

## UNITED KINGDOM DEFENCE STATISTICS 2012

**CHAPTER 2** 

Personnel

#### INTRODUCTION

Chapter 2 contains figures on strength, intake and outflow of Armed Forces and MOD civilian personnel. It presents detailed information on the composition of personnel, including location, gender, ethnic origin, and rank/grade, plus higher-level summaries of how key trends in strengths and flows have developed over a number of years. Chapter 2 is divided into five main sections:

- **Personnel summary** (**Tables 2.1 to 2.3**) overall statistics relating to both civilians and Armed Forces personnel, including numbers by location.
- **UK Armed Forces** (**Tables 2.4 to 2.24**) summaries of the main trends in strengths, intake and outflow of personnel in the UK Armed Forces. A chart setting out the equivalent ranks in the Services and with civilians is included as Table **2.24**.
- Civilian personnel (Tables 2.25 to 2.38) summaries of the main trends in strengths, intake and outflow of civilian personnel, including breakdowns of the diversity protected characteristics.
- Compensation claims made against the MOD (Tables 2.39 and 2.40) statistics on the numbers of new and settled claims made against the MOD.
- International (Table 2.41) Manpower holdings and ceilings by member countries of the Conventional Armed Forces in Europe (CFE) Treaty.

Tables are presented showing annual figures from April 2006 where available to April 2012 and a comparative figure at April 2000 where data allow.

#### Context

The Strategic Defence and Security Review (SDSR) announced in October 2010 plans to make total reductions of around 17,000 service personnel by 2015 and decrease the MOD civil personnel by 25,000 to 60,000 by 2015, as the requirement for civilian support decreases in line with the development of new force structures, restructuring of defence capabilities, rationalisation of the defence estate and realisation of other non-front line savings.

Further reductions were announced subsequently for both the Armed Forces and Civilian workforce. With a reduction of 12,000 to the Army announced in July 2011 as a result of the Three-Month Exercise (3ME) and further Civilian workforce reductions resulting in a target of a civilian workforce of 57,000 by 2015.

Due to the personnel reductions implicated under the SDSR, monitoring of civilian personnel reductions are implemented to start at the beginning of the financial year 2010/11, therefore particular reference has been made, in the accompanying commentary, to changes in personnel numbers at and since this point.

## Armed Forces Personnel Key Points and Trends Strength

The full-time trained strength of the UK Armed Forces was 170,010 at 1 April 2012, down 6,850 (3.9 per cent) since 1 April 2011 and down 20,260 (10.6 per cent) since 1 April 2000.

The requirement for the UK full-time trained Armed Forces has decreased from 198,160 in 2000 to 179,250 in 2011 and 174,840 in 2012. Between 2000 and 2012 the rate of decrease has been greatest in the RAF, followed by the Naval Service and least in the Army.

The deficit between strength and requirement of full-time trained Armed Forces was 4,830 or 2.8 per cent at 1 April 2012. This deficit has increased from 2,400 (1.3 per cent) at 1 April 2011 and decreased from 7,880 (4.0 per cent) 1 April 2000. The increase in the deficit since 1 April 2011 is due to the planned drawdown to meet the personnel reductions set out in the SDSR.

#### Location

At 1 April 2012, 156,970 (87.3 per cent) of UK Regular Armed Forces personnel were stationed in the UK. This was a decrease of 4,820 when compared to 1 April 2011. At 1 April 2012, 22,440 personnel were stationed overseas, a decrease of 1,790 from 1 April 2011. On 1 April 2012, a further 390 UK Regular Armed Forces personnel were unallocated.

#### **Diversity**

At 1 April 2012 the percentage of Armed Forces personnel who were:

- Female was 9.7 per cent, up 0.1 percentage points from 1 April 2011.
  - Black and Minority Ethnic (BME), with known ethnic origin, was 6.9 per cent, up 0.2 percentage points from 1 April 2011.
  - Christian, with a recorded religion, was 83.5 per cent, a decrease from 84.9 per cent at 1 April 2011.
  - Of UK nationality (with a recorded nationality) was 94.9 per cent, a slight decrease from 95.1 per cent at 1 April 2011.

#### Intake/Outflow

The intake to UK Regular Forces from civil life was 14,800 in the financial year 2011/12. This was an increase of 2,070 (16.3 per cent) when compared with 2010/11.

The gain to trained strength (GTS) of the UK Regular Armed Forces was 11,320 in financial year 2011/12. This was a decrease of 2,080 (15.5 per cent) when compared to 2010/11, with a decline seen in all three Services. This reflects previous reduced intake in all three Services.

The outflow of personnel from the UK Regular Armed Forces was 21,370 in 2011/12. This was an increase of 3,240 (17.8 per cent) when compared with 2010/11, with an increase seen in each of the Services. This represents a change in recent trends where total outflow of personnel from the UK Regular Armed Forces had fallen year on year from 2006/07 to 2010/11.

#### **Civilian Personnel Key Points and Trends**

#### General

Between 1 April 2011 and 1 April 2012 the number of Level 0 civilian personnel fell by 12,050<sup>e</sup> (14.5 per cent) Full Time Equivalent (FTE) from 83,060<sup>e</sup> to 71,010<sup>e</sup>. This

net change comprised falls of 8,620 in the Level 1 civilian total, 2,240 in the Trading Fund total and 1,190<sup>e</sup> in Locally Engaged Civilians (LEC).

Between 2000 and 2010 the Level 0 MOD civilian total fell from around 121,300 in 2000, to around 85,800° in 2010; representing a 29.3 per cent decrease over the period. Between 2010 and 2012 the Level 0 MOD civilian total fell from around 85,800° to 71,000, reducing by a further 17.3 per cent.

#### Location

The number of Level 0 civilian personnel (excluding Royal Fleet Auxiliary) employed in the United Kingdom in FTE terms decreased, from 67,610 at 1 April 2011 to 57,220 at 1 April 2012. The number of Level 0 civilian personnel (excluding Royal Fleet Auxiliary) employed overseas also decreased from 12,680 at 1 April 2011 to 11,270 at 1 April 2012.

#### **Diversity**

Between 1 April 2011 and 1 April 2012 the headcount representation percentage (excluding Royal Fleet Auxiliary and LEC personnel) of:

- Black and Minority Ethnic (BME) personnel (with known ethnic origin) increased from 3.2 per cent to 3.5 per cent.
- Female personnel fell from 36.8 per cent to 36.0 per cent.
- Personnel working part-time hours fell from 10.2 per cent to 9.8 per cent.

Between 1 April 2011 and 1 April 2012 the headcount representation percentage (excluding Trading Funds, Royal Fleet Auxiliary and LEC personnel) of:

- Christian personnel fell from 71.7 per cent to 70.8 per cent, while those with non-Christian religious beliefs remained stable at 5.1 per cent.
- Secular personnel increased slightly from 23.4 per cent to 24.1 per cent.
- Lesbian, gay and bisexual personnel increased slightly from 1.4 per cent to 1.7 per cent.

#### Intake

Although the Ministry of Defence has been under a recruitment freeze since August 2010, some exemptions to this exist, where recruitment remains authorised to ensure sufficient key skills and professions remain at required levels. While Trading Funds are not exempt from the recruitment freeze, the majority of personnel employed are specialists, as such recruitment has been largely unaffected by the freeze. In the financial year 2011/12 1,380 personnel were recruited into the Department, excluding Royal Fleet Auxiliary and LEC personnel. This was a decrease of 660 on the number recruited in 2010/11, reflecting the effect of the first full year under the recruitment freeze.

#### Outflow

Within 2011/12 12,360 personnel left the Department, an increase of 7,090 on the number leaving the department in 2010/11. This is largely attributed to the effects of the implementation of the SDSR with almost half of all exits (48.1 per cent) and 63.2 per cent of Main MOD TLB exits occurring under the Voluntary Early Release Scheme (VERS) which was implemented in October 2011. An increase in the numbers of personnel leaving Trading Funds was also seen in 2011/12. Even accounting for the 1,910 Met Office personnel transferring to the Department for Business Innovation and Skills, a further 1,020 personnel left MOD Trading Funds, 220 more than in 2010/11.

#### **Changes to Chapter 2 in 2012**

#### Revisions to historic data from the Joint Personnel Administration System

DASA has recently undertaken a major review of all Armed Forces personnel data from the Joint Personnel Administration system. This has resulted in changes to the strengths, intake and outflow data reported in this publication (Tables 2.1 - 2.22), affecting the following periods:

- Naval Service: flow statistics from the period ending 30 April 2009 to the period ending 31 October 2011 and strength statistics from 1 May 2009 to 1 October 2011 (inclusive).
- Army: flow statistics from the period ending 30 April 2009 to the period ending 31 October 2011 and strength statistics from 1 May 2009 to 1 October 2011 (inclusive).
- Royal Air Force: flow statistics from the period ending 30 April 2009 to the period ending 31 October 2011 and strength statistics from 1 May 2009 to 1 October 20011 (inclusive).

Changes to headline strengths by Service ranged from fewer than 10 to approx 270. Changes to annual intake figures range from approx 40 to approx 250, and changes to annual outflow ranged from fewer than 10 to approx 200.

The revised data are the result of improved business processes developed over time. They are considered finalised and are therefore no longer marked provisional. Data from November 2011 onwards follow the improved processes and it is therefore considered no longer necessary to mark them as provisional.

