Executive summary

The aim of this survey was to provide up to date nutrient composition data for fresh and processed fruit and vegetables. The data for these food groups published in the Composition of Foods Integrated Dataset and included in the National Diet and Nutrition Survey nutrient databank were last updated in the 1980s. Since then, there have been increases in both the range and varieties of fruit and vegetables commonly consumed in the UK and increased globalisation of the food supply has resulted in some products that were previously seasonal being widely available throughout the year. The samples selected were those fruit and vegetables that are most commonly consumed or fruit and vegetables where there were gaps in the data available and consumption was increasing. Commonly consumed processed fruit and vegetable products were also included.

The results from this analytical survey will be incorporated into the Department of Health's¹ nutrient databank that supports dietary surveys and will be also be disseminated via the authoritative UK food composition tables, *McCance and Widdowson's The Composition of Foods*.

This project reports analysis of 59 composite samples that were made up of between 9 and 22 sub-samples that were representative of fruit and vegetables consumed in the UK. Sub-samples included were based on the need to take into account factors including cultivar, region and country of origin and season. Fresh fruits and vegetables were sampled in two seasons (summer/autumn and autumn/winter) where the cultivars and geographic origin were known to change between seasons. Samples were purchased from retail outlets and prepared for analysis between August 2011 and February 2012.

This sampling report gives details of the sub-samples making up each composite sample. Analytical results from the survey are contained in a separate report. Results for individual fatty acids are reported separately in electronic format.

Sampling notes

- Samples were collected according to a sample protocol produced in agreement with the Department of Health (DH).
- Sub-samples were agreed with DH based on a review of market shares and nutrient content.
- All samples were collected between August 2011 and February 2012 and stored according to usual consumer practice or according to packaging guidelines until required for processing.
- Equal weights of each sub-sample were combined to complete the composite sample for analysis.
- Sub-samples were stored at -20°C until required for further preparation. Composite samples were stored at -40°C before being sent to laboratories for analysis.
- Where possible all sub-samples within a composite sample were prepared in a single day and the composite sample was produced on the same day. Where that was not possible, sub-samples were prepared and stored frozen until all sub-samples were available and the composite sample could be produced. Where sub-samples were purchased over two seasons, sub-samples from each season were prepared and stored frozen at -40°C until all sub-samples were available. Once all season samples had been collected they were thawed and mixed in equal proportions to produce the final composite sample.
- Composite samples for analysis of vitamin C and folate in fresh fruit and vegetables consisted of sub-samples that were chopped into chunks and frozen immediately. Samples were delivered to the laboratory for analysis as soon as possible and were homogenised at the laboratory prior to analysis.
- Ingredients, label claims and nutrient information presented in this report have been taken directly from product packaging.

Composite sample list

Sample Number	Sample Name	Description
1	Potatoes, old, raw, flesh only	22 samples, autumn and winter, including white and red varieties, pre-packed and loose
2	Potatoes, old, boiled, flesh only	22 samples, autumn and winter, including white and red varieties, pre-packed and loose
3	Potatoes, old, baked, flesh and skin	22 samples, autumn and winter, including white and red varieties, pre-packed and loose
4	Potatoes, old, roasted, flesh only	11 samples, including white and red varieties, pre-packed and loose
5	Potatoes, old, potato wedges, with skin, dipped in sunflower oil, baked	11 samples, including white and red varieties, pre-packed and loose
6	Potatoes, old, microwaved, flesh and skin	11 samples, including white and red varieties, pre-packed and loose
7	Potatoes, new, boiled, flesh and skin	22 samples, autumn and winter, including UK grown and imported, pre-packed and loose
8	Carrots, old, raw	22 samples, autumn and winter, UK grown, pre-packed and loose
9	Carrots, old, boiled	22 samples, autumn and winter, UK grown, pre-packed and loose
10	Carrots, old, microwaved	22 samples, autumn and winter, UK grown, pre-packed and loose
11	Onions, raw	22 samples, autumn and winter, UK grown and imported, pre-packed and loose
12	Onions, boiled	22 samples, autumn and winter, UK grown and imported, pre-packed and loose
13	Onions, fried	11 samples, UK grown and imported, pre-packed and loose
14	Broccoli (Calabrese), raw	22 samples, autumn and winter, UK grown and imported, pre-packed and loose

