## Headline results:

- The 'All Work' Construction Material Price Index fell by 0.3% in the year to March, down from 1.5% in February.
- The construction materials experiencing the largest price increases in the year to March were Sand & Gravel including levy (up 9.1%), Sand & Gravel excluding levy (up 6.5%) and Particle Board (up 6.1%).
- In the year to March, production of bricks fell by 5.5% and production of blocks rose by 1.6%.
- Exports of construction materials fell by 3.9% on the quarter in 2012Q4 (to £1,355 million). Imports fell by 6.7% (to £2,783 million). As a result, the trade deficit narrowed by £144 million, to £1,428 million, in 2012Q4.

## Introduction

This commentary accompanies the latest Monthly Statistics of Building Materials and Components bulletin, published on the BIS Construction <u>website</u> on 1 May 2013. It aims to provide a brief overview of recent trends in the data presented in the bulletin.

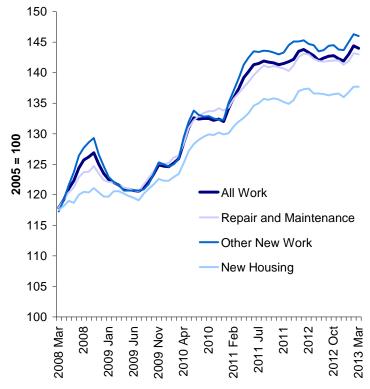

The bulletin presents the latest detailed information on selected building materials and components. It covers the following building materials statistics (in parentheses, the data collection frequency and the geographical area covered):

- Construction Material Price Indices (monthly, UK)
- Sand and Gravel sales (quarterly, GB\*)
- Slate production, deliveries and stocks (quarterly, GB)
- Cement and Clinker production, deliveries and stocks (monthly, GB)
- Bricks production, deliveries and stocks (monthly, GB\*)
- Concrete building blocks production, deliveries and stocks (monthly, GB\*)
- Concrete roofing tiles production, deliveries and stocks (quarterly, GB)
- Ready Mixed Concrete deliveries (quarterly, UK)
- Values of overseas imports and exports trades for selected materials and components for use in construction (quarterly, UK)
- Value of EU and Non-EU Trade for selected materials and components for use in construction (annual, UK)

Note: \* Regional figures available

The statistics support analysis of the construction materials market and business planning. They are regularly reported in the construction press and are used for a variety of purposes, including policy development and evaluation concerning the construction products industry, as well as monitoring market trends. Further detail is available in this document under <u>Uses of the data</u>.

### Summary of results

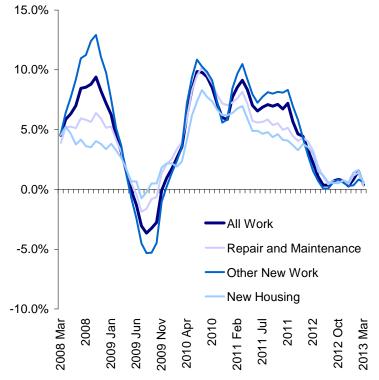

**Chart 1: Construction Material Price Indices, UK** 

The headline 'All Work' Construction Material Price index fell by 0.3% on the month in March, following a 1.0% rise on the month in February.

Source: Table 1, Monthly Statistics of Building Materials and Components

#### Chart 2: Growth in Construction Material Price Indices, UK

Percentage change over a year earlier (%)

Annual construction material price inflation fell to 0.3% in March, from 1.5% in February. Except for in February 2013, annual inflation has been less than 1.0% in each month since June 2012.

Annual inflation fell in all construction subsectors in March. The 'Repair and Maintenance' sector saw annual inflation fall to 0.3% in March, from 1.4% in February, in the 'New Housing' sector it fell to 0.5% from 1.6% and in the 'Other New Work' sector it fell to 0.6% from 0.8%.