#### Main changes to tables

Table **2.4** (UKDS 2011) "Strength of locally entered personnel" is no longer included in UKDS. This table provided locations of Gurkha and LEC personnel. Given the differences between these types of personnel, Gurkhas serve under the same terms and conditions as UK Regular personnel, whereas LEC have localised arrangements, it is not considered meaningful to present these together.

**Note:** Due to the removal of Table **2.4**, Tables **2.5** to **2.16** in UKDS 2011 are now presented as Tables **2.4** to **2.15**.

Table **2.15** (UKDS 2011, Table **2.16**) has been expanded. The UKDS 2011 table was a snapshot for one year. The expanded tables (**2.15a** and **2.15b**) provide a time series, one covering the Community Cadet Forces and a second covering the Combined Cadet Force.

Titles: Table **2.15a**, Community Cadet Forces strengths at 1 April in each year Table **2.15b**, Combined Cadet Forces strengths at 1 April in each year

Table **2.16** is new, providing summary intake and outflow for each Service based on Monthly Personnel Report Table 3<sup>1</sup>. This table includes for the first time in UKDS the numbers of personnel leaving the Services due to voluntary outflow and redundancy. It includes a time series showing the patterns of change in intake and outflow in each

<sup>&</sup>lt;sup>1</sup> Latest Monthly Personnel Report can be found at: http://www.dasa.mod.uk/index.php?pub=MPR

financial year.

Title: Table 2.16 Intake to and Outflow from UK Regular Forces by Service

Table **2.26** has been amended to remove Working Level Management Group data. As at 1 April 2012 Central Top Level Budget (TLB) and Chief of Joint Operations ceased to exist as TLBs; Head Office & Corporate Services and Joint Forces Command were established as TLBs. Reporting responsibility of the Met Office Trading Fund was transferred to the Department for Business Innovation and Skills (BIS) in Autumn 2011.

Table **2.27** (UKDS 2011), breakdowns by agency is no longer included in UKDS. Almost all former MOD agencies have now been subsumed into the MOD core, and after public consultation it was determined this table was no longer relevant. The table has consequently been removed.

Tables **2.28 to 2.42** in UKDS 2011 are now presented as Tables **2.27 to 2.41**, unless noted below no other changes are anticipated to these tables.

Table **2.29** in UKDS 2011 is now presented as Table **2.28**, the graph presented in the previous publication, based on declaration rate, has been replaced by a more informative graph showing the relative distribution across grades of each ethnicity category.

Table **2.30** in UKDS 2011 is now presented as Table **2.29**, the graphs presented in the previous publication, showing the strength of civilian personnel by gender and by full time or part time have been modified to show the more informative relative proportions of male to female personnel and full time to part time personnel

Table **2.33** in UKDS 2011 is now presented as Table **2.32**, the graph based on declaration rate has been replaced by a graph showing the relative distribution of religion across grades.

Table **2.34** in UKDS 2011 is now presented as Table **2.33**, the graph based on declaration rate has been replaced by a graph showing the relative distribution of sexual orientation across grades.

Tables **2.40** to **2.42** in UKDS 2011 are now presented as Tables **2.39** to **2.41**, no other changes have been made to these tables.

#### **Data sources**

The principal sources of data for personnel information presented in UKDS Chapter 2 are the civilian and Armed Forces administrative databases.

Armed Forces statistics prior to 2006 were compiled from pay records (Naval Service) or personnel records (Army and RAF) held by the Service Personnel and Veterans Agency (SPVA, formerly the Armed Forces Personnel Administration Agency). In March 2006 the transfer of all Service personnel records to the Joint Personnel Administration (JPA) system began. Statistics are compiled from JPA in the RAF from April 2006, in the Naval Service from November 2006 and in the Army from April 2007. All statistics before these points are derived from single Service legacy systems.

Armed Forces requirement statistics are those set in the Defence Planning rounds for

each year. However requirement figures in this publication may not match those published in the Defence Plans when any Service makes an approved in-year change to its requirement.

**Civilian statistics** are compiled from several sources. Data for MOD staff are taken from personnel systems; Civilian Personnel Management Information System (CIPMIS) prior to April 2003, Human Resources Management System (HRMS) from April 2004 onwards and a combination of the two in the year in between.

The MOD has three Trading Funds<sup>2</sup> that provide DASA with monthly extracts from their own personnel systems. The Royal Fleet Auxiliary (RFA) data are taken from the MOD civilian pay system and Locally Engaged Civilians (LEC) data are taken from quarterly head counts provided to DASA by administrators in each Top Level Budget (TLB).

#### **Data quality**

**Armed Forces** data on JPA are a combination of mandatory and non-mandatory fields populated by unit administrators and voluntary fields such as ethnic origin that Armed Forces personnel can choose to complete based on their self-perceptions. In 2011 the ethnicity and nationality categories were aligned with new recommended classifications in the 2011 Census of Population. If the percentage of personnel with unknown or undeclared ethnicity exceeds 40 per cent DASA consider the risk of misrepresenting ethnicity percentages is too high to publish. All Service totals are also suppressed when single Service figures have varying degrees of coverage to prevent bias towards Services with higher coverage.

As a result of improvements in the quality of data sourced from JPA and the monthly data validation processes, all data from 1 November 2011 is considered to be fit for purpose. Consequently data published from 1 November 2011 onwards are considered finalised and will no longer be marked as provisional.

Further information can be found in our background report:-

Quality Report - UK Armed Forces - Monthly, Quarterly and Annual Manning Reports

#### Quality Report - TSP 7 UK Reserves

**Civilian** data from HRMS derive from a combination of fields, some mandated by the People Pay and Pensions Agency (PPPA) such as grade, gender, TLB, while others are self-populated voluntary fields including ethnicity, disability, sexual orientation and religion. Civilian personnel complete these fields based on their self-perceptions, but are under no obligation to provide a response.

Those personnel who have not actively made a declaration may not have the same proportions as those who do make declarations, therefore the representation figures for self-declared equality and diversity fields are likely to be inherently biased, with no means of ascertaining the extent or direction of that bias. Consequently the actual

<sup>&</sup>lt;sup>2</sup> Defence Support Group (formerly Army Base Repair Organisation and the Defence Aviation and Repair Agency) Defence Science and Technology Laboratory Hydrographic Office

rates of declaration are also provided to give an indication of the proportion of personnel from which representation percentages have been obtained. It is important to use caution when considering equality and diversity representation percentages, and to consider the declaration rate simultaneously, as the accuracy of equality and diversity representation percentages cannot be fully assessed.

The disability field on the department's Human Resource Management System (HRMS) was reset on 18 April 2011 to accommodate the new disability reporting requirements resulting from the 2011 census exercise. Consequently all disability records were reset and personnel have been requested to re-declare their disability status. With disability declaration being optional, progress has been slow in personnel making new declarations. Following the HRMS reset declaration rates fell to 4.6 per cent and had only increased to 29.2 per cent by April 2012. To observe representation rates with declaration rates as low as this would not have any statistical validity. From the current rate of progress, we do not anticipate being able to report disability representation figures for the foreseeable future. In view of this, disability representation rates remain withheld for May 2011 onwards, until further notice. Data prior to this time are unaffected.

Improvements in the way in which LEC information is recorded have meant the actual FTE of part-time LECs are now available for the majority of LECs. LEC figures use these actual values where possible, with the average known FTE of part-time LECs used where this information remains unavailable.

LEC totals, and subsequently any total including Civilian Level 0 total for April 2012 are estimates due to non-availability of LEC data for Defence Equipment & Support TLB (DE&S). The figure for DE&S was estimated on the basis of the strength at the previous quarter. It should be noted the number being estimated is less than 300 individuals, and therefore the scope of any inaccuracy in the estimate, in particular when referring to totals, is likely to be negligible.

Further information can be found in our background report:-

#### **Quality Report - Civilian Personnel Statistics**

#### **National Statistics**

Most tables presented in chapter 2 are badged as National Statistics pending assessment by the UK Statistical Authority. These tables are produced in line with the standards set out in the Code of Practice for Official Statistics. The following tables require further validation of data and methods before they attain National Statistics status:

- Table 2.23 UK Regular Forces salaries: illustrative rates and indices
- Table 2.39 New claims and settled claims by broad category in each year
- Table 2.40 New claims and settled claims by broad cause in each year
- Table 2.41 Manpower holdings and ceilings by member country within the scope of the Conventional Armed Forces in Europe Treaty

Table **2.14** "Strength of the Reserve Forces" - retains National Statistics status pending review but significant concerns with data quality remain. See Table 2.14 for details.

The data in tables **2.35**, **2.36**, **2.37** and **2.38** are outside the scope of National Statistics because flows can only be reconciled to strength at Civilian Level 0. Intake and outflow are purely a record of recruitment into and departures from the department, and do not reflect movements of personnel within the Department, such as promotions and transfers. Therefore rates by grade are purely the number of people who leave the department or join each grade from outside the Department per 100 of the average headcount strength for that grade.

All Chapter 2 Tables badged as National Statistics are labelled as being within the scope of National Statistics and where relevant a link to where the latest information can be found.

