The assessment of trainee's performance

A trainee's performance is assessed continuously throughout their course and they are graded for their performance both AM and PM according to the following criteria;

Grade 6/5/4 SATISFACTORY

6/ Overall performance to a very high standard with no significant weaknesses

5/ A good overall standard with some minor weaknesses

4/ A competent overall performance with some minor deficiencies

Grade 3/2/1 UNSATISFACTORY

3/ An inadequate overall performance with some minor deficiencies

2/ A poor overall performance with numerous deficiencies

1/ Overall performance extremely poor with dangerous deficiencies

There are various headings under which a trainee's performance is assessed. An individual unsatisfactory marking under one heading will not necessarily result in the entire session being recorded as unsatisfactory, however, if a trainee receives an unsatisfactory grade in any of the following "core competencies" they will be marked unsatisfactory for the session.

- 1 Control
- 2 Fault identification
- 3 Assessment
- 4 Completion of DL25 /test report
- 5 Self-awareness
- 6 Attitude to customer

Each course has weekly objectives; however, each trainee will have individual daily objectives based on their previous performance and progress towards the weekly objectives.

All trainees receive verbal feedback on each session and a summary at the end of the day. A report is then given to the trainees each morning which summarises the previous day's work. The trainees are invited to sign the report and make their own comments. They will then be given a copy of the report for their personal record.

The original copy of the report will be placed on the trainee's personnel file and all grades will be transferred onto an overview sheet to facilitate easy monitoring by the course manager and Cardington supervising instructors.

Individual trainees and trainers are regularly supervised by course managers and staff from Standards and Regulations to ensure consistency and uniformity of assessment. The daily reports are also regularly checked by the course manager.
