimates for the remaining two SAR components (i.e. Running Expenses & Income).

There have been several revisions to the 2009-10 local authority data as a result of 2010-11 validation work, including to SAR data. The revised 2009-10 SAR data can be found at:

http://www.communities.gov.uk/publications/corporate/statistics/revenue200910finaloutturn

Terminology used in this release

A list of terms relating to local government finance is given in the glossary at Annex G of *Local Government Finance Statistics England* No. 21 2011. This is accessible at http://www.communities.gov.uk/documents/statistics/pdf/1911067.pdf. The most relevant terms for this release are explained below.

Aggregate External Finance - is the total amount of grant provided to finance all local government expenditure, excluding that subject to separate arrangements under statutory schemes, rent allowances and rebates and council tax benefit, which are funded by specific grants outside Aggregate External Finance.

Business Rates Supplement is income which relates to specific projects expected to promote economic development. This includes income from levying a local supplement on the business rate and using the proceeds for investment in the local area.

Current expenditure - is the cost of running local authority services within the financial year. This includes the costs of staffing, heating, lighting and cleaning, together with expenditure on goods and services consumed within the year. This expenditure is offset by income from sales, fees and charges and other (non-grant) income, which gives **total net current expenditure** (line 749). Total net current expenditure also includes payments made by local authorities on behalf of central government, under statutory schemes and the payment of rent allowances and rebates. Such payments are fully funded by central government through specific grants outside **Aggregate External Finance**.

Dedicated Schools Grant (DSG) – there was a change in the funding of specific and formula grants in 2006-07 largely due to changes in the way that expenditure on schools is funded. From 2006-07, local authorities receive school funding through specific grant rather than funding previously included in formula grant.

Greater London Authority (GLA) Group – this includes GLA and its constituent bodies, Metropolitan Police Authority, London Fire and Emergency Planning Authority, Transport for London (TfL) and London Development Agency (LDA). Transactions in their General Fund Revenue Account are reported by the GLA and the four functional bodies as a group.

Appropriations to/from financial instruments adjustment account (line 789) Appropriations to/from unequal pay back pay account (line 790)

These are two new lines connected with the adjustments permitted or required by our regulations. The accounts show figures fully compliant with accounting standards, but regulations made by CLG provide for adjustments to those figures to prevent excessive increases in council tax. The first line allows for adjustments connected with borrowing and investments, including the regulation on Icelandic banks investments. The second allows for the regulation that permits a charge for unequal pay back pay to be deferred until payments are due to be made (accounting requires a charge as soon as the liability is established).

International Accounting Standard 19 (IAS 19)

Local authorities are required to account for Employee benefits (pensions) in accordance with IAS 19 from 2010-11. This requirement is enshrined in the Code of Practice on Local Authority Accounting in the UK, published by the Chartered Institute of Public Finance and Accountancy (CIPFA) and in CIPFA's Best Value Accounting Code of Practice (BVACOP).

Under IAS19 most of the pension schemes covering local government employees are classed as defined benefit schemes. The main implication of defined benefit status is that retirement benefits are accounted for on the basis of the retirement benefit entitlement to which employment in the year gives rise, rather than the cash amounts of employer's contribution or pension due for the year. That is, the IAS19 pension liability will include all the total pension liabilities for all employees and not when the pension is.

The major exception to defined benefit status is the teachers' pension scheme, which is administered centrally; local authorities account for this on a defined contribution basis, and the charges to service expenditure equal the employer's contribution.

The defined benefit charges are not allowed to impact on council tax payers, the charge that must ultimately be carried by taxpayers is the employer's contributions due for the year. Consequently, the effects on the revenue account are that the net current expenditure service lines are on a defined benefit basis, but the Budget Requirement is based on the cash contributions due. This neutrality is achieved by reversing out the impact of IAS19 and replacing this with the actual cash contributions.

The information excluding IAS19 that we collect on the form is critical for our key users. In particular, the Office for National Statistics use the information on a non-IAS19 basis for their key statistics on Public Sector Finances and National Accounts. The following table shows summary service expenditure on both an IAS19 and a non-IAS19 basis from the RA form.

PFI schemes in accordance with the International Financial Reporting Standards (IFRS)

Under the International Financial Reporting Standards (IFRS) the PFI schemes are brought 'on balance sheet'. Local authorities have been required to account for their PFI schemes on the IFRS basis as from 2010-11.

For National Accounts purposes, however, PFI schemes should be accounted for 'on balance sheet' basis only where **economic ownership** of the asset rests with the Authority.

