Dear Sir

On the Web site I read, 'Based on need not income'. If DLA's replacement is not to be means tested then why should the Carers allowance be means tested? I have read elsewhere that it will be.

My MP Mr [REDACTED] with me that if a patient has deteriorated since his initial assessment his level of DLA should rise. If for example a man gets DLA for Schizophrenia and he later develops epilepsy then his level of DLA should raise from the current middle level to the new higher level.

[REDACTED]
