

Youth Crime: Young people aged 10-17 receiving their first reprimand, warning or conviction, 2000-01 to 2009-10

Ministry of Justice Statistics bulletin

Published 14 October 2010

Youth Crime: Young people aged 10-17 receiving their first reprimand, warning or conviction, 2000-01 to 2009-10

Introduction

This bulletin provides information on the number and rate of young people aged 10-17 receiving their first reprimand, warning or conviction, 2000-01 to 2009-10. It is based on data recorded on the Police National Computer (PNC). Further information on how the data have been aggregated can be found in the notes at the end of this bulletin.

These figures update those found in the publication entitled "Youth Crime: Young people aged 10-17 receiving their first reprimand, warning or conviction, in England, 2000-01 to 2008-09" released on 26th November 2009 by the former Department for Children, Schools, and Families and the subsequent six-monthly release on 10th June 2010 by the Department for Education. The Ministry of Justice has now taken responsibility for publishing these figures.

There are two main series of data presented in this document. The primary series covers young people aged 10-17 receiving their first reprimand, warning or conviction by area of residence, 2000-01 to 2009-10. The secondary series covers young people aged 10-17 receiving their first Penalty Notice for Disorder (PND), reprimand, warning or conviction by area of residence, 2004-05 to 2009-10. This publication also includes some breakdowns by age, gender, outcome and offence type and well as a breakdown by local area.

PNDs were introduced for use with 16-17 year olds in January 2004 and are included in some other published crime statistics. They have been provided here to aid interpretation since some offences which may have formerly have attracted a reprimand, warning or conviction could now be handled using PNDs.

Within this document the term *first time young offenders* has been used occasionally to refer to young people aged 10-17 receiving their first reprimand, warning or conviction (including PNDs only where specified), for the sake of brevity.

Key Points

The rate of young people aged 10-17 receiving their first reprimand, warning or conviction per 100,000 10-17 year old population, living in England fell to 1,160 in 2009-10, a decrease of 22% from the rate of 1,480 per 100,000 in 2008-09. However, there had previously been an increase from 1,510 in 2002-03 to a peak of 2,040 in 2006-07. The majority of the rise and fall of these figures over the period 2001-02 to 2009-10 is related to the use of out of court disposals (i.e. reprimands and warnings).

The number of young people aged 10-17 receiving their first reprimand, warning or conviction, living in England, currently stands at 57,291 for 2009-10, a decrease of 23% from 74,588 young people in 2008-09.

Penalty Notices for Disorder

The trends in the statistics including and excluding PNDs are very similar. The rate of young people aged 10-17 receiving their first PND, reprimand, warning or conviction per 100,000 10-17 year old population, living in England, increased from 1,780 in 2004-05 to 2,180 in 2006-07. However, in the last three years there has been a fall in this rate to 1,220 per 100,000 in 2009-10 – a decrease of 23% in the last year (from 1,590 in 2008-09).

The number of young people aged 10-17 receiving their first PND, reprimand, warning or conviction in England currently stands at 60,436 for 2009-10. This is a decrease of 24% from 79,789 young people in 2008-09. The decreases in the last year of the series including PNDs are very similar to the decreases in the series which excludes PNDs.

CHARTS

- Chart 1 Rate of young people aged 10-17 receiving their first reprimand, warning or conviction (including and excluding PNDs) per 100,000 10-17 year old population, living in England, 2000-01 to 2009-10
- Chart 2 Number of young people aged 10-17 receiving their first reprimand, warning or conviction (including and excluding PNDs) living in England, 2000-01 to 2009-
- Chart 3 Rate of young people aged 10-17 receiving their first reprimand, warning or conviction per 100,000 10-17 year old population, living in England or Wales by region, 2009-10
- Chart 4 Percentage change between 2008-09 and 2009-10 in the rate of young people aged 10-17 receiving their first reprimand, warning or conviction per 100,000 10-17 year old population, living in England or Wales by region
- Chart 5 Number of young people aged 10-17 receiving their first reprimand, warning or conviction, processed by English or Welsh police forces, split by gender, 2000-01 to 2009-10
- Chart 6 Number of young people aged 10-17 receiving their first reprimand, warning or conviction, processed by English or Welsh police forces, split by age group, 2000-01 to 2009-10
- Chart 7 Number of young people aged 10-17 receiving their first reprimand, warning or conviction, processed by English or Welsh police forces, split by outcome, 2000-01 to 2009-10
- Chart 8 Number of young people aged 10-17 receiving their first reprimand, warning or conviction, processed by English or Welsh police forces, split by offence class, 2000-01 to 2009-10

