

CfD Metering Sub Group

CfD Expert Group
4 March 2013

Content

- Proposed CFD metering
- Potential areas for further discussion / development
- Sub Group Constitution

GB Metering Arrangements

Existing Meter Registration	Approach in November Operational framework
Central Meter Registration Service (CMRS)	CfD settlement using loss adjusted metered energy data used for BSC settlement
Supplier Meter Registration Service (SMRS)	<p>Offtaker to register an Additional BM Unit under the Balancing and Settlement Code</p> <p>CfD settlement using loss adjusted metered energy data used for BSC settlement</p>
N/A	<p>Potential adjustments to ensure other types of generator (e.g. private wire connected) can participate in the CfD.</p> <p>Further consideration required</p>

Potential areas for discussion

- Approaches for CRMS & SRMS
 - Issues/concerns?
 - Alternatives worth consideration?
- Development of solutions for private wire
 - Provision of generation metering data
 - Supplier Obligation impacts
- Impacts for Northern Ireland CfDs

Potential areas for discussion

- BSC (other codes?) amendments to enable provision of metered data to CfD Settlement Agent?
- Missing data / meter data disputes?
- Technology-specific metering requirements?

Out of scope for the group?

- Metering for the supplier obligation
- EII exemption under the supplier obligation
- Northern Ireland generation metering

Sub Group Constitution?

- Generator
 - T-connected
 - D-connected
 - Private wire connected
 - Portfolio / independent
- Suppliers
- Consumer Rep
- Meter Agents / Aggregators
- DECC
- National Grid
- Elexon
- Ofgem
- Other experts / interested parties
- NI Rep?