Source: Table 1 Monthly Statistics of Building Materials and Components

### Table 1: Construction materials experiencing the largest price increases and decreases in the year to March 2013, UK

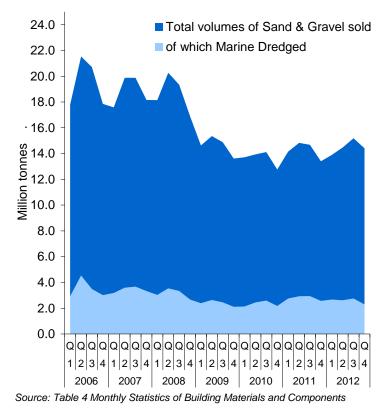

Construction Materials	% change on a year earlier
Largest price increases Sand and Gravel (including levy) Sand and Gravel (excluding levy) Particle Board	9.1 6.5 6.1
Largest price decreases Crushed Rock (excluding levy) Crushed Rock (including levy) Coated Roadstone (excluding levy)	-6.0 -5.6 ) -1.7

Source: Table 2 Monthly Statistics of Building Materials and Components

Sand & Gravel including levy (up 9.1%), Sand & Gravel excluding levy (up 6.5%) and Particle Board (up 6.1%) experienced the largest price increases in the year to March. Over the same period, Crushed Rock excluding levy (down 6.0%), Crushed Rock including levy (down 5.6%) and Coated Roadstone excluding levy (also down 1.7%) experienced the largest price falls.

The aggregates levy (e.g. the levy in 'Sand & Gravel including levy') is a tax on the commercial exploitation of aggregates which applies under certain circumstances. Further information is available from <u>HM Revenue & Customs</u>.

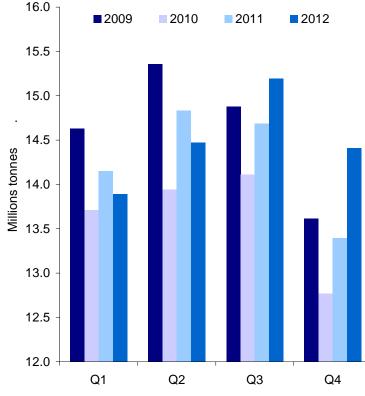

### Chart 3: Volumes of Total and Marine Dredged Sand and Gravel sold, GB

Volumes of Sand and Gravel sold in Great Britain decreased by 5.1% on the quarter in 2012Q4, to 14.4 million tonnes. This follows a quarterly increase of 5.0% in 2012Q3.

Chart 3 shows a sharp drop in the total sales trend around the end of 2008. Before the UK economy entered recession in 2008Q2, quarterly sales averaged 19.0 million tonnes. During this recession, sales averaged 17.8 million tonnes. Following this recession (from 2009Q3), sales averaged 14.1 millions tonnes.

The proportion of Sand and Gravel sold that was Marine Dredged has been fairly constant each quarter, ranging between 15.5% and 21.0%.

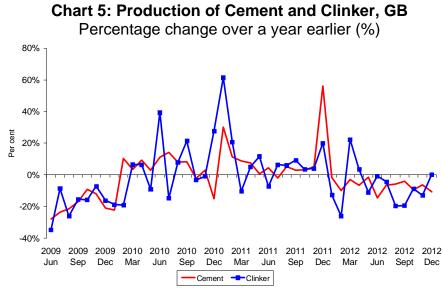

#### Chart 4: Volumes of Sand and Gravel sold, GB

A closer look at the differences in total Sand and Gravel sales (Chart 4) shows that the volume sold in quarter 4 of 2012 was the largest compared to the same quarter in each year from 2009 to 2011. Compared to 2011Q4, sales rose by 7.6% in 2012Q4.

Using the same comparison for quarter 3 sales, 2012 were also the largest since 2009. Compared to 2011Q3, sales rose by 3.5% in 2012Q3.

Source: Table 4, Monthly Statistics of Building Materials and Components

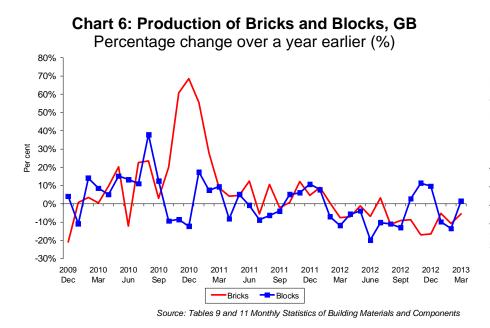

Source: Table 8 Monthly Statistics of Building Materials and Components

Cement production fell by 10.7% to 513 thousand tonnes in the year to December 2012. Production fell on a year-onyear basis in each month of 2012, which was preceded by five successive months of positive year-on-year growth.

Production of Clinker also rose in the year to December, by 0.3%, following a decrease of 12.9% in the year to November. This slight rise is the first following seven successive declines on this basis.