TABLES

- Table 1 Number of young people aged 10-17 receiving their first reprimand, warning or conviction (including and excluding PNDs), 2000-01 to 2009-10
- Table 2 Number of young people aged 10-17 receiving their first reprimand, warning or conviction, processed by English or Welsh police forces, split by outcome and sentence, 2000-01 to 2009-10
- Table 3 Number of young people aged 10-17 receiving their first reprimand, warning or conviction by Local Authority of residence, 2000-01 to 2009-10
- Table 4 Rates of young people aged 10-17 receiving their first reprimand, warning or conviction per 100,000 10-17 year old population by Local Authority of residence, 2000-01 to 2009-10
- Table 5 Number of young people aged 10-17 receiving their first reprimand, warning or conviction by YOT of residence for YOTs non-coterminous with local authorities, 2000-01 to 2009-10
- Table 6 Rates of young people aged 10-17 receiving their first reprimand, warning or conviction per 100,000 10-17 year old population by YOT of residence for YOTs non-coterminous with local authorities, 2000-01 to 2009-10
- Table 7 Number of young people aged 10-17 receiving their first reprimand, warning or conviction by processing Police Force Areas, 2000-01 to 2009-10
- Table 8 Rates of young people aged 10-17 receiving their first reprimand, warning or conviction per 100,000 10-17 year old population by processing Police Force Areas, 2000-01 to 2009-10

Chart 1 Rate of young people aged 10-17 receiving their first reprimand, warning or conviction (including and excluding PNDs) per 100,000 10-17 year old population, living in England, 2000-01 to 2009-10

Chart 2 Number of young people aged 10-17 receiving their first reprimand, warning or conviction (including and excluding PNDs) living in England, 2000-01 to 2009-10

Note that PNDs were only introduced for those aged 16-17 in January 2004.

Charts 1 and 2 show the similar trends between the two series considered in this report. The series which includes the PNDs in the count obviously shows slightly higher numbers but both have seen a similar level of decline in recent years. This similarity between the

two series suggests that, in general, it is not the case that the numbers of first reprimands, warnings or convictions have decreased because PNDs are being used instead.

Chart 3 Rate of young people aged 10-17 receiving their first reprimand, warning or conviction per 100,000 10-17 year old population, living in England or Wales, by region, 2009-10

Chart 3 shows that the rates of first time young offenders vary between regions, with the West Midlands and the South West having the lowest rates and the North East having the highest.

Chart 4 Percentage change between 2008-09 and 2009-10 in the rate of young people aged 10 - 17 receiving their first reprimand, warning or conviction per 100,000 10-17 year old population, living in England or Wales, by region

Chart 4 shows that despite having the highest rate of first time young offenders in 2009-10, the North East region has also seen the largest falls in these rates between 2008-09 and 2009-10, followed by West Midlands and the South West.

Table 1 Number of young people aged 10-17 receiving their first reprimand, warning or conviction (including and excluding PNDs), 2000-01 to 2009-10

		1		Fir	nancial Ye	ear	,	1	,	
Number of young people aged 10-17 receiving their first	2000-01	2001-02	2002-03	2003-04	2004-05	2005-06	2006-07	2007-08	2008-09	2009-10
reprimand, warning or conviction, living in England.	84,326	83,228	77,790	82,713	90,403	101,440	104,233	94,361	74,588	57,291
PND, reprimand, warning or conviction, living in England.	-	-	-	-	92,360	106,700	111,587	101,046	79,789	60,436
reprimand, warning or conviction, processed by English or Welsh police forces.	89,857	88,902	83,266	88,213	95,670	107,187	110,188	100,105	79,851	61,422
PND, reprimand, warning or conviction, processed by English or Welsh police forces.	-	-	-	1	97,720	112,730	118,164	107,269	85,354	64,761

As PNDs were only introduced for use with 16–17 year olds in January 2004 the data series including PNDs starts at 2004-05.