Nutrient analysis of fruit and vegetables

Sample Number	Sample Name	Description
15	Broccoli (Calabrese), boiled	22 samples, autumn and winter, UK grown and imported, pre-packed and loose
16	Broccoli (Calabrese) steamed	22 samples, autumn and winter, UK grown and imported, pre-packed and loose
17	Mushrooms, raw	11 samples, closed cap and button, UK grown and imported, pre-packed and loose
18	Mushrooms, stewed	11 samples, closed cap and button, UK grown and imported, pre-packed and loose
19	Mushrooms, cooked in sunflower oil	11 samples, closed cap and button, UK grown and imported, pre-packed and loose
20	Sweetcorn, kernels, boiled 'on the cob'	16 samples, autumn and winter, UK grown and imported
21	Cabbage, white, raw	19 samples, autumn and winter, UK grown and imported, pre-packed and loose
22	Cabbage, green, raw	22 samples, autumn and winter, UK grown and imported, pre-packed and loose
23	Cabbage, green, boiled	22 samples, autumn and winter, UK grown and imported, pre-packed and loose
24	Cauliflower, raw	22 samples, autumn and winter, UK grown and imported, pre-packed and loose
25	Cauliflower, boiled	22 samples, autumn and winter, UK grown and imported, pre-packed and loose
26	Beans, green, raw	22 samples, autumn and winter, UK grown and imported, pre-packed and loose
27	Beans, green, boiled	22 samples, autumn and winter, UK grown and imported, pre-packed and loose
28	Pak choi, steamed	16 samples, autumn and winter, UK grown and imported
29	Tomatoes (standard),raw	22 samples, autumn and winter, UK grown and imported, 'on the vine' and loose

Nutrient analysis of fruit and vegetables

Sample Number	Sample Name	Description
30	Tomatoes (standard), grilled, flesh and seeds only	22 samples, autumn and winter, UK grown and imported, 'on the vine' and loose
31	Tomatoes, cherry, raw	21 samples, autumn and winter, UK grown and imported, 'on the vine' and loose
32	Lettuce, average, raw	22 samples, autumn and winter, UK grown and imported, including shredded, Iceberg, Romaine and Little Gem
33	Spinach, baby, raw	16 samples, autumn and winter, UK grown and imported
34	Rocket, raw	19 samples, autumn and winter, UK grown and imported
35	Cucumber, flesh and skin, raw	22 samples, autumn and winter, UK grown and imported
36	Pepper, red, raw	22 samples, autumn and winter, UK grown and imported, pre-packed and loose
37	Pepper, red, boiled	22 samples, autumn and winter, UK grown and imported, pre-packed and loose
38	Pepper, yellow, raw	22 samples, autumn and winter, UK grown and imported, pre-packed and loose
39	Bananas, raw, flesh only	11 samples, including Fairtrade and organic, pre-packed and loose.
40	Apples, eating, raw, flesh and skin	22 samples, autumn and winter, UK grown and imported, pre-packed and loose, including Gala, Braeburn, Golden Delicious, Pink Lady, Cox, Granny Smith
41	Apples, cooking, stewed, flesh only	22 samples, autumn and winter, UK grown pre-packed and loose, including Bramley and unspecified varieties
42	Pears, raw, flesh and skin	22 samples, autumn and winter, UK grown and imported, pre-packed and loose, including Conference, Comice, Concorde, Rocha, Green Williams

Nutrient analysis of fruit and vegetables

Sample Number	Sample Name	Description
43	Grapes, green, raw	21 samples, seedless, autumn and winter, including Thompson and unspecified varieties
44	Grapes, red, raw	21 samples, seedless, autumn and winter, including Crimson, Flame
45	Strawberries, raw	19 samples, summer and autumn, UK grown and imported, including Elsanta, Sonata, Ava, Portola and unspecified varieties
46	Blueberries, raw	21 samples, summer and winter, UK grown and imported
47	Citrus fruit, soft/easy peelers, flesh only	22 samples, early and late winter, including clementines, mandarins, satsumas and tangerines
48	Oranges, flesh only	22 samples, early and late winter, including Navel and Valencia
49	Melon, yellow flesh, flesh only	22 samples, Honeydew, autumn and winter, whole and pre-prepared slices
50	Peas, frozen, raw	12 samples, 8 brands, garden peas and petit pois
51	Peas, frozen, microwaved	12 samples, 8 brands, garden peas and petit pois
52	Sweetcorn, canned in water, drained	12 samples, 8 brands
53	Tomatoes, canned, whole contents	12 samples, 9 brands, whole and chopped
54	Tomato puree	9 samples, 8 brands
55	Baked beans in tomato sauce	16 samples, 9 brands
56	Potato products, shaped, frozen, baked	10 samples, 5 brands, including waffles, smiley faces, letters
57	Orange juice, chilled (premium and from concentrate)	10 samples, 8 brands, including 'smooth' and 'with bits'