Economic ownership for national accounts purposes is determined by the same test as applies under UK accounting standards and hence that local authorities applied in preparing their 2009-10 accounts. The basis of that test was set out in Appendix E to the 2008 SORP, and depends on whether the local authority or the contractor has an asset of the property used to provide the contracted services. A party has an asset of the property where that party has access to the benefits of the property and exposure to the risks inherent in those benefits.

Formula Grant – the main channel of government funding. This includes **Redistributed non-domestic rates**, **Revenue Support Grant** and Police grant. The distribution is determined by the Formula spending shares formulae, also taking account of authorities' relative ability to raise council tax and the floor damping mechanism. There are no restrictions on what local government can spend it on.

Redistributed non-domestic rates – non-domestic rates which, having been paid into the non-domestic rating pool, are redistributed between local authorities on the basis of population, as part of **Formula Grant**.

Revenue expenditure (line 795) - is equal to total net current expenditure (line 749), plus capital financing costs and a few minor adjustments, but excludes expenditure financed by grants outside **Aggregate External Finance**. Revenue expenditure is

financed by grants inside Aggregate External Finance, council tax and authorities' reserves.

Revenue Expenditure funded from Capital under Statue (RECS) - This is expenditure that is revenue under normal accounting principles but which legislation allows to be financed as capital expenditure. Examples are grants given to local residents for capital purposes. RECS is entered in Revenue Outturn (RO) suite of forms under the relevant service line for Net Current Expenditure, and the total amount reversed out appears in Line 767 of the RS part of the RO suite of forms, which will continue to be entered in the Capital Outturn Return (COR). These entries replace the amortisation of deferred charges, which previously formed one element of capital charges.

Revenue Support Grant – a general grant which replaced rate support grant in 1990-91. Now it is distributed as part of **Formula Grant**.

Icelandic bank investments

Where an authority holds investments in Icelandic banks that were affected by the defaults in Autumn 2008 it would normally be the case that the impairment loss would be charged in the 2008-09 accounts. In the RO suite the entries appear in the RS form. The impairment was entered in line 781 and any interest credited in respect of the investment in line 786. Where the authority has taken advantage of regulation **30G** in the Local Authorities (Capital Finance and Accounting) (England) Regulations 2003 (inserted by SI 2009 No 321) entries permitted or required by the regulations appear in line 789. These entries are shown separately in lines 951-953 of the RS form. Figures are generally calculated using CIPFA methodology published in their LAAP bulletins.

Regulation 30G

Regulation 30G allows, authorities to neutralise the debits for the impairment losses required by accounting practice in the 2008-09 account. However, an authority taking advantage of that relief will be required to make a debit in the 2010-11 accounts equal to the total of all the credits made under the regulation. Thus, the benefit conferred by the regulation is temporary – it simply postpones the effect of the impairment loss.

Specific Grants inside AEF - These are revenue grants which are paid to local authorities by individual government departments, for which the local authority has sole responsibility for decisions on how the grant is allocated. The main purpose for the provision of these grants is to deliver core local authority services.

Specific Grants outside AEF - These are revenue grants, which are paid to local authorities by individual government departments. However, the local authority usually only acts as the 'middle person', as the grants are passed over to a third party which administers the service. The local authority **does not** normally have any control over the service for which the grant was intended for. This responsibility rests solely with the third party that receives the grant.

Data quality

National Statistics are produced to high professional standards set out in the National Statistics Code of Practice. They undergo regular quality assurance reviews to ensure that they meet customer demands.

The information for 2010-11 in this release is derived from Revenue Outturn (RO) Returns submitted to Department for Communities and Local Government by all 444 local authorities in England. The national figures in this report are based on valid returns for all local authorities in England.

Only data for authorities that have completed a valid form is used in the computation of national figures for the statistical release. If we do not hold a complete set of capital data for authorities in England, we use the grossing methodology to compute the national figures. This method does not calculate figures for missing or invalid authorities; it only derives an England national figure based on the following properties;

- i. data currently held from validated authorities
- ii. number of missing or invalid authorities and what type of classification group they fit in (e.g. Single Purpose Authorities, Shire Districts, Shire Counties, Unitary Authorities, Metropolitan Districts, London Boroughs etc.)

As we received valid data from all authorities in England there has not been a need to use this grossing methodology.