#### PERSONNEL SUMMARY

## Table 2.1 Recent trends in Service and civilian personnel strengths, at 1 April each year

Between 2000 and 2010, the total number of personnel (both UK Armed Forces and civilian) fell by 15.0 per cent from around 334,000 in 2000 to around 284,000 in 2010. By 2012, the total number of personnel (both UK Armed Forces and civilian) fell by a further 9.5 per cent from around 284,000 in 2010 to around 257,100e in 2012. Between 2000 and 2010 the strength of the UK Armed Forces fell from around 212,700 to 198,200, this represents an overall decrease of 6.8 per cent over the period. Over the same period, the Level 0 MOD civilian total fell from around 121,300 in 2000, to around 85,800 in 2010; representing a 29.3 per cent decrease over the period. Between 2010 and 2012 the strength of the UK Armed Forces fell from around 198,200 to around 186,100, representing a further decrease of 6.1 per cent over the period, while the Level 0 MOD civilian total fell from around 85,800 to 71,000, reducing by a further 17.3 per cent.

As at 1 April 2000, the ratio of UK Armed Forces to civilians was 1.8:1 (civilians accounting for 36.3 per cent of total personnel). As at 1 April 2006 this ratio had increased to 1.95:1 (civilians accounting for 33.9 per cent of total personnel). By 2012 this ratio had increased to 2.6:1 (civilians accounting for 27.6 per cent of total personnel).

In the context of comparative reductions in personnel numbers across the period, while UK Armed Forces have reduced in size by 12.5 per cent since 2000, the MOD civilian population has experienced a far greater reduction of 41.5 per cent over the same period.

The MOD civilian Level 0 FTE strength has reduced substantially since 2000, from about 121,300 at 1 April 2000 to about 71,000e at 1 April 2012, a reduction of more than 50,000. The Level 0 strength reduced by a quarter from 2000 to 2008, and subsequently remained more stable with only small reductions until 2011. Further reductions have been seen since 2011, as directed by policy deriving from the Strategic Defence and Security Review (SDSR). Personnel reductions under the SDSR are set to continue until 2020 from the baseline start point of April 2010. Between April 2010 and April 2012 the overall strength in Level 1 MOD personnel fell from 65,900 to 54,500. During this period permanent non-industrial strength has fallen by 16.2 per cent and permanent industrial strength has fallen by 21.4 per cent (see Table 2.25).

Data from the Joint Personnel Administration System for 2010 and 2011 have been reviewed and finalised, therefore some figures may differ from previous publications. Please see Chapter 2 introduction for more details.

This table is a National Statistic. These statistics have previously been published in the UK Armed Forces - Quarterly Personnel Report (QPR) and the Quarterly Civilian Personnel Report (QCPR). These publications and the latest figures can be found here (<a href="http://www.dasa.mod.uk/index.php?pub=QPR">http://www.dasa.mod.uk/index.php?pub=QPR</a>), (<a href="http://www.dasa.mod.uk/index.php?pub=QPR">http://www.dasa.mod.uk/index.php?pub=QPR</a>), (<a href="http://www.dasa.mod.uk/index.php?pub=QPR">http://www.dasa.mod.uk/index.php?pub=QPR</a>).

<sup>1.</sup> Civilian Level 0 and Level 1 are defined in the Glossary.

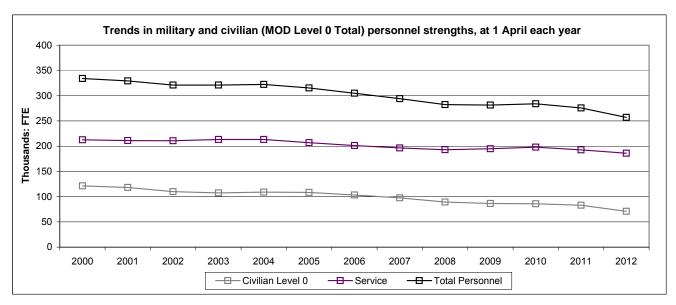

<sup>2.</sup> The following changes have affected the continuity of the civilian data: In 2001 the QinetiQ portion of the Defence Evaluation and Research Agency (8,000) was established as a private company. At 1 April 2008 the Defence Aviation Repair Agency and the Army Base Repair Organisation merged to form the Defence Support Group and around 1,000 personnel transferred to the Vector Aerospace Corporation. In October 2011 responsibility for management of the Meteorological Office personnel (1,900) transferred to Department for Business, Innovation and Skills (BIS).

<sup>3.</sup> The Home Service of the Royal Irish Regiment was officially disbanded on 31 March 2008.

### PERSONNEL SUMMARY

Chart to Recent trends in Service and civilian personnel<sup>1</sup> strengths, at 1

Table 2.1 April each year (continued)

#### PERSONNEL SUMMARY

# Table 2.2 Location of Service and civilian personnel<sup>1,2</sup> in the United Kingdom, at 1 April each year

The strength of UK-based civilian personnel has reduced from 67,610 in 2011 to 57,220 in 2012, a decrease of 15.4 per cent. The total strength of MOD service personnel based in Northern Ireland has continued to reduce, falling by 6.8 per cent since last year. Since 2000, the number of Service personnel stationed in Northern Ireland has been reduced by 55.4 per cent, from 8,390 to 3,740, whilst the civilian strength has fallen by 50.6 per cent during the same period from 3,250 to 1,610. The South East Region has the largest population of UK Service personnel, with 43,330, although the South West has the largest population of civilians, with 21,690.

Data from the Joint Personnel Administration System for 2010 and 2011 have been reviewed and finalised, therefore some figures may differ from previous publications. Please see Chapter 2 introduction for more details.

This table is a National Statistic (Latest figures http://www.dasa.mod.uk/index.php?pub=QLS).

#### PERSONNEL SUMMARY

# Table **2.3** Global locations of Service<sup>1</sup> and civilian personnel<sup>2,3</sup>, at 1 April each year

At 1 April 2012, 87.3 per cent of UK Service and 80.6 per cent of MOD civilian personnel were stationed in the UK. The number of UK military personnel stationed overseas has decreased from 37,200 in 2000 to 22,440 in 2012, a decrease of 39.7 per cent. At the same time the number of UK civilian personnel stationed overseas has decreased from 16,800 in 2000 to 11,270 in 2012, a decrease of 32.9 per cent. The percentage of UK military personnel stationed overseas has fallen from 17.4 per cent in 2000 to 12.5 per cent in 2012. Over the same period, the percentage of UK civilian personnel stationed overseas has risen from 13.9 per cent in 2000 to 15.9 per cent in 2012.

Despite the numbers stationed there falling for at least the sixth year in succession, the Germany/Belgium/Netherlands region has the second largest population of MOD personnel after the UK, with 17,480 Service and 5,950 civilians. This amounts to 77.9 per cent of UK military personnel stationed overseas and 52.8 per cent of UK civilian personnel stationed overseas.

Data from the Joint Personnel Administration System for 2010 and 2011 have been reviewed and finalised, therefore some figures may differ from previous publications. Please see Chapter 2 introduction for more details.

This table is a National Statistic (Latest figures http://www.dasa.mod.uk/index.php?pub=QLS).

- 1. Service personnel figures are for UK Regular Forces. They include all trained and untrained Personnel and exclude Gurkhas, Full Time Reserve Service personnel and mobilised reservists.
- 2. Civilian Level 0 and Level 1 are defined in the Glossary.
- 3. UK civilian totals include Trading Fund personnel but exclude RFA and LEC personnel and those with an unknown location. Overseas civilian includes LEC personnel.
- 4. Detailed break down of LEC data for 2000 are not available. The "Overseas Total" for year 2000 subsumes the total LEC figure. 2000 figures as at 1 July.
- 5. As data for locally engaged civilians cannot be separated for Germany, Belgium and the Netherlands, these countries are grouped together.
- 6. Consists of Bosnia-Herzegovina, Croatia, the Former Yugoslav Republic of Macedonia, Kosovo, Montenegro, Serbia.
- 7. The increase in civilian numbers in 2011 reflects the additional requirements for locally engaged civilian to support military exercises.
- r The overseas and unallocated groupings have changed since previous years to bring it in to line with the groupings used in Quarterly Location Statistics publication (QLS). As a result, the figures have been revised for the time series to correspond with the new groupings where possible.

#### **UK ARMED FORCES**

# Table **2.4a** Full-time trained strength<sup>1</sup> and requirement, at 1 April each year

The full-time trained strength of the UK Armed Forces was 170,010 at 1 April 2012, down 6,840 (3.9 per cent) since 1 April 2011 and down 20,260 (10.6 per cent) since 1 April 2000.

The requirement for the UK's full-time trained Armed Forces decreased from 198,160 in 2000 to 185,920 in 2006 and 174,840 in 2012. The rate of decrease has been greatest in the RAF, followed by the Naval Service and least in the Army. Contrasting with the other Services, and the Army other ranks, the requirement for Army officers increased between 2011 and 2012, and at 13,480 was higher than it was in 2000.