Table 1 shows the numbers of young people receiving their first reprimand, warning or conviction who were *living in* England (top two lines – as in Chart 2) and the numbers who

had their cases *processed by* English or Welsh police forces (bottom two lines) – see Notes 3-6 for further details on residency-based analyses.

The analysis at Charts 1-4 has been based on first time young offenders *living in* the areas indicated. In addition, the breakdown by local authorities (LAs) and Youth Offending Team (YOT) areas that are not coterminous with LAs (Tables 3-6) are based on first time young offenders *living in* those defined areas. However, the analysis by police force area (Tables 7-8) and the following breakdown of characteristics in Charts 5-8 are all based on first time young offenders *processed by* the given police force area.

Chart 5 Number of young people aged 10-17 receiving their first reprimand, warning or conviction, processed by English or Welsh police forces, split by gender, 2000-01 to 2009-10

Chart 5 shows that the majority of young people aged 10-17 receiving their first reprimand, warning or conviction are male. Males and females have followed similar trends but the gender gap has closed slightly – the proportion of young male first time offenders moving from 72.5% in 2000-01 to 67.1% in 2009-10. The number of male first time young offenders fell slightly more sharply than the number of females over the last 3 years.

Chart 6 Number of young people aged 10-17 receiving their first reprimand, warning or conviction, processed by English or Welsh police forces, split by age group, 2000-01 to 2009-10

Chart 6 shows that in 2009-10 16-17 year olds were the largest group of first time offenders (24,266) closely followed by 14-15 year olds (23,382). There has been a similar trend across all four of these age groups, with all showing a decrease in numbers since 2006-07, a particularly sharp decrease in the 14-15 age group.

Chart 7 Number of young people aged 10-17 receiving their first reprimand, warning¹ or conviction, processed by English or Welsh police forces, split by outcome, 2000-01 to 2009-10

Chart 7 shows that the majority of first time young offenders receive a reprimand. This category shows a substantial decrease since 2006-07 (from 86,675 to 46,402). The other categories have also shown a downward trend in recent years. This is in line with the recent fall in the issuing of out of court disposals across all age groups in England and Wales.

Table 2 Number of young people aged 10-17 receiving their first reprimand, warning¹ or conviction, processed by English or Welsh police forces, split by outcome and sentence, 2000-01 to 2009-10

Other	456	441	239	192	169	234	225	185	240	385

Reprimands and warnings replaced cautions for juveniles from 1st June 2000.

Table 2 shows that, since 2002-03, the vast majority of these young people who were convicted received a community sentence – the proportion fluctuated from a minimum of 80.8% to a maximum of 83.8%. However the number of these young people receiving a conviction has seen a downward trend since 2005-06.

Chart 8 Number of young people aged 10-17 receiving their first reprimand, warning or conviction, processed by English or Welsh police forces, split by offence class, 2000-01 to 2009-10

warning figures include some offenders recoded by the police as receiving cautions for 2001 onwards

9

Chart 8 shows the breakdown of the first time young offender's primary offence into the six classes with the highest number of offenders (this accounts for 93% of these offenders in 2009-10).

The most common offences committed by first time young offenders fall into the category of "summary offences excluding motoring". The most common two offences within this category in 2009-10 were assault and criminal damage which between them made up 68.6% of the offences in this category. Within the "theft and handling stolen goods" category, 72.9% of the offences in 2009-10 were cases of young first time offenders shoplifting.

