NAME REDACT ED

The new scope looks much better and seems likely to address all the concerns that we had on the nuclear side with the previous draft. It depends what is actually written of course, but at this stage we can support the proposed structure and subject areas. I notice I have been specifically mentioned by name in the documentation and will remain available to assist where necessary. It would be really helpful, when there is an emerging draft of the areas we are interested in, to sit down with the consultants and go through the sections in detail.