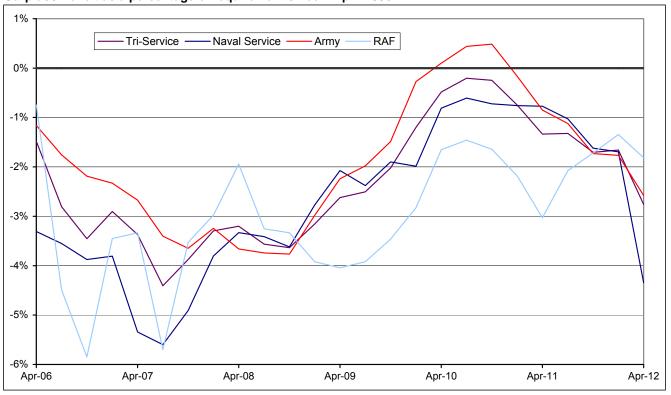

The deficit between strength and requirement of full-time trained Armed Forces has decreased from 7,880 at 1 April 2000 to 4,830 at 1 April 2012. The deficit at 1 April 2012 is mainly due to a deficit of 4,720 Other Ranks. Officers were also in deficit in 2012, having reduced in strength by 1,150 since 1 April 2011 against a slightly increased requirement. This is the first time that Officers have been in overall deficit since 2005. The largest deficit as a percentage of requirement is in the Naval Service, where the strength has fallen faster than the requirement in the last year.

Data from the Joint Personnel Administration System for 2010 and 2011 have been reviewed and finalised, therefore some figures may differ from previous publications. Please see Chapter 2 introduction for more details.

<sup>1.</sup> The full time trained strength comprises trained UK Regular Forces, trained Gurkhas and FTRS (Full Time Reserve Service) personnel. It does not include mobilised reservists.

<sup>2.</sup> From 1 April 2010 some elements of the FTRS are excluded. For a full description of FTRS please refer to the Glossary of Terms and Abbreviations at the end of this publication.

#### **UK ARMED FORCES**

# Table 2.5 Strength of UK Regular Forces by Service, and whether trained or untrained, at 1 April each year

At 1 April 2012, 92.4 per cent of UK Regular Forces personnel were trained and 7.6 per cent were in training. The percentage of personnel who were untrained had increased slightly since 2011, reflecting both an increase in intake to training (see, for example, Table 2.17) and an increase in trained outflow (see Table 2.20).

The total strength of UK Regular Forces decreased 13.4 per cent between 2000 and 2012. The RAF has seen the largest decrease 26.9 per cent, whereas the Naval Service decreased by 17 per cent and the Army decreased by just 5.3 per cent. The trained strength of UK Regular Forces decreased 10.7 per cent between 2000 and 2012. The untrained strength decreased by 36.6 per cent in the same period, with all Services seeing lower numbers of personnel in training when compared with 2000.

Data from the Joint Personnel Administration System for 2010 and 2011 have been reviewed and finalised, therefore some figures may differ from previous publications. Please see Chapter 2 introduction for more details.

#### **UK ARMED FORCES**

## Table 2.6 Strength of UK Regular Forces by Service and sex, at 1 April each year

Between 2000 and 2012 the percentage of females in the UK Regular Forces increased from 8.0 per cent to 9.7 per cent. At 1 April 2012 females accounted for 12.4 per cent of Officers and 9.1 per cent of Other Ranks.

At 1 April 2012, 9.2 per cent of Naval Service personnel, 8.2 per cent of Army personnel and 13.8 per cent of RAF personnel were female. The long term trend in all three Services is for gradual increases in the proportion of personnel who are female. The Naval Service however, has shown signs of a change in this trend, with the proportion of Officers who are female remaining constant and the proportion of Other Ranks who are female declining over the last three years.

Data from the Joint Personnel Administration System for 2010 and 2011 have been reviewed and finalised, therefore some figures may differ from previous publications. Please see Chapter 2 introduction for more details.

#### **UK ARMED FORCES**

# Table 2.7 Strength of UK Regular Forces by Service, sex and rank<sup>1</sup>, at 1 April 2012

At 1 April 2012, there were 162,430 (90.3 per cent) male and 17,370 (9.7 per cent) female UK Regular Forces personnel.

At 1 April 2012, 12.4 per cent of Officers were female. However, females are concentrated in the junior Officer ranks - females represent 14.0 per cent of personnel at Major<sup>1</sup> and below and only 5.3 per cent of those at Lieutenant Colonel<sup>1</sup> and above. This does however, represent an increase from 2011, when 4.9 per cent of the more senior Officers were female.

Among the Other Ranks, there was a lower proportion of personnel that were female (9.1 per cent), but a smaller difference between junior Other Ranks (9.5 per cent) and senior Other Ranks (7.9 per cent).

Data from the Joint Personnel Administration System for 2010 and 2011 have been reviewed and finalised, therefore some figures may differ from previous publications. Please see Chapter 2 introduction for more details.

This table is a National Statistic (Latest figures http://www.dasa.mod.uk).

#### **UK ARMED FORCES**

# Table 2.8 Strength of UK Regular Forces by Service and ethnic origin, at 1 April each year

At 1 April 2012 personnel from Black and Minority Ethnic (BME) backgrounds comprised 2.4 per cent of Officer strength and 7.9 per cent of Other Ranks strength. Whilst the strength and percentage of BME Officers has remained relatively stable since 2006 for all three Services, the Other Ranks percentage has increased from 6.1 per cent at 1 April 2006 (9,460 personnel) to 7.9 per cent at 1 April 2012 (11,580 personnel).

The Army saw the largest increase in BME Other Ranks (rising from 8.8 per cent in 2006 to 11.1 per cent in 2012), followed by the Naval Service (from 2.8 per cent to 4.0 per cent) whilst the proportion of BME personnel in the RAF fell in the same period (from 2.3 per cent to 1.9 per cent).

Data from the Joint Personnel Administration System for 2010 and 2011 have been reviewed and finalised, therefore some figures may differ from previous publications. Please see Chapter 2 introduction for more details.

#### **UK ARMED FORCES**

## Table 2.9 Strength of UK Regular Forces by Service, ethnic origin and rank<sup>1</sup>, at 1 April 2012

At 1 April 2012, within both Officers and Other Ranks, there were proportionally more BME personnel in the lower rank ranges (Major and below<sup>1</sup>, and Corporal<sup>1</sup> and below) than at the more senior ranks. The Army has the highest proportion of BME personnel, who comprise 9.9 per cent of total Regular Army strength, compared with 3.5 per cent in the Naval Service and 2.0 per cent in the RAF.

In the Naval Service and Army, there was a higher proportion of personnel from BME backgrounds in the Other Ranks than Officers, whereas in the RAF the reverse is true. The RAF has a higher proportion of BME personnel at Wing Commander and above (2.4 per cent) than the other Services, but also has the lowest proportion of BME personnel in the Other Ranks (1.9 per cent).

Data from the Joint Personnel Administration System for 2010 and 2011 have been reviewed and finalised, therefore some figures may differ from previous publications. Please see Chapter 2 introduction for more details.

This table is a National Statistic.

Source: DASA(Quad-Service)

All figures are rounded to the nearest 10, with the exception of those in the detailed BME categories. These figures are rounded to the nearest 5 so as not to obscure the data, and therefore may not sum to the totals shown.

<sup>1</sup> Figures are for paid rank. Includes equivalent ranks for the Naval Service and RAF. See **Table 2.24**.

<sup>2</sup> Percentages are calculated from unrounded data and only include personnel with a known ethnic origin.

<sup>3</sup> Mixed comprises Mixed Black African and White, Mixed Asian and White, Mixed Black Caribbean and white and other Mixed Ethnic Backgrounds.

Asian comprises Asian Bangladeshi, Asian Pakistani, Asian Indian and other Asian Backgrounds, and reflecting changes made in the 2011 Census, now includes Chinese.

Black comprises Black Caribbean, Black African and other Black Backgrounds.

Other is defined as "other ethnic background".

<sup>4</sup> Includes those with an unrecorded ethnic origin and those who chose not to declare.

#### **UK ARMED FORCES**

## Table 2.10 Strength of UK Regular Forces by age<sup>1</sup>, at 1 April each year

At 1 April 2012, the average (mean) age of UK Regular Forces Officers was 37 years and Other Ranks was 29 years.

Whilst age profiles in the UK Regular Forces are relatively stable, there is some evidence that the Armed Forces are ageing. The percentage of Officers aged 40 and above has risen from 35.9 per cent in 2000 to 41.3 per cent in 2012. Other Ranks have seen a similar increase from 6.8 per cent in 2000 to 12.9 per cent in 2012, and a corresponding decrease in the proportion of personnel in the youngest age categories.

The number of Other Ranks aged under 18 increased from 2,530 in 2011 to 2,620 in 2012, following an increase in intake in the Army in the preceding year (see, for example, Table 2.17). There was however, quite a marked decline in the numbers of Other Ranks aged 18 or 19. The number of Officers in the youngest age groups continued to decrease, as Officer intake remains low across the three Services.

Data from the Joint Personnel Administration System for 2010 and 2011 have been reviewed and finalised, therefore some figures may differ from previous publications. Please see Chapter 2 introduction for more details.

#### **UK ARMED FORCES**

## Table 2.11 Strength of UK Regular Forces by rank, at 1 April each year

At 1 April 2012 there were 30,700 Officers and 149,100 Other Ranks in the UK Regular Forces. Officer strength reduced by 1,810 (5.6 per cent) between 2000 and 2012, whereas Other Ranks strength fell by 26,000 (14.8 per cent) in the same period, although most of the decline in Officer strength occurred in the last year whereas the Other Ranks have shown a generally decreasing trend throughout the period.