Cement and clinker figures for January and February 2013 are temporarily unavailable.

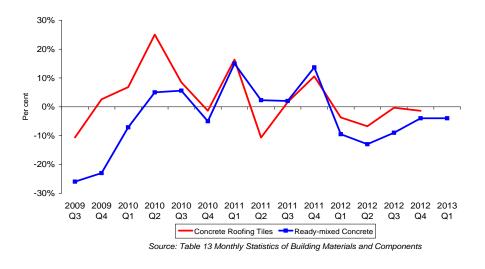

In the year to March 2013, production of Bricks fell by 5.5%, the twelth decline on this basis in thirteen months.

Production of Blocks rose in the year to March, by 1.6%, following a 13.6% decrease in the year to Feburary. Eight year-on-year declines were seen in 2012 on this basis.

### Chart 7: Deliveries of Concrete Roofing Tiles (GB) and Ready-mixed Concrete (UK)

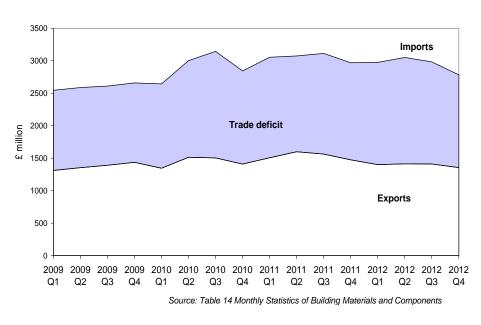

Deliveries of Concrete Roofing Tiles declined on a year-onyear basis for the fourth successive quarter in 2012Q4 (down 1.4%), after increasing on this basis in the second half of 2011.

Deliveries of Ready-mixed Concrete fell by 4.0% in the year to 2013Q1. Deliveries also fell on this basis in each quarter of 2012. Comparing deliveries in 2012 with 2011, delivery volumes have fallen by 9.0%.

Exports of construction materials fell by 3.9% on the quarter in 2012Q4 (to £1,355 million). Imports fell by 6.7% (to £2,783 million). As a result, the trade deficit narrowed by £144 million, to £1,428 million, in 2012Q4.

The decrease in the trade deficit in 2012Q4 was largely due to a narrowing in the trade deficit in 'products and components' by £113 million. The trade deficit in 'semimanufactures' also narrowed, by £24 million, whilst 'raw materials' narrowed by £8 million.

## Table 2: Top-5 UK Exported and Imported ConstructionMaterials in 2012

£ million Top-5 Exported Materials		Top-5 Imported Materials	
Paints & Varnishes Electrical Wires Lamps & Fittings Air Conditioning Equip. Plugs & Sockets	286 255	Electrical Wires Sawn Wood > 6mm thick Lamps & Fittings Central Heating Boilers Air Conditioning Equip.	1,373 625 596 524 521

Source: Table 14 Monthly Statistics of Building Materials and Components

The top five exported materials in 2012 were Paints and Varnishes, Electrical Wires, Lamps & Fittings, Air Conditioning Equipment and

Plugs & Sockets.

The top five imported construction materials in 2012 were Electrical Wires, Sawn Wood (thicker than 6mm), Lamps & Fittings, Central Heating Boilers and Air Conditioning Equipment.

## Table 3: UK Trade of Construction Materials with EU and<br/>Non-EU Countries, 2012

£million (% of total trade in italics)			
All Building Materials & Components	EU		Non-EU
Exports		3,342	2,236
		60%	40%
Imports		7,411	4,380
		63%	37%

In 2012, around 60% of all building material imports were from EU countries, while 63% of exports were to EU countries.

Source: Table 15 Monthly Statistics of Building Materials and Components

### Table 4: Top 5 UK Export and Import Markets for<br/>Construction Materials in 2012 .....

£ million				The UK's largest export market
Top-5 Export Markets		Top-5 Import Markets		for building materials was
i				Ireland, followed by Germany,
Ireland	673	Germany	1,844	France, the Netherlands and

Netherlands.

## **Economic background**

Preliminary estimates of GDP, published by the Office for National Statistics (ONS) on 25 April, reported that the economy grew by 0.3% on the quarter in 2013Q1, following negative growth of 0.3% on the quarter in 2012Q4. Although GDP saw an Olympics and Paralymics related boost in 2012Q3 (rising 0.9% on the quarter), GDP has been broadly flat over the last 18 months, being 0.4% higher in 2013Q1 than in 2011Q3.

