

**For both of the multiple choice question part and the hazard perception video part of the car and motorcycle theory tests, can you please provide the numbers of tests taken and individuals that scored between zero and the full marks, as well as percentages of those numbers in relation to the complete number of tests taken and individuals taking those tests?**

**For example, the multiple choice part of the theory test has a maximum score of 50 points, so how many individuals scored 0, 1, 2, 3, etc, up to and including 50?**

**Ideally, these figures would be based on theory tests taken on or after 23rd January 2012 -31/3/12 and 1/4/11 - 22/1/12, but I would be equally interested in data for the previous 3 financial years.**

Attached at Annexes B (car) and Annex C (motorcycle) are tables which show the spread of scores achieved during theory tests since the 2008/09 financial year. Please note we have shown a total for the 2011/12 year and also split this into the requested periods.
