Table updated February 2014

Notes on the Table

Income and tax by Parliamentary Constituency, 2011-12

- Estimates for sub-UK geographical areas (eg by country, region, county etc) should be treated with particular caution (see Personal Incomes Statistics release Annex B).
- Parliamentary constituency refers to Westminster Parliamentary constituencies.
- The notes to Table 3.11 also apply to this table. The self-employment counts are based on the same definition as used in Table 3.6. This table gives mean and median measures for total income and two of its major components and total tax for each parliamentary constituency. Generally in the income columns the mean is higher than the median because comparatively few people have incomes that are significantly above the average. An average for a type of income (i.e. employment income) can be larger than the average total income as it only relates to those individuals who have income of that type.
- Self employment income is profit chargeable under the Income Tax (Trading and Other Income) Act 2005 less losses brought forward and capital allowances allowed. The number of individuals with self employment income shown in this table is lower than that shown in Table 3.10. In this table only individuals who are liable to tax in 2011-12 are included, whereas Table 3.10 includes all people with a self employment source in 2011-12. Employment income includes all pay from employment, from taxable benefits and from unemployment benefit, income support or Jobseeker's Allowance. In previous years we have used as our definition of self-employed, those who have non-zero profits, capital allowances or losses brought forwards. From 2003-04 we have changed the definition to encompass all taxpayers who have a self-employment source.
- Incomes are allocated to regions and countries according to the residence of the recipient. The postcode has been used to determine the county and hence the region for the overwhelming majority of cases. Some members of the Forces and Merchant Navy, together with a small number of people serving overseas and people with overseas addresses have not been allocated to regions, but have been included in the UK figures. There are also a small number of people in the sample where it was not possible to identify their postcode and therefore identify the correct region. These have also been included in the UK figures. This explains why the regional amounts do not add up to the UK total.