Figures are subjected to rigorous pre-defined validation tests both within the forms themselves, while the forms are being completed by the authority and also in Communities and Local Government itself as the data are received and stored. These include:

- 1) **In form validation:** This refers to warnings that are built into the excel forms that are sent to authorities. Forms have been pre-programmed with sense checks to highlight figures outside a set range. If an authority inputs figures that are likely to be incorrect, the form flags up to the officer inputting the data that this value could be incorrect. In some fields the figure can still be accepted if a reason is given whereas some cells will definitely be rejected as it is deemed impossible. In the majority of cases this means that the forms are returned completed and without any validation queries.
- 2) CLASS (Computerised Local Authority Statistics System) validation: Once the figures have been received by DCLG, they get inputted onto the CLASS database, which has built in checks that return errors and warnings for unexpected figures. CLASS can then be asked to output a list of warnings and errors which a team member can look through and contact an authority about if necessary.
- 3) **Manual (or analytical) validation:** These are extra checks done manually by the teams to double check the figures they receive. During this process the teams also liaise with relevant policy sections and the Group Accountant to clarify and rectify any anomalies. Furthermore the data received from LAs are compared with other data sources (both internal and external).

4) **Post validation:** Figures get checked and double-checked on the statistical releases. Particular attention is paid to making sure the values have been entered correctly and the figures on the graphs and tables correlate with each other.

Please note that the figures in this release have not been adjusted to take into account changes of responsibility between 2009-10 and 2010-11.

There have been several revisions to 2009-10 Revenue Outturn data. This is the result of further quality assurance of 2009-10 in light of the new data for 2010-11 and subsequently liaising with authorities to produce the best possible data for both years.

As mentioned on the front cover there was a full response by local authorities to the Revenue Outturn 2010-11 form. Within these completed forms all areas of the form were completed either straight away or after validation. There was not set pattern to any initial incompletion of the forms or specific areas within the forms. If forms were to contain missing sections that could have impacts as to ensuring financing balances with expenditure DCLG may not publish the completed sections of the form because they could not be fully validated. Fortunately, response rate and completion rate is high and often full.

Best Value Accounting Code of Practice (BVACOP) is a set of general guidance notes which are provided to local authorities, providing them with instructions on how to account on various elements of public service expenditure. The services are primarily broken down into a few main groups (e.g. Children and Family Services, Housing Services, Central services). Within each group, detailed guidance is provided on all possible elements of spending, which a LA could have responsibility over. The BVACOP is used by all LA's as a foundation for constructing their accounts in the financial year. Therefore the categorisation defined by BVACOP is used as a basis for our form design and guidance, enabling LA to report their financial data under the correct headings – improving quality of the outputs. In-depth discussions take place with several authorities, prior to them being put forward to Central and Local Government Information Partnership/Finance (CLIP/F) for agreement, as part of our ongoing review of enhanced data collection. CLIP/F is also kept informed of the full planned developments to meet the HM Treasury and ONS requirements.

For a summary of BVACOP (now called SERCOP) please see the following web link including information on legislative requirements:

http://www.cipfastats.net/sercop/

Uses made of the data

1. The data in this Statistical Release are essential for a number of different purposes. A central and immediate purpose is to provide the Secretary of State, Ministers, HM Treasury and the Office for National Statistics with the most up to date information available on local authority revenue spending for decision making. In particular, the data are provided to the Office for National Statistics for National Accounts purposes and to HM Treasury for monitoring and forecasting the financial situation.

- 2. The data are also important sources for various evidence based policy and financial decisions and answering numerous parliamentary questions. In addition they are used by local authorities and their associations, regional bodies, members of the business community and the general public.
- 3. Various Government Departments also utilize this data, some examples include:
 - a. Food Standards Agency uses the national level data to get a view of expenditure on food safety for all LA's across England. They also make use of the local level data to match expenditure on Food Safety and Trading Standards to their own data on number and type of businesses in each local authority, numbers of interventions and enforcement actions undertaken by each LA and the average compliance rates to food hygiene law. This enables them to develop a set of performance indicators for each local authority so that they could measure variations between authorities, good practice and how different levels of expenditure impact on enforcement activity and compliance.
 - b. The Efficiency Programme Team within Department for Health uses the data to look at the operational breakdown costs for Adult Social Services in order to derive average staff costs. This allows them to develop various efficiency indicators for Adult Social Services.
 - c. The parking services data are used by the Department for Transport to monitor LA's that have taken on civil parking enforcement powers and also to brief the ministers.
- 4. Further uses of this data are made internally by DCLG users, such as the Value for Money (VfM) analysis where unitised expenditure figures for each service area (e.g. education) are derived to make comparisons against local authority's performance.
- 5. The Audit Commission also make use of revenue expenditure data, such as in their 'Protecting the public purse' publication which reports on the current level of fraud and it's impact on the economy. It produces various strategies that could help to fight fraud against local government and taxpayers. Additional uses include the Commission's value for money (VfM) profile tool which is utilized for highlighting areas where costs and performance may not be commensurate or where costs look high. They use comparative information about costs, service outputs and outcomes and track performance over time.
- 6. The SAR information is also used as a key management and information tool. In particular, the analysis of employee expenses is used internally by DCLG as part of the evidence base for policy on local government pay and workforce issues. The analysis of running expenses is used by the Office of National Statistics in the estimation of Gross Domestic Product.
- 7. Comments and feedback from the end user for further improvement or about your experiences with this product will be welcomed. Please send all views to: lgf1.revenue@communities.gsi.gov.uk