¹ These are estimated figures. Juveniles receiving these disposals for the first time have been mapped to individual Local Authorities using the home address or postcode 2 The allocation model described in note 1 means that the number of 10-17 year old first-time entrants estimated to be in each Local Authority may not be whole numbers. Local 3 Figures for areas with less than ten first-time entrants aged 10-17 to the criminal justice system in any year have been suppressed and are denoted by "..", not applicable vales 4 Figures are provisional and subject to later revision as more information is recorded by the police.

Table 4 Rates of young people aged 10-17 receiving their first reprimand, warning or conviction per 100,000 10-17 year old population by Local Authority of residence, 2000-01 to 2009-10

¹ These are estimated figures. Juveniles receiving these disposals for the first time have been aggregated to Police Fore Area using the processing police force recoded on the PNC.

² Figures for areas with less than ten first-time entrants aged 10-17 to the criminal justice system in any year have been suppressed and are denoted by "..", not applicable vales are denoted by "-".

³ Figures are provisional and subject to later revision as more information is recorded by the police.

Table 8 Rates of young people aged 10-17 receiving their first reprimand, warning or conviction per 100,000 10-17 year old population by processing Police Force Areas, 2000-01 to 2009-10

¹ These are estimated figures. Juveniles receiving these disposals for the first time have been aggregated to Police Fore Area using the processing police force recoded on the PNC.

² Figures for areas with less than ten first-time entrants aged 10-17 to the criminal justice system in any year have been suppressed and are denoted by "..", not applicable vales are denoted by "-".

³ Figures are provisional and subject to later revision as more information is recorded by the police.

⁴ Figures for the number of 10-17 year olds in the population are from mid-year population estimates produced by the Office for National Statistics.

⁵ Rates for the City of London look high, even though the number of cases processed by the City of London police force area are fairly low, since the population of 10-17 year olds living in this area are very small.

Explanatory notes

Definitions

- 1. There are two main series of data considered in this document. The primary series covers young people aged 10-17 receiving their first reprimand, warning or conviction and the secondary series covers young people aged 10-17 receiving their first Penalty Notice for Disorder (PND), reprimand, warning or conviction.
- 2. The rates of young people per 100,000 in the population aged 10-17 receiving one of the relevant disposals are based on Office for National Statistics mid-year population estimates. For each financial year, the mid-year population estimate for the first year has been used. For example, the 2008 mid-year population estimate has been used to calculate the rate in 2008-09.

Calculation of Local Area Figures

- 3. The Local Authority (LA) figures in this release have been calculated by mapping individuals to Local Authorities using the home address or postcode recorded by police on the Police National Computer (PNC). For those with no address recorded, the postcode of where the offence was committed has been used. For those with no home address information or postcode of where the offence was committed, a model based on the patterns of offenders dealt with by police stations has been used to allocate offenders to Local Authorities.
- 4. The headline figures shown in this document relate to young people living in England. These England only figures are calculated by aggregating the figures for the English LAs. Similarly, the breakdowns by other areas of residence are an aggregation of the relevant LA figures.
- 5. Since the police force area processing the case is recorded on the PNC dataset, the breakdown by police force area has been calculated using the processing police force area directly from the dataset. Published figures on crime often refer to cases processed by English or Welsh police forces so, for comparability, the figures (in Table 1) show young first time offenders processed by English or Welsh police forces alongside young first time offenders living in England.
- 6. There has been an improvement over time in the recording of address information on the PNC, as well as improvements made to the geographical software used to allocate cases to Local Authorities. The result has been less reliance on the allocation model in the later years considered in this release. As can be seen from the following table, in 2000-01, 87.3% of the cases in the dataset had sufficient home address, postcode or postcode of where the offence was committed to map them to Local Authorities. This proportion increased to 95.9% in 2009-10 - made up of 92.6% of cases mapped to LAs using the recorded home address or postcode and 3.3% mapped using the postcode of where the offence was committed.