There were 63,080 Private Other Ranks at 1 April 2012, a decrease of 13,820 (18.0 per cent) since 2000, with the decline in strength at this rank over the last few years reflecting decreases in intake (see Table 2.17). Proportionally the largest fall was at the Staff Sergeant rank, with 24.5 per cent fewer personnel in 2012 than in 2000. Among the Officers, the greatest decrease in strength between 2000 and 2012 was at Lieutenant and below.

Data from the Joint Personnel Administration System for 2010 and 2011 have been reviewed and finalised, therefore some figures may differ from previous publications. Please see Chapter 2 introduction for more details.

This table is a National Statistic.

<sup>1.</sup> Figures are for paid rank. Includes equivalent ranks for the Naval Service and RAF. See Table 2.24.

<sup>2.</sup> Royal Marines with a substantive rank of Marine but acting as Corporal are presented as Lance Corporal from 1 April 2003 onwards. Before this point they are presented as Corporal.

#### **UK ARMED FORCES**

## Table 2.12 Strength of UK Regular Forces by Service and religion, at 1 April each year

The percentage of UK Regular Armed Forces who are Christian reduced from 89.7 per cent in 2007 to 83.5 per cent in 2012. In the same period, the number of personnel declaring 'No Religion' increased from 9.5 per cent in 2007 to 14.7 per cent in 2012. At 1 April 2012, the Army has the highest proportion of personnel declaring any religion, and the Naval Service has the lowest. The Army also has the highest proportion of personnel declaring non-Christian religions, standing at 2.3 per cent in 2012.

Data from the Joint Personnel Administration System for 2010 and 2011 have been reviewed and finalised, therefore some figures may differ from previous publications. Please see Chapter 2 introduction for more details.

Religion data for all three Services is only available since April 2007 following the introduction of the Joint Personnel Administration System.

- 1. Christian Tradition includes Christian Scientist, Church of Jesus Christ Of Latter-Day Saints (Mormon), Jehovah's Witness and Unitarian religions
- 2. Other Religions includes Druid, Pagan, Rastafarian, Spiritualist, Zoroastrian (Parsee), Wicca and Baha'i among others.
- 3. Includes those with an unrecorded religion and those who chose not to declare.

Percentages are calculated from unrounded data and are based on those with known religion only.

#### **UK ARMED FORCES**

# Table 2.13 Strength of the Trained UK Regular Forces by Service and nationality, at 1 April each year

At 1 April 2012 the majority of Armed Forces personnel had a recorded nationality of UK (94.9 per cent). The proportion of Non-UK personnel has increased by 1.2 percentage points between 2007 and 2012. The increase in personnel with a nationality recorded as Nepalese is a result of a change in the terms and conditions of service for Gurkha personnel which from 1 April 2009 allows them to transfer into the UK Regular Forces.

At 1 April 2012 the RAF had the highest proportion with a nationality of UK (99.7 per cent) and the Army had the lowest (91.9 per cent).

Data from the Joint Personnel Administration System for 2010 and 2011 have been reviewed and finalised, therefore some figures may differ from previous publications. Please see Chapter 2 introduction for more details.

This table is a National Statistic.

Source: DASA(Quad-Service)

Nationality data for all three Services is only available from 1 April 2007 due to the introduction of the Joint Personnel Administration System.

- 1. Citizens of the Republic of Ireland.
- 2. Includes Zimbabwean and Fijian citizens, who continue to retain Commonwealth status under the British Nationality Act 1981.
- 3. Includes those with an unrecorded nationality.

Percentages are calculated from unrounded data and are based on those with known nationality only.

#### **UK ARMED FORCES**

## Table 2.14 Strength of the Reserve Forces<sup>1</sup>, at 1 April each year

The Volunteer Reserves strength overall and in each Service decreased between 2000 and 2012. Since 2006, the Volunteer Reserves strength in the RAF was relatively consistent, whilst the other Services' Volunteer Reserve strengths continued to decrease. This is particularly evident in the Army where strengths have decreased by 7,300 since 2006

This table is a National Statistic, however there are concerns regarding data quality and coverage which are under investigation. Full details can be found in the TSP7 Background Quality Report, which is available on DASA's website at

(http://www.dasa.mod.uk/applications/new/Web/www/index.php?page=48&pubType=3&thiscontent=2170&PublishTime=09:30:00&date=2012-05-30&disText=Single Report&from=listing&topDate=2012-05-30)

#### **Data Quality Notes**

#### Regular Reserve

Data on Naval Service Regular Reservists at 1 April 2006 and 2007, and 2009 onwards, and Army Regular Reservists and Royal Air Force Individuals Liable to Recall at 1 April 2008 onwards are not presented in Table 2.14. Tri-Service Regular Reserve data were not migrated across from legacy systems onto the Joint Personnel Administration (JPA) system, and any data subsequent to its introduction have been sourced from the single Services where available. The absence of Naval Service Regular Reserve data in 2006 and 2007 was caused by the disestablishment of the secretariat responsible for the compilation of Naval Service Reserve data. In 2008, data were compiled by a reorganised secretariat, however concerns over the quality of the source data prohibited publication of the Naval Service Regular Reserve data from 2009 onwards. In 2012 the Naval Service discontinued its standalone data source, and DASA is investigating whether any information held by the Department is of sufficient quality and therefore could be provided in the future.

#### Volunteer Reserve

Volunteer Reserve data appear on the JPA system, however there are known issues with the quality of the data. Naval Service Volunteer Reserve data at 1 April 2008 onwards were therefore sourced from the Naval Service, with the exception of the mobilised element of the Volunteer Reserves, which was sourced from JPA. Army and Royal Air Force Volunteer Reserve data for 2008 onwards were sourced from JPA, however data quality investigations are ongoing. Data from the Joint Personnel Administration System (2007 onwards) are no longer marked provisional as DASA's historic revisions project is complete and there are no further plans to revise figures that are already published, unless errors are found.

- 1. Figures exclude Full Time Reserve Service personnel.
- 2. Army Volunteer Reserve data at 1 April 2007 are not available. Data are as at 1 March 2007.
- 3. Army Volunteer Reserve data at 1 April 2008 are not available. Data are as at 1 June 2008.
- 4. Comprises Royal Fleet Reserve Naval and Royal Fleet Reserve Marine.
- 5. Excludes University Royal Naval Unit personnel.
- 6. Includes Officer Training Corps and Non-Regular Permanent Staff.
- 7. Excludes University Air Squadron personnel.
- Due to an incorrect specification of data processing rules, the number of RAF Regular Reserves has been under-reported in this publication since the introduction of the Joint Personnel Administration system in 2006/7.

#### **UK ARMED FORCES**

# Strength of Community Cadet Forces by sex at 1 April each year

At 1 April 2012 the strength of the total Community Cadet Forces was 118,810, with 94,730 Community Cadet Force cadets and 24,080 Community Cadet Forces Adult Volunteers. The Army Cadet Force had the largest proportion of cadets (47.6 per cent), followed by the Air Training Corp (37.7 per cent) and then the Sea Cadet Corps (14.6 per cent).

Of the 94,730 Community Cadet Force cadets, 69,130 were male (73.0 per cent) and 25,600 female (27.0 per cent) at 1 April 2012. The proportion of female Community Cadet Force cadets has been relatively stable since 2007. The Sea Cadet Corps had the highest proportion of female cadets (34.2 per cent), followed by the Army Cadet Force and Air Training Corp (25.8 per cent). Of the Cadet Force Adult Volunteers 6,560 were female (27.2 per cent) at 1 April 2012.

This table is a National Statistic.

<sup>1.</sup> From 1 April 2011, Sea Cadet Corps figures include juniors (10-11 year olds) whereas they were previously excluded.

#### **UK ARMED FORCES**

## Table 2.15b Combined Cadet Forces strengths at 1 April each year

The Combined Cadet Force strength was 47,120 at 1 April 2012, this comprises the cadets strength 45,020 (95.5 per cent) and the Combined Cadet Force Adult Volunteer strength 2,100 (4.5 per cent). The Army Sections have the largest proportion of cadets (67.2 per cent), followed by the RAF Sections (20.5 per cent) and then the Naval Service Sections (12.3 per cent).

At 1 April 2012 the number of female cadets in the Combined Cadet Force was 12,660 (28.1 per cent of cadets within the Combined Cadet Force) at 1 April 2012. The proportion of female cadets in the Combined Cadet force has increase since 2007. The number of female personnel in the Cadet Force Adult Volunteers was 580 (27.8 per cent of the Cadet Force Adult Volunteers), at 1 April 2012.

This table is a National Statistic.

#### **UK ARMED FORCES**

## **Table 2.16**

## Intake<sup>1</sup> to and Outflow<sup>2</sup> from UK Regular Forces by Service

The intake to UK Regular Forces was 14,800 in financial year 2011/12. This was an increase of 2,070 (16.3 per cent) when compared with 2010/11 and a decrease of 8,390 (36.2 per cent) when compared with the 2008/09 six year high of 23,190.

The outflow from the UK Regular Forces was 21,370 in financial year 2011/12. This was an increase of 3,230 (17.8 per cent) when compared with 2010/11 and a decrease of 3,950 (15.6 per cent) when compared with 2006/07. Of these, 1,650 (7.7 per cent) were redundancy. This represents the first outflow due to redundancy since 2006/07.