Nutrient analysis of fruit and vegetables

Sample Number	Sample Name	Description
58	Orange juice, from concentrate, ambient	11 samples, 9 brands, including 'smooth' and 'with bits'
59	Apple juice, clear, from concentrate, ambient and chilled	10 samples, 9 brands

Nutrient analysis of fruit and vegetables

Composite Sample Number: 59

Composite Sample Name: Apple juice, clear, from concentrate, ambient and chilled

Sub-sample Number: 59.6

Sub-sample Name: Tesco Value, pure apple juice, from concentrate

Brand: Tesco Value

Pack size: 1 litre

Purchase Date: 30.01.2012

Place of Purchase: Tesco, Blue Boar Road, Norwich

Display Until Date: 07 Feb

Use By Date: 09 Feb

Batch Number: P18380002A X310 08:38

Packaging: Plastic

Sample Condition As Purchased: Chilled

Post Purchase Storage: Refrigerated

Sample Preparation

Purchased samples were stored according to packing guidelines and usual consumer practices. Ambient products were stored at room temperature and chilled products were refrigerated at 4°C. Frozen products were stored at -20°C and either thawed before use or cooked from frozen, depending on product guidelines. Details of all sub-samples were recorded prior to preparation of composite samples and all samples including packaging, ingredient and nutrition information were photographed.

Where further sample preparation or cooking was required, samples were prepared according to packaging instructions or based on guidance for consumers provided by a range of sources including industry trade associations. Equal weights of un-homogenised sub-samples were combined to form single composite samples. The composite samples were homogenised as thoroughly as possible and were split into sub-samples of approximately 100g each. Composite samples were stored frozen at -40°C before being sent to laboratories for analysis. Where possible all sub-samples within a composite sample were prepared in a single day and the composite sample was produced on the same day. Where that was not possible, sub-samples were prepared and stored frozen until all sub-samples were available and the composite sample could be produced. Where sub-samples were purchased over two seasons, sub-samples from each season were prepared and stored frozen at -40 °C until all sub-samples were available. Once all sub-samples had been collected from both sampling points, they were thawed and mixed in equal proportions to produce the final composite sample for analysis of all nutrients except vitamin C and folate. Analysis for these labile nutrients was undertaken at the time of seasonal sampling and subsamples were chopped into chunks and frozen immediately. Samples were delivered to the laboratory for analysis of folate and vitamin C as soon as possible and were homogenised at the laboratory prior to analysis.

Details for each sample are given below, including weight changes on cooking and edible portion measurements.

Sample 1: Potatoes, old, raw, flesh only

Potatoes were rinsed in Analar water, dried and peeled. Each sub-sample was taken from quarters of 4-6 potatoes.

Average weight of whole potato = 161.2g

Average edible portion = 0.85

Edible portion weights

Sub-sample number	Average weight of whole potato (g)	Average weight of skin (g)	Average weight of other inedible parts (g)	Average edible portion

1.22	147.0	19.6	0.0	0.87

Sample 2: Potatoes, old, boiled, flesh only

For each sub-sample, 4-6 potatoes were rinsed in Analar water, peeled, cut into quarters to boil, and simmered for 10-25 minutes, according to packaging instructions, where given. Average weight change on cooking = -9.6% (excluding sub-samples 2.5 and 2.10 which partly disintegrated during boiling).

------	------	---------------------------------	-------	-------	-----

Sample 8: Carrots, old, raw

For each sub-sample, carrots were rinsed in Analar water, dried, weighed, 'topped' and if necessary 'tailed'. To reflect the mixed consumer approach to peeling, approximately half of the sub-samples were peeled. Carrots were halved and sections from outside to inside were taken from top and bottom halves.

Average weight of whole carrot = 94.6g

Average weight of whole carrot, October sub-samples (8.1-8.11) = 84.4g

Average weight of whole carrot, January sub-samples (8.12-8.22) = 104.9g

Average edible portion of peeled carrots (excluding ready prepared) = 0.71

Average edible portion of unpeeled carrots (excluding ready prepared) = 0.91

Sample 9: Carrots, old, boiled

For each sub-sample, carrots were rinsed in Analar water, dried, weighed, ‘topped’ and if necessary ‘tailed’. To reflect the mixed consumer approach to peeling, approximately half of the sub-samples were peeled. Carrots were cut into batons or circular slices before adding to boiling water and were simmered for 5-10 minutes (except for subsample 9.2 which was boiled from cold as per pack instructions).