Of the three broad sectors of the economy, growth of 0.6% in services largely drove the rise in GDP estimated between 2012Q4 and 2013Q1. Of other two broad sectors, industrial production saw growth of 0.2% over the same period, whilst construction fell 2.5%. Between 2012Q1 and 2013Q1 construction output decreased by 5.9%.

Going forward, the International Monetary Fund (IMF) recently downgraded it forecasts for the UK economy, now expecting growth of 0.7% in 2013 and 1.5% in 2014. These forecasts are in broad agreement with Consensus Economics forecasts (the average of private sector forecasts) of 0.7% in 2013 and 1.6% in 2014.

Two major forecasters have revised their expectations for growth in the construction sector. The Construction Products Association (CPA) now expects a fall in construction output of 2.1% in 2013 (previously -2.2%) before output rebounds to positive growth of 1.9% in 2014 (previously +2.0%); each representing downgrades to their previous forecasts made in January. Construction output is also expected to grow in 2015 (+3.8%) and 2016 (+4.7%). Similarly, in its latest forecasts, Experian also expects the sector to contract in 2013, by 2.6%, and return to growth in 2014, by 0.8% (rather than a decline of 3.5% in 2013 estimated in January, with their 2014 forecast unchanged). Both forecasters cite the continued effect of severe cuts in public investment and the inability of the private sector to compensate for these cuts as reasons for their downbeat forecasts for 2013, with both suggesting a return to growth in 2014 and 2015 driven by private sector activity alongside an ease in public sector spending cuts.

According to the latest Consensus Economics forecasts, manufacturing output is expected to decline in 2013, by 0.2%. This expectation represents a downgrade, with growth of 0.3% forecast last month. Growth is expected to return in the sector in 2014 (1.6%).

## Background notes

### **Quality information for the Building Materials bulletin**

1. The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics.

Designation can be broadly interpreted to mean that the statistics:

- meet identified user needs;
- are well explained and readily accessible;
- are produced according to sound methods, and
- are managed impartially and objectively in the public interest.

Once statistics have been designated as National Statistics it is a statutory requirement that the Code of Practice shall continue to be observed. The full assessment <u>report</u>, published on 22nd December 2011, can be found on the UK Statistics Authority website.

2. Quality issues related to the *Building Materials and Components* outputs are discussed in the review of the Building Material statistics that was carried out in 2010 by BIS's construction team. The review aimed to: ascertain user needs; examine whether existing data collection methodologies are fit for purpose; estimate compliance costs; assess compliance with the Code of Practice; and identify options for change.

The full <u>report</u> can be found on the BIS Building Materials and Components webpage.

Detailed information on data suppliers, coverage and data collection methodology can be found in sections 2.1-2.10. Quality issues (coverage and accuracy of sample panels, response rates, survey results processing, disclosure etc.) and potential measures that could be employed to improve the quality of the statistics are discussed in section 2.11 of the review. Users' views on the quality of the *Building Materials and Components* statistics are given in section 3.3.4. These are derived from a user survey carried out in early 2010, as part of the review (see section 3 for details).

- 3. Following the review, BIS acted on the recommendations including commissioning the Office for National Statistics Methodology Advisory Service (ONS/MAS) to address some of the recommendations from the 2010 review. In July 2011, MAS published their <u>interim report</u>. In July 2012, MAS published their <u>final report</u>. This will inform a full summary Quality Report that will be published by BIS shortly.
- 4. HM Revenue and Customs use administrative sources to produce Overseas Trade Statistics. A <u>Statement of Administrative Sources</u> used to compile construction material trade statistics is available on the BIS *Building Materials and Components* webpage:

Separately, HM Revenue and Customs also have a <u>Statement of Administrative Sources</u> which covers Overseas Trade Statistics.

5. <u>The pre-announcement of any major changes to samples or methodology</u> also details some methodological changes to the collection of data.

6. The following table gives a summary of response rates related to some of the latest survey results. Where the response rate is less than 100%, estimates are made for missing values.