Data from the Joint Personnel Administration System for the period 1 May 2009 to 1 October 2011 have been reviewed and finalised, therefore some figures may differ from previous publications. Please see Chapter 2 introduction for more details.

This table is a National Statistic (Latest figures http://www.dasa.mod.uk/index.php?pub=MPR).

Note: p denotes provisional.

Figures show Intake to UK Regular Forces, both trained and untrained, which comprises new entrants, re-entrants, direct trained entrants (including
professionally qualified officers) and intake from the reserves. They exclude all movements within the Regular Forces; including flows from
untrained to trained strength, transfers between Services and flows from ranks to officer due to promotion.

Figures show Outflow from UK Regular Forces, both trained and untrained, including personnel leaving the Services, deaths, recalled reservists on release and outflow to the Home Service battalions of the Royal Irish Regiment (which disbanded on 31 March 2008). They do not include promotion from ranks to officers or flows between Services.

<sup>3.</sup> Long Term Absentees (LTAs) are service personnel who have been absent without leave (AWOL) for more than 21 days.

<sup>4.</sup> Strengths at the end of the period may not equal the sum of the strength at the beginning of the period and intervening intake and outflow. This is due to movements between Services.

<sup>5.</sup> From 1 April 2009 onwards, Army intake figures include transfers from the Gurkhas to the UK Regular Forces.

#### **UK ARMED FORCES**

## Table 2.17 Intake<sup>1</sup> to UK Regular Forces by Service and sex

Women accounted for 8.7 per cent of the intake to UK Regular Forces in 2011/12, which represents a gradual decline since 2006/07. This decrease is not uniform across the Officers and Other Ranks with all Services having an increase in the percentage of Officer intake from 15.8 per cent in 2010/11 to 16.8 per cent in 2011/12, notably in the RAF where 36.3 per cent of the 2011/12 intake were female.

The percentage of female intake in the Other Ranks has increased slightly from 7.9 per cent in 2010/11 to 8.1 per cent in 2011/12. When compared to 2010/11, the Naval Service and Army has seen an increase whereas the RAF have decreased.

Data from the Joint Personnel Administration System for the period 1 May 2009 to 1 October 2011 have been reviewed and finalised, therefore some figures may differ from previous publications. Please see Chapter 2 introduction for more details.

Figures show intake to UK Regular Forces, both trained and untrained, which comprises new entrants, re-entrants, direct trained entrants (including professionally qualified officers) and intake from the reserves. They exclude all movements within the Regular Forces; including flows from untrained to trained strength, transfers between Services and flows from ranks to officer due to promotion.

<sup>2.</sup> From 2009/10 Army intake figures include transfers from the Gurkhas to the UK Regular Forces.

#### **UK ARMED FORCES**

## Table 2.18 Intake<sup>1</sup> to UK Regular Forces by Service and ethnic origin

Black and Minority Ethnic (BME) intake to UK Regular Forces was 1,040 in financial year 2011/12. This was a increase of 380 (58.4 per cent) when compared with 2010/11 and a decrease of 25.3 per cent when compared with 2009/10. BME Officer intake during 2011/12 was 2.1 per cent of total officer intake; for Other Ranks the figure was 7.7 per cent.

The Army continues to have the highest percentage of BME Other Ranks intake (9.2 per cent of total intake). It is difficult to draw meaningful comparisons for the Officer BME intake due to small numbers.

Data from the Joint Personnel Administration System for the period 1 May 2009 to 1 October 2011 have been reviewed and finalised, therefore some figures may differ from previous publications. Please see Chapter 2 introduction for more details.

Ethnicity percentages are based on those with a known ethnic origin. Where more than 40% of ethnicity data are unknown, figures are suppressed to reduce the possibility of presenting misleading information. All Service totals are also suppressed when single Service figures have varying degrees of coverage to prevent bias towards Services with higher coverage.

1.8

Royal Air Force

<sup>1.</sup> Figures show intake to UK Regular Forces, both trained and untrained, which comprises new entrants, re-entrants, direct trained entrants (including professionally qualified officers) and intake from the reserves. They exclude all movements within the Regular Forces; including flows from untrained to trained strength, transfers between Services and flows from ranks to officer due to promotion.

Full coverage estimates are given for Army ethnicity figures in 2006/07. These show the number of Black and Minority Ethnic personnel that would be expected if ethnicity were known for all personnel. Ethnicity is known for 11 months of data and estimated for March 2007.

<sup>3.</sup> Includes those with an unrecorded ethnic origin and those who choose not to declare.

#### **UK ARMED FORCES**

## Table 2.19 Gains to Trained Strength<sup>1</sup> of UK Regular Forces by Service

The Gains to Trained Strength (GTS) of UK Regular Armed Forces was 11,320 in financial year 2011/12, having dropped to a six year low. The Army and RAF both reached a six year GTS high in 2009/10 and have both since experienced two consecutive years of GTS reductions. The Naval service reached its six year GTS high in 2007/08, and has experienced a downward trend since then.

This decrease can be seen in both Officers and Other Ranks, although Officer GTS reached its peak at 2,120 in 2008/09.

The figures presented here do not match GTS figures shown in previous editions of UKDS prior to 2011, as they exclude those returning to the trained strength from Long Term Absence (LTA). GTS figures prior to 2011 included returns from LTA.

Data from the Joint Personnel Administration System for the period 1 May 2009 to 1 October 2011 have been reviewed and finalised, therefore some figures may differ from previous publications. Please see Chapter 2 introduction for more details.

<sup>1.</sup> GTS figures comprise those who complete training (untrained to trained flow) and those that enter directly into the trained strength (direct entrants). They exclude those returning to the trained strength from Long Term Absence (LTA).

<sup>2.</sup> Total GTS figures represent net gains to overall strength and as such exclude the intake to trained officers from trained other ranks.

<sup>3.</sup> Trained direct entrants comprises trained re-entrants, professionally qualified officers (PQO) and Gurkhas joining the Regulars.

#### **UK ARMED FORCES**

# Table **2.20** Outflow<sup>1</sup> from UK Regular Forces by Service and whether trained or untrained

Total outflow of personnel from the UK Regular Armed Forces was 21,370 in 2011/12 an increase of 3,230 (half of this is redundancy) from 2010/11. This represents the first increase since 2006/07, with total outflow falling year on year from 2006/07 to 2010/11.

Trained outflow has increased when compared to 2010/11 and 2009/10 whereas untrained outflow has decreased over the same period. This reflects reductions in the untrained strength.

Data from the Joint Personnel Administration System for the period 1 May 2009 to 1 October 2011 have been reviewed and finalised, therefore some figures may differ from previous publications. Please see Chapter 2 introduction for more details.

This table is a National Statistic (Latest figures http://www.dasa.mod.uk).

<sup>1.</sup> Figures show outflow from UK Regular Forces, both trained and untrained, including personnel leaving the Services, deaths, recalled reservists on release and outflow to the Home Service battalions of the Royal Irish Regiment (which disbanded on 31 March 2008). They do not include promotion from ranks to officers or flows between Services and are not comparable with gains to trained strength figures in Table 2.19 which include promotion from ranks to officers.

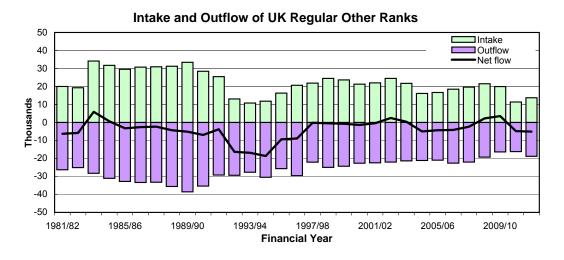

<sup>2.</sup> Outflow figures up to and including 2006/07 include the net flow of between 100 and 200 personnel from the Regular Army to Long Term Absentee (LTA). Outflow figures from 2007/08 do not include this net flow to LTA. See glossary for more details.

**UK ARMED FORCES** 

# Charts to Tables **2.17 & 2.20** Intake and Outflow of UK Regular Forces

#### **UK ARMED FORCES**

## Table **2.21** Outflow<sup>1</sup> from trained UK Regular Forces by Service and ethnic origin

Black and Minority Ethnic (BME) personnel as a percentage of total outflow was 4.9 per cent in 2011/12. This was a increase of 0.2 percentage points compared to 2010/11; and an increase of 0.4 percentage points compared to 2006/07. BME Officer outflow during 2011/12 was 2.3 per cent of total outflow; for Other Ranks this was 5.3 per cent.

The Army continues to have the highest percentage of BME Other Ranks outflow (6.8 per cent of total outflow), reflecting the higher percentage of BME personnel in the Army. It is difficult to draw meaningful comparisons for the Officer BME outflow due to small numbers.

Data from the Joint Personnel Administration System for the period 1 May 2009 to 1 October 2011 have been reviewed and finalised, therefore some figures may differ from previous publications. Please see Chapter 2 introduction for more details.

Ethnicity percentages are based on those with a known ethnic origin.

