

## Response by Ornella Saibene

Dear sir

i am finding it very confusing to answer your consultation.

But here goes:

I strongly disagree with the New Nuclear Build.

**There is no solution for Nuclear Waste**

There should be no cap or deferring on price on Nuclear waste disposal, industry should pay full price to look after the waste.

Best solution is not to build any more of these Nuclear nightmares. full compensation should be given to victims of radioactive waste.

I object strongly to your use of the word green when it comes to Nuclear Technology.

Your consultation is steeped in lies and hard to access, you have failed in the democratic process and I will be looking into the legality of your so called consultation.