Latest data used in February 2013 edition	Bulletin table number	Response rate
Quarterly Sand and Gravel	4,5&6	94%
Quarterly Sand and Gravel – Land Won	4, 5 & 6	60%
Quarterly Sand and Gravel – Marine Dredged	4, 5 & 6	96%
Quarterly Slate	7	67%
Monthly Bricks Provisional data	9	85%
Monthly Bricks Final data	9 & 10	100%
Monthly Concrete Blocks Provisional data	11	82%
Monthly Concrete Blocks Final data	11	98%
Quarterly Concrete Blocks Final data	11 & 12	96%
Quarterly Roofing Tiles	13	71%

### Uses of the data

7. The Building Materials and Components statistics are used for a variety of purposes, including policy development and evaluation concerning the construction products industry, as well as monitoring market trends. In a wider context, the figures are regularly reported in the construction press to facilitate market analysis and business planning for its wide range of readers. The statistics are also increasingly used by financial institutions for assessing market information and industry trends. For more information on the uses of the Building Materials statistics, their usefulness to users and users' views on the quality of these statistics, see Section 3 of the Building Materials and Components review.

## **Related Statistics**

- 8. <u>Construction Statistics: Sources and Outputs</u> lists the known sources of information available on the construction industry and their outputs These include information on employees, employment, enterprises, output and new orders in the construction industry as well as the contribution of the industry to the economy. Related information, for example housing, is also included.
- 9. The <u>Construction Statistics Annual</u> brings together a wide range of statistics currently available on the construction industry from a variety of sources and provides a broad perspective on statistical trends in the construction industry, with some international comparisons.
- 10. In its monthly **Index of Production (IoP)** publication, the ONS publishes Gross Value Added (seasonally adjusted, UK) data for the following two industries:
  - SIC 23.1-4/7-9 which includes the manufacture of bricks, tiles and other construction products.
  - SIC 23.5-66 industry which includes the manufacture of concrete, cement and other products for construction purposes.

These data are not directly comparable with the data in this bulletin, due to differences in coverage and methodology. They are nevertheless useful in illustrating the latest output trends of related construction materials as measured by the ONS.

The latest IoP data show that output in the SIC 23.1-4/7-9 industry fell by 6.9% in the year to February 2013. This was the fourteenth successive month in which output fell on this basis, following a 12-month period in which the sector recorded uninterrupted year-on-year growth. In 2012 as a whole, the industry contract by 12.7%, down from an expansion of 7.9% in 2011. Monthly indices from April 2012 to February 2013 inclusively have been some of the lowest on record (since January 1997), with 11 of the 15 lowest being in these months (the lowest being in October 2012).

In the year to February 2013, output in the SIC 23.5-6 industry fell by 9.0%, also the thirteenth consecutive fall on this basis, with 23 months in the last 24-month period seeing year-on-year declines. The January 2013 monthly index value was the lowest on record (since January 1997) and February 2013 the second lowest. In 2012 as a whole, the sector suffered a 14.6% decline in output, following a contraction of 5.3% in output recorded in 2011.

Turning to the **construction contracting sector**, the latest (non-seasonally adjusted) ONS data indicate that construction output fell by 7.0% in the year to February 2013, a faster pace of decline than in the year to January (down 5.5%) and the fourteenth consecutive decline on a year-on-year basis. The fall in the year to February was largely driven by declines in new public and private commercial non-residential output. In 2012 as a whole (seasonally adjusted), the construction sector shrank by 8.0%, more than offsetting growth of 2.4% achieved in 2011.

## Revisions

- 11. Our *revisions policy* can be found on the BIS Building Materials webpage.
- 12. <u>The pre-announcement of any major changes to samples or methodology</u> and <u>Summary of</u> <u>Revisions</u> give further information on revisions and other changes to data and can also be found on the BIS Building Materials webpage.

## **Further information**

The coverage of cement and cementitious statistics changed from UK to GB in 2002 due to data confidentiality issues in Northern Ireland as the number of manufacturers decreased. Where the coverage of figures for other building materials is limited to Great Britain (i.e. sales of sand and gravel, and production, deliveries and stocks of slate, clinker, bricks, concrete building blocks and concrete roofing tiles), no equivalent data are collected for Northern Ireland.

The most recently published bulletin and accompanying data tables can be found on BIS' *Building Materials and Components* <u>website</u>

Accompanying tables with data relating to 2011 are accessible from this link.

Accompanying tables for 2005 - 2010 are accessible from this link.

Requests for older data should be sent to MaterialStats@bis.gsi.gov.uk