Matched to LA by	Financial Year									
	2000-01	2001-02	2002-03	2003-04	2004-05	2005-06	2006-07	2007-08	2008-09	2009-10
Home Address	79.9%	81.0%	81.9%	82.7%	84.0%	85.8%	86.7%	91.5%	93.7%	92.6%
Offence Postcode	7.4%	8.3%	9.3%	9.3%	8.1%	6.1%	4.5%	3.0%	2.7%	3.3%
Allocation Model	12.7%	10.7%	8.8%	7.9%	7.9%	8.1%	8.8%	5.5%	3.6%	4.1%
not via allocation model	87.3%	89.3%	91.2%	92.1%	92.1%	91.9%	91.2%	94.5%	96.4%	95.9%

7. In a small number of instances the LA level data show lower numbers when including PNDs than excluding PNDs. This is counter-intuitive but can result from offenders receiving a PND, then receiving a reprimand, warning or conviction in a subsequent year. There may also be a small number of cases which the allocation model allocates to different LAs due to differing address distributions in the datasets.

Rounding and Suppression

- 8. The allocation model described above means that the number of first time young offenders estimated to be in each Local Authority may not be whole numbers. Figures given in the tables are rounded to whole numbers and therefore may not sum exactly to the totals displayed.
- 9. Local Authority, Government Office Region YOT and Police Force Area rates given in the tables in this release are rounded to the nearest ten.
- 10. All figures with less than ten first time young offenders in any year have been suppressed.
- 11. The following symbols have been used throughout the tables in this bulletin:
 - = Not applicable
 - 0 = Nil
 - .. = Suppressed due to low numbers

Data Source, Coverage and Quality

12. The figures presented in this release have been taken from the Ministry of Justice's extract from the PNC, the operational database used by all police forces in England and Wales. The PNC covers 'recordable' offences, which are defined as offences that can attract a custodial sentence plus some additional non-custodial offences defined in legislation. Some non-recordable offences are also included on the PNC, particularly when they accompany recordable offences in the same case. Like any other large scale administrative database, the PNC is subject to delays and errors on data entry and processing. All the figures shown in this release may be subject to later revision as more information is recorded by the police. The recording of PNDs on the PNC by some police forces is known to have been incomplete, particularly during the early years.

- 13. In January 2004, PNDs (which had previously been used for those aged 18 and over) were extended for use with 16-17 year olds for minor disorder offences. PNDs are excluded from the primary figures in this Statistical Release but are included in the "Offences Brought to Justice" (OBTJ) statistics which are published in the annual "Criminal Statistics" document by the Ministry of Justice (MoJ). The latest version currently available is the 2008 Criminal Statistics publication which can be found at: http://www.justice.gov.uk/publications/criminalannual.htm. The 2009 Criminal Statistics publication is due to be released on 21st October 2010. OBTJ statistics are a count of total offences whereas the youth crime statistics in this document are a count of offenders who have entered into this series for the first time. A fuller comparison of the differences between the statistics can be found at: http://www.dcsf.gov.uk/rsgateway/DB/STR/d000864/index.shtml.
- 14. In addition to the main series of statistics, this document also contains a second series which includes PNDs for 16-17 year olds on the PNC dataset to allow easier interpretation of the figures alongside the OBTJ figures. The OBTJ figures include PNDs only for the four notifiable offences for which they can be issued and these make up the majority of the PNDs recorded on the PNC. However, PNDs can be issued for a larger range of offences and the full range is included in the statistics in this bulletin.
- 15. The Youth Justice Board (YJB) have published the number of first-time entrants aged 10-17 to the criminal justice system. The YJB figures were aggregated from data collected from Youth Offending Teams (YOTs). The discrepancies between the figures published by YJB and those in this release reflect a difference in coverage (the YJB statistics relate to England and Wales, whilst the headline series of statistics in this publication relate to England only) and data leakage/date discrepancies between police and YOT. This generally results in YOTs recording a lower number of juvenile first-time entrants to the criminal justice system than those logged on the PNC. However, recent data suggest that this discrepancy between PNC and YOT figures is decreasing.
