

Table 3-1110
AVC to Enhance Death in Service Lump Sum Rates

These factors are to be applied to a member's pensionable earnings for those who opt to increase their death in service lump sum from 3 times to 4 times representative pay. There are separate factors to be applied to Non Medical and Dental Officers, Medical and Dental Officers and Other Ranks.

AFPS75

AVC Factors (Enhanced Death in Service benefits)

Medical and Dental Officers

Factors for regular AVCs to increase the death in service benefit from 3 times to 4 times representative pay

Contribution rates as a percentage per annum of military pay

| Age at start of AVCs | Age at entry to AFPS 75 | | | | | | | | | | | | | | |
|----------------------|-------------------------|------|------|------|------|------|------|------|------|------|------|------|------|------|------|

Notes:

1. The rates of contribution are calculated on the basis of payment to age 55. Where service extends beyond age 55 a continuation rate would need to be calculated by GAD for the remaining service.

2. Where contributions begin after age 55, different rates will apply and should be obtained from GAD. Source: GAD Date: 3 Aug 11