Figures show outflow from trained UK Regular Forces, including personnel leaving the Services, deaths, recalled reservists on release and outflow
to the Home Service battalions of the Royal Irish Regiment (which disbanded on 31 March 2008). They do not include promotion from ranks to
officers or flows between Services and are not comparable with gains to trained strength figures in Table 2.19 which include promotion from ranks

<sup>2.</sup> Includes those with an unrecorded ethnic origin and those who chose not to declare.

<sup>3.</sup> Outflow figures up to and including 2006/07 include the net flow of between 100 and 200 personnel from the Regular Army to Long Term Absentee (LTA). Outflow figures from 2007/08 do not include this net flow to LTA. See glossary for more details.

#### **UK ARMED FORCES**

### Table 2.22 Outflow<sup>1</sup> from UK Regular Forces by Service and sex

Females as a percentage of total outflow decreased to 8.3 per cent during 2011/12 from 8.8 per cent in 2010/11 and has fallen from 9.7 per cent in 2000/01. Total outflow of females has been fairly stable since 2006/07 in both the Officers and Other Ranks.

Females as a proportion of outflow has increased during 2011/12 in the Naval Service and decreased in the Army and the RAF. Naval Service female outflow rose by 0.2 percentage points to 10.1 per cent; Army fell by 0.6 percentage points to 6.3 per cent and RAF fell by 1.4 percentage points to 13.1

Data from the Joint Personnel Administration System for the period 1 May 2009 to 1 October 2011 have been reviewed and finalised, therefore some figures may differ from previous publications. Please see Chapter 2 introduction for more details.

This table is a National Statistic.

<sup>1.</sup> Figures show outflow from UK Regular Forces, both trained and untrained, including personnel leaving the Services, deaths, recalled reservists on release and outflow to the Home Service battalions of the Royal Irish Regiment (which disbanded on 31 March 2008). They do not include promotion from ranks to officers or flows between Services and are not comparable with gains to trained strength figures in Table 2.19 which include promotion from ranks to officers.

<sup>2.</sup> Outflow figures up to and including 2006/07 include the net flow of between 100 and 200 personnel from the Regular Army to Long Term Absentee (LTA). Outflow figures from 2007/08 do not include this net flow to LTA. See glossary for more details.

#### **UK ARMED FORCES**

### Table **2.23** Military salaries<sup>1</sup>: illustrative rates and indices (2001/02=100)

Indices are based on annual pay rates. With the exception of Privates, rates in 2012/13 remain unchanged from 2011/12 and are those recommended by the Armed Forces Pay Review Body (AFPRB) in line with the pay freeze for all public sector workers earning more than £21,000. As the underlying rank weights are constant, the changes in the indices purely reflect changes in pay. All indices are calculated using standard rank weights taken at 1 April 2012 and are based against average rates of pay in 2001/02 - the year the new Pay2000 pay system was introduced.

There continues to be a real terms contraction in military salaries. This has been caused by the public sector pay freeze, coupled with a high proportional increase in the Retail Price Index. At 4.4 per cent during 2011/12, military salaries contracted further than the UK Average Weekly Earnings, which contracted by 2.7 per cent in the same period.

- 1. Data are for UK Regular Forces which includes all trained and untrained personnel. Gurkhas, Full Time Reserve personnel, and mobilised reservists are excluded.
- 2. Equivalent ranks in the Naval Service and Royal Air Force are shown in Table 2.24.
- 3. The illustrative rates of annual military salary are calculated using the Pay Review Bodies' annualised rates for the appropriate year. The rate shown for each rank is the pay level with the largest number of people at 1 April 2012.
- 4. Under the Pay 2000 system, introduced in 2001/02, Regular personnel progress annually up incremental pay spines, subject to satisfactory performance. Other Ranks are also assigned to Higher (H) or Lower (L) ranges, in accordance with their trade.

**UK ARMED FORCES** 

### Chart to Table 2.23 Military salaries: illustrative rates and indices

Source: DASA(Quad-Service), Office for National Statistics

- 1. Real growth in salaries is growth over and above inflation. It represents the increase in purchasing power between one year and the next. For example, if salaries grew by 2%, but prices rose by 1%, real salary growth would be about 1%, because someone earning that salary could purchase around 1% more goods and services. Real pay growth can be negative if inflation is outstripping salary growth, values at 0% indicate an increase in line with inflation. The measure of inflation used here is growth in Retail Price Index (RPI).
- 2. When calculating the real growth of average earnings the Office for National Statistics (ONS) Average Weekly Earnings index (K45U: whole economy, total pay including bonuses) has been employed. Military salaries do not include bonuses or allowances.

#### PERSONNEL SUMMARY

### Table **2.25** Civilian personnel<sup>1</sup>, at 1 April each year

The MOD civilian Level 0 FTE strength has reduced substantially since 2000, from about 121,300 at 1 April 2000 to about 71,000 e at 1 April 2012. The Level 0 strength reduced by a quarter from 2000 to 2008, and subsequently remained more stable with only small reductions for the following two years until 2010. Further reductions have been seen since 2010, as directed by policy deriving from the Strategic Defence and Security Review (SDSR). Personnel reductions under the SDSR are set to continue until 2020 from the baseline start point of April 2010. The Level 0 MOD civilian total has decreased from around 85,800 at 1 April 2010 to around 71,000 at 1 April 2012, representing a reduction of 17.3 per cent over the period since the beginning of the SDSR personnel reductions. This period has seen an overall reduction in Level 1 MOD personnel, falling from 65,900 to 54,500. During this period permanent non-industrial strength has fallen by 16.2 per cent and permanent industrial strength has fallen by 21.4 per cent.

From 2010 to 2012 the strength of the Trading Funds fell by 2,600 from 9,700 to 7,100 overall, primarily due to the transfer of the Meteorological Office to the Department for Business Innovation and Skills (1,800). Locally engaged civilian personnel numbers have reduced from around 10,200 in 2010 to 9,400° in 2012, and Royal Fleet Auxiliary (RFA) personnel fell from around 2,300 in 2010 to 2,000 in 2012. RFAs, however, had remained relatively stable across the whole period with very little change from 2000 to 2011, with only a slight reduction in 2012 relative to the overall reductions seen elsewhere.

This table is a National Statistic. These statistics have previously been published in the Quarterly Civilian Personnel Report (QCPR). This is a quarterly publication and the latest figures can be found here (http://www.dasa.mod.uk/index.php?pub=QCPR).

Source: DASA(Quad-Service)

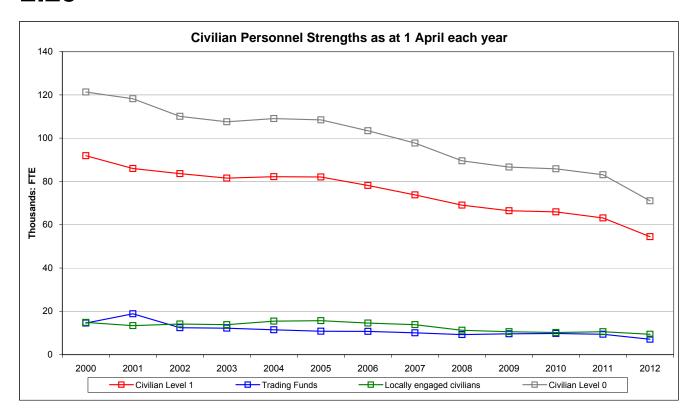

- 1. Civilian Level 0 and Level 1 are defined in the Glossary.
- 2. The following changes have affected the continuity of the civilian data: In 2001 the QinetiQ portion of the Defence Evaluation and Research Agency (8,000) was established as a private company. At 1 April 2008 the Defence Aviation Repair Agency and the Army Base Repair Organisation merged to form the Defence Support Group and around 1,000 personnel transferred to the Vector Aerospace Corporation. In October 2011 responsibility for management of the Meteorological Office personnel (1,900) transferred to Department for Business, Innovation and Skills (BIS).
- 3. Casual personnel are usually engaged for less than 12 months.

#### **CIVILIAN PERSONNEL**

### Table 2.26 Civilian personnel by budgetary area, at 1 April 2012

As at 1 April 2012, MOD Top Level Budgetary areas (TLBs) accounted for 74.0 per cent of the Civilian Level 0 FTE total. Defence Equipment & Support was the largest single budgetary area, comprising 19.9 per cent of the Civilian Level 0 FTE total, followed by Land Forces at 18.6 per cent, Head Office & Corporate Services at 15.6 per cent, and HQ Air Command at 9.2 per cent as the largest TLBs. With the remaining three core TLBs accounting for 10.8 per cent between them. The balance of the Civilian Level 0 FTE total comprises Locally engaged civilians at 13.2 per cent, combined trading funds at 10.0 per cent and Royal Fleet Auxiliary at 2.8 per cent.

Within the TLBs, 99.2 per cent of Head Office & Corporate Services, 90.1 per cent of Defence Infrastructure Organisation, 87.7 per cent of Joint Forces Command, and 86.4 per cent of Defence Equipment & Support staff were employed in non-industrial grades. Remaining TLBs have non-industrial populations in the range of 71.7 to 76.4 per cent with Land Forces recording the lowest population.

