Introduction

This quarterly leaflet contains tables of key figures and web links to a fuller collection of data shown in the Communities and Local Government's Live Tables. These web links are contained in the topic titles and web addresses at the end of each section.

STOCK (including vacants)

Housing stock is built up from current stock (with census figures as the base) plus any changes due to housing flows such as gains from new completions i.e. house building, conversions and losses due to demolitions.

Information on the changes in stock within local authorities, taking into account new build dwellings and gains and losses through change of use, conversions and demolitions is collected annually by Communities and Local Government from some local authorities through the Housing Flows Reconciliation (HFR) Form and from some Regional Assemblies through a joint return.

HOUSE BUILDING (Starts and Completions)

The data is used as one of the variables when the Monetary Policy Committee meets to decide the base rate of interest. The numbers of new starts and completions show how demand is being met. National figures for both starts and completions are released in a quarterly statistical release.

In this section you can find data on the number of new permanent dwellings started and completed for England and its Regions.

## HOUSEHOLD ESTIMATES AND PROJECTIONS

Household projections are produced by Communities and Local Government and are linked to the latest Office for National Statistics Sub National Population Projections. The projections are trend-based and indicate the number of additional households that would form if recent demographic trends continue.

## HOUSING MARKET AND HOUSE PRICES

This section brings together information and data relating to the housing market, house prices, mortgages, property transactions and land prices. The main data covers average house prices, house price indices and house price inflation figures across the UK. Other data include average mortgage values, property transactions, land prices, and trends in interest rates.

### **RENTS, LETTINGS AND TENANCIES**

This section provides some of the statistical information Communities and Local Government produces on rents, lettings and tenancies. The three areas are inter-related and together cover the following topics: rent costs by tenure, the letting of local authority and Registered Social Landlord (RSL) accommodation, housing benefit and private tenancy types.

## STATUTORY HOMELESSNESS

National statistics on Statutory Homelessness are released on a quarterly basis under arrangements approved by the UK Statistics Authority. The latest statistics were published on 11 March 2010 and provide figures for the final quarter (October to December) of 2009, showing local authorities' activities under the homelessness legislation of the 1996 Housing Act. The next release is scheduled for 10 June 2010 and will provide figures for the first quarter (January to March) of 2010 and the 2009 -10 financial year.

# SOCIAL HOUSING SALES

This section provides data for the sale and transfer of local authority and registered social landlord dwellings, in England and the English regions. It includes details of the number of applications made under the Right-to-Buy scheme, as well as numbers of sales, related selling price and discount information.

The main source for England data is the P1B Quarterly Housing Monitoring return. This gives information at district level for all local authority council house sales as well as housing capital expenditure. Details for registered social landlords come from the Regulatory and Statistical Return (RSR) and Continuous Recording (CORE) return to the Tenant Services Authority.

# AFFORDABLE HOUSING SUPPLY

The tables in this section relate to the total supply of affordable housing in England (see *notes and definitions*). Affordable housing supply can be a new build property or an acquisition. An affordable housing acquisition is an existing, private sector property that has been purchased for use as an affordable home.

1. Decent home must: meet the statutory minimum standard; be in a reasonable state of repair; have modern facilities and services; and provide a reasonable degree of thermal comfort. The detailed definition of each of these criteria is included in *A Decent Home: Definition and guidance for implementation, Communities and Local Government*, June 2006.

2. From 2006, the definition of a decent home was updated with the replacement of the Fitness Standard by the Housing Health and Safety Rating System (HHSRS) as the statutory criterion of decency. An overview and links to more detailed guidance on the HHSRS are available from: <u>http://www.communities.gov.uk/hhsrs</u>

### **ENERGY EFFICIENCY**

### Average SAP<sup>1</sup> rating

|                                            | 2007 | 2008 |

| of which local authority rented            | 56   | 58   |
| of which registered social landlord rented | 60   | 60   |

1. Standard Assessment Procedure (SAP 2005 methodology).

Energy efficiency is based on a home's energy costs per square metre, taking into account the costs of space and water heating, ventilation and lighting, less cost savings from energy generation technologies.

The rating is expressed on a scale of 1-100 where a dwelling with a rating of 1 has poor energy efficiency (high costs) and a dwelling with a rating of 100 represents a completely energy efficient dwelling (zero net costs per vear).