Average weight of carrot baton (60 batons from 6 subsamples) = 5.8g

Average weight of carrot slice (50 slices from 5 subsamples) = 6.9g

Average weight change on cooking = -12.6%

Sample 29: Tomatoes (standard), raw

For each sub-sample, tomatoes were taken from 2 packs. Stalks were removed and tomatoes were rinsed in Analar water and dried before taking from quarters from at least 8 tomatoes for each sub-sample. Average tomato and stalk weights were determined by weighing the whole pack contents and total stalk and tomato weights per pack.

For subsample 29.9 the pack contained a mixture of sizes of tomatoes, including cherry tomato sized and these smaller tomatoes were not used for sampling or weight calculations.

Average weight of individual tomatoes = 86.9g

Average weight of tomato slice = 12.7g

Average edible portion for tomatoes with stalk/stem = 0.99

29.22	106.3	0.1	1.00

Sample 30: Tomatoes (standard), grilled, flesh and seeds only

For each sub-sample, 8 tomatoes were taken from 2 packs. Stalks were removed and tomatoes were rinsed in Analar water and dried before halving. Tomatoes were grilled (medium-high) for 2-3 minutes with the cut side down, and then 4-6 minutes with the cut side up. After grilling, the skins (and the harder 'stalky core' for subsamples 30.12-30.22) were removed.

For subsample 30.9 the pack contained a mixture of sizes of tomatoes, including some cherry tomato sized and these smaller tomatoes were not used.

A good range of 'firm' to 'well done' was achieved within and between subsamples, due to differences in size, ripeness and top/bottom of tomatoes.

Nutrient analysis of fruit and vegetables

Sample 31: Tomatoes, cherry, raw

For each sub-sample, tomatoes were taken from 2 packs. Stalks were removed and tomatoes were rinsed in Analar water and dried.

Average weight of individual cherry tomato = 15.0g

Average edible portion for tomatoes on the vine = 0.99

Average edible portion for tomatoes with stalks = 1.00

Edible portion weights

Nutrient analysis of fruit and vegetables

Sample 45: Strawberries, raw

For each sub-sample, strawberries were rinsed in Analar water and dried and the stalks were removed by pulling out or cutting off. Sections of strawberries were taken from at least 9 fruits.

Average weight of whole strawberry = 15.6g

Average edible portion = 0.94

Edible portion weights

Sub-sample number	Average weight whole strawberry (g)	Average weight stalk	Edible portion
45.1	13.1	0.5	0.96

Sample 46: Blueberries, raw

Blueberries were rinsed in Analar water and dried before sampling.

Average weight of whole blueberry = 1.8g

Average edible portion = 1.00

Nutrient analysis of fruit and vegetables

Sample 47: Citrus fruit, soft/easy peelers, flesh only

For each sub-sample, segments from 5 fruits were used.

Pips were found in some of the fruit, in some sub-samples, and were removed before sampling.

Average weight of whole fruit = 93.4g

Average weight of whole segment = 7.4g

Average edible portion = 0.78

Edible portion weights

¹A central 'pithy core', found in the centre of the base of the fruit, was weighed separately from peel in January subsamples (48.12-48.22) only.

Nutrient analysis of fruit and vegetables

Sample 49: Melon, yellow flesh, flesh only

For each sub-sample, melons were cut and seeds and skin were removed. Sections from 2 melons were used.

Average weight whole fruit = 1459.2g

Average weight whole slice = 187.3g

Average edible portion of melons purchased whole = 0.58

Average edible portion per slice (i.e. with skin and flesh, no seeds) = 0.62

Sample 50: Peas, frozen, raw

For each sub-sample, frozen peas from 2 bags were sampled.

Sample 51: Peas, frozen, microwaved

For each sub-sample peas from 2 packs were placed in a covered container and microwaved on full power (1000W), according to packaging instructions, where given. Cooked peas were drained to remove excess liquid.

Average weight change on cooking = -7.0%

Weight changes on cooking

Sample 54: Tomato puree

For each sub-sample, puree from 2 tubes or pots were used for sampling.

Sample 55: Baked beans in tomato sauce

For sub-sample 55.7, a portion of the large can was taken for heating after thorough mixing of can contents. For all other sub-samples, contents of the whole can were used.

For each subsample beans were heated by either warming on the hob or microwaving. Samples heated on the hob were heated for 2.5-4 minutes, without boiling, according to packaging instructions, where given, or for 3 minutes where not given. Microwave heated samples were covered and heated on high (1000W) for 50 seconds-3 minutes, according to packaging instructions, where given. 'Snack pots' samples were microwaved in the pot according to packaging instructions.

Average weight change on heating = -4.9%

Weight changes on cooking
