

Pertussis vaccination programme for pregnant women 2012-2013

Provisional national data for February 2013

Table 1

Pertussis Vaccine Uptake for Pregnant Women 2012-13

Provisional national data, as submitted by PCTs for the month of February 2013

England Total	Response Summary			Vaccine Uptake (%)		
	No. of PCTs	No. of PCTs making a return	% of PCTs making a return	Number of pregnant women with an estimated date of delivery in the survey month	No. of pregnant women with an estimated date of delivery in the survey month that received a dose of Repevax®	Vaccine Uptake (%)
	151	130	86.0	29790	17741	59.6

Notes:

Provisional: these data should be interpreted with caution

1. These data are based on 86% of Trusts responding to the February 2013 survey and have not been extrapolated to cover all PCTs.
2. The national figures are provisional and may vary following further data validation checks.
3. The national uptake figures have increased marginally by 0.2 % (59.6%) compared to 59.4 % in January 2013.
4. The denominator is determined as the number of pregnant women with an estimated date of delivery in the survey month.
5. The numerator is determined or defined as the number of pregnant women with an estimated date of delivery in the survey month that received a dose of Repevax® past the 28th week of their pregnancy
6. The data was provided from GP Practices to Primary Care Trusts (PCTs) and include uptake from 1 February 2013 to 28 February 2013 inclusive.
7. There remains wide variation in the reported number of pregnant women between PCTs that suggests variation in collection of relevant data.
8. There are anomalies in the data so the uptake estimate needs to be interpreted with caution.
9. These data have been provided by NHS Trusts under Review of Central Returns (ROCR) licence ROCR/OR/2160/FT6/001MAND
