Survival Curve

¹ 'LoS x' means 'LoS greater than or equal to x but less than x+1'. So 'LoS21', for example, is the chance of personnel serving more than or equal to 21 years but less than 22 years.

² 'Chance of promotion having already achieved the preceding rank' considers the branch as a whole and is not specific to LoS. It is based on trained and untrained personnel within the trade.

³ Average Return of Service consider the trade as a whole and are not specific to rank or LoS. They refer to the average length of service on exit.

Notes:

- a. These data are based on the seven year span of actual data 2010/11 – 2016/17. By considering a cohort of individuals with the similar characteristics - **New Entrants** into the **Gnr** trade - average career projections have been calculated.
- b. Defence Statistics' career forecasts are not based on the actual experience of any one individual, but rather are based on the historical behaviour of individuals with similar characteristics.