Background Notes

- 1. This Statistical Release can be found at the following web address: http://www.communities.gov.uk/localgovernment/localregional/localgovernmentfinance/statistics/revenueexpenditure/
- For press enquiries about this Statistical Release, please contact the Local Government press desk on 0303 444 1201 or email press.office@communities.gsi.gov.uk. For other enquiries, please contact Mansukh Makwana on 0303 444 2119 or email LGF1.REVENUE@communities.gsi.gov.uk.
- Timings of future releases are regularly placed on the Department's website, http://www.communities.gov.uk/corporate/researchandstatistics/statistics/publicationschedule/ and on the National Statistics website, www.statistics.gov.uk/press release/currentreleases.asp
- 4. Please see the web link below for access to the papers tabled to the 'Central and Local Information Partnership Finance' (CLIP-F) group, http://www.clip.local.gov.uk/lgv/core/page.do?pageId=31626
 - Items 3, 6 and 11 in the most recent meeting (October 2011) are related to the production of Revenue statistics. These include an information on 'Business Information Districts' data collection, ongoing work with the Department of Health to ensure joint working and also information on Quarterly Revenue Outturn.

CLIP Finance (CLIP F) is a consultative group which considers the collection, presentation and analysis of data on local government finance. It has been in existence since 2006, prior to this the group was known as Working Group on Local Government Financial Statistics (WGLGFS). The membership consists of representatives from central government departments, local government, CIPFA and the Audit Commission, and generally meets three times a year. To ensure users are made aware of significant changes and adjustments to Local Government Finance forms papers are tabled, discussed and published. Please visit the website for details of likely changes for future Revenue/Capital statistical releases.

- 5. Final Revenue Outturn figures will be published in a further Statistical Release later this year.
- The notes, which accompany each form sent to local authorities, can be found at: <a href="http://www.communities.gov.uk/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localregional/localgovernment/localgovernment/localgovernment/localgovernment/localgovernment/loc
- 7. For a fuller picture of recent trends in local government finance, readers are directed to *Local Government Finance Statistics England* No. 21 2011, which is available in hard copy from Communities and Local Government Publications, Cambertown House at product@communities.gsi.gov.uk (Tel. 0300 123 1124) and electronically from the Communities and Local Government website:

http://www.communities.gov.uk/documents/statistics/pdf/1911067.pdf

8. We consistently comply with our user engagement strategy, by publishing both the national level and local level figures on the DCLG website and ensuring our key users are made aware two weeks prior to the publication of the statistical release. The publication date is also highlighted on ONS publication hub and a web-link is added on the day of the release. In both cases we highlight all quality considerations and any revisions to historical data sets. Documentation on DCLG engagement strategy to meet the needs of statistical users can be found at:

http://www.communities.gov.uk/publications/corporate/statistics/engagementstrategystatistics

9. Both the Scottish Government and the Welsh Assembly Government also collect revenue outturn data. Their information can be found at the following websites:

Scotland:

http://www.scotland.gov.uk/Topics/Statistics/Browse/Local-Government-Finance

Wales:

http://wales.gov.uk/topics/statistics/headlines/localgov2010/100623/?lang=en

Northern Ireland:

http://www.doeni.gov.uk/index/local_government/local_government_funding.ht m

Symbols and conventions

... = not available

0 = zero or negligible

— = not applicable

|| = discontinuity

(P) = provisional

(R) = revised since the last statistical release

Rounding

Where figures have been rounded, there may be a slight discrepancy between the total and the sum of constituent items.

ISBN: 978-1-4098-3230-0