Of the Industrial Top Level Budget Total FTE strength of 8,600, 7,410 (86.2 per cent) are accounted for by three TLBs alone: Land Forces. 43.3 per cent, Defence Equipment & Support 22.3 per cent and Air Command 20.6 per cent. Head Office and Corporate Support has the lowest number of industrial personnel. Of the Top Level Budget Non-industrial Total FTE strength of 49,310, 37,360 (85.1 per cent) are accounted for by Defence Equipment & Support (27.7 per cent), Head Office & Corporate Services (25.0 per cent), Land Forces (21.5 per cent) and Air Command (20.6 per cent).

This table is a National Statistic. These statistics have previously been published in the Quarterly Civilian Personnel Report (QCPR). This is a quarterly publication and the latest figures can be found here (http://www.dasa.mod.uk/index.php?pub=QCPR).

- 1. Civilian Level 0 and Level 1 are defined in the Glossary.
- A breakdown of industrial and non-industrial personnel is unavailable for Royal Fleet Auxiliary, Trading Funds and locally engaged civilian personnel.

#### PERSONNEL SUMMARY

# Table **2.27** Civilian personnel<sup>1</sup> by budgetary area and grade equivalent<sup>2</sup>, at 1 April each year

A budgetary area is defined as higher level groupings of the Top Level Budgetary areas combined together to allow consistent presentation of data across multiple time periods. Although constituent TLBs in areas such as centralised support and logistic support services have changed in structure across the period, the budgetary area groupings remain the same across the period. The budgetary areas for Navy Command, Land Forces and Air Command each represent individual Service areas. While Defence Equipment & Support covers the departments logistic support systems, with remaining TLB areas falling to Centre covering centralised support services.

As directed by policy deriving from the Strategic Defence and Security Review (SDSR), personnel reductions under the SDSR are set to continue until 2020 from the baseline start point of April 2010. Between 2010 (the start of the current SDSR rundown exercise) and 2012, the total FTE strength of MOD civilian personnel fell by 17.3 per cent. Decreases have been seen within each individual Service Command over this period, with the largest proportionate decrease of 24.5 per cent seen in Air Command and the smallest proportionate decrease of 12.8 per cent in Defence Equipment & Support.

Between 2000 and the start of the current SDSR rundown exercise in 2010, the total FTE strength of MOD civilian personnel fell by 29.2 per cent and between 2000 and 2012 the total FTE strength of MOD civilian personnel fell by 41.5 per cent. Decreases have been seen within each individual Service Command between 2000 and 2012, with the largest proportionate decrease of 43.5 per cent seen in Air Command, while Navy Command and Land Forces showed decreases of similar proportions, by 40.4 per cent and 38.0 per cent respectively. Defence Equipment & Support, decreased significantly by 60.0 per cent across the whole period.

The Centre covers a wide range of activity for a number of TLBs including Chief of Joint Operations (CJO), Joint Forces Command (JFC), Defence Infrasructure Organisation (DIO), Central TLB, Head Office & Corporate Services and Science Innovation and Technology (SIT) grouped together due to commonality of function, providing general and specialist support to Defence Equipment and Support and the front line service TLBs Navy Command, Land Forces and Air Command. Dependent on the requirements of the lead TLBs, the support TLBs grouped within the Centre category have been subject to ongoing restructuring and reorganisation on an annual basis.

This is reflected in the period 2000 to 2006 where Centre actually increased 25.0 per cent where organisations such as Central TLB and Defence Infrastructure organisation absorbed additional functions, and then remained relatively constant in comparison to other budgetary areas, only decreasing by about 1,500 from 2006 to 2011. With reductions due to SDSR and organisational restructuring in the last year resulting in reductions of around 2,600, Centre has reverted back to a similar size to that seen in 2000 as support functions were no longer required.

The impact of the SDSR has had the greatest impact on grade bands SCS, Band E and Industrial personel. Since 2010, the number of Band E personnel has decreased by 22.6 per cent (22,440 in 2010 to 17,370 in 2012), Industrial personnel by 21.9 per cent (11,010 in 2010 to 8,600 in 2012) and SCS personnel by 19.1 per cent (290 in 2010 to 240 in 2012), with Band E and Industrial personnel also declining consistently since 2000. In comparison the moderate increase in Band C and Band B personnel from 2000 to 2010 had been reversed by 2012 to similar levels of 2000. This has caused a considerable change in the grade structure of the core MOD population.

Since 2000 the proportion of senior personnel within the MOD civilian strength has increased. In 2000, senior personnel at Band C and higher accounted for 14.7 per cent, compared to 24.8 per cent in 2012 of the civilian FTE level 0 total. The workforce population for Band D & E personnel has remained relatively constant from 2000 to 2012 at 39.5 per cent and 37.0 per cent respectively. The population for Trading Fund personnel, Royal Fleet Auxiliary personnel and Locally engaged civilians has also remained relatively stable. The proportion of industrial staff has fallen from 19.5 per cent in 2000 to 12.1 per cent in 2012.

This table is a National Statistic. These statistics have previously been published in the Quarterly Civilian Personnel Report (QCPR). This is a quarterly publication and the latest figures can be found here (http://www.dasa.mod.uk/index.php?pub=QCPR).

10

- 1. Civilian Level 0 is defined in the Glossary.
- 2. Grade equivalent is shown in terms of the broader banding structure and is based on paid grade.

- 3. The following changes have affected the continuity of the civilian data: In 2001 the QinetiQ portion of the Defence Evaluation and Research Agency (8,000) was established as a private company. At 1 April 2008 the Defence Aviation Repair Agency and the Army Base Repair Organisation merged to form the Defence Support Group and around 1,000 personnel transferred to the Vector Aerospace Corporation. In October 2011 responsibility for management of the Meteorological Office personnel (1,900) transferred to Department for Business, Innovation and Skills (BIS).
- 4. Includes personnel outside the Senior Civil Service but of equivalent grade, primarily Senior Medical Specialists.
- 5. Includes industrial personnel on temporary promotion to non-industrial grades and personnel for whom no grade information is available.

- 6. Defence Equipment & Support formed in 2007 by merging the Defence Logistics Organisation and Defence Procurement Agency. For consistency information in this table has been merged across the series between 2000 and 2006.
- 7. Personnel for whom no Top Level Budget (TLB) information is available are included in this section of the table.

#### **CIVILIAN PERSONNEL**

# Table 2.28 Strength of civilian personnel<sup>1</sup> by ethnic origin and grade<sup>2</sup>, at 1 April each year

Known Black and Minority Ethnic representation in civilian personnel (excluding unknown and undeclared personnel) has seen an increase overall from 2.9 per cent in 2006 to 3.5 per cent in 2012. Across the same period, the ethnicity declaration rate within core MOD TLBs has increased from 81.8 per cent to 88.9 per cent.

The highest representation of Black and Minority Ethnic civilian personnel (excluding those of unknown grade) can be found in Pay Band E (4.5 per cent). There has been a 0.9 percentage point increase in the proportion of Black and Minority Ethnic civilian personnel within all middle and senior management Grades (SCS to Grade C) since 2006.

This table is a National Statistic. These statistics have previously been published in the Quarterly Civilian Personnel Report (QCPR). This is a quarterly publication and the latest figures can be found here (http://www.dasa.mod.uk/index.php?pub=QCPR).

- 1. Civilian Level 0 is defined in the Glossary.
- 2. Grade equivalent is shown in terms of the broader banding structure and is based on paid grade.
- 3. The following changes have affected the continuity of the civilian data: At 1 April 2008 the Defence Aviation Repair Agency and the Army Base Repair Organisation merged to form the Defence Support Group and around 1,000 personnel transferred to the Vector Aerospace Corporation. In October 2011 responsibility for management of the Meteorological Office personnel (1,900) transferred to Department for Business, Innovation and Skills (BIS).
- 4. Includes personnel outside the Senior Civil Service but of equivalent grade, primarily Senior Medical Specialists.
- 5. Includes industrial personnel on temporary promotion to non-industrial grades and personnel for whom no grade information is available.
- 6. Previously published figures for Undeclared have been revised, separating out Undeclared and Unknown. In previous years no distinction was made between those who have not made declarations (Undeclared) and those for whom data is not collected (Unknown). However as this information is not collected for RFAs and LECs, it is essential to exclude them from declaration rates.
- 7. Declaration rates are based on all known positive declarations, but exclude those who have selected "choose not to declare", or have not responded.
- 8. Core MOD excludes all Trading Funds personnel, Royal Fleet Auxiliary and locally engaged civilians.

# Table 2.29 Strength of civilian personnel<sup>1</sup> by gender, grade<sup>2</sup> and whether full or part-time, at 1 April each year

The headcount of male civilian personnel fell from 56,500 at 1 April 2006 to 39,300 by 1 April 2012, and the number of female civilian personnel fell from 32,170 to 22,120 over the same period. The proportionate gender balance has remained largely constant over the period, with the percentage of civilian personnel who are female being 36.3 per cent at 1 April 2006 and 36.0 per cent at 1 April 2012.

Although from 1 April 2006 to 1 April 2012 the total number of part-time civilian personnel decreased from 6,430 to 6,040, the number of full-time civilian personnel fell by 26,820 during this period and as a result the proportion of part-time personnel has increased from 7.3 per cent to 9.8 per cent, with a peak at 10.2 per cent in 2011. This change can be clearly seen in the chart to this table.

Although there has been an overall reduction of 23.3 per cent in the number of full-time personnel in Pay Band B and SCS since 2006 (falling from 2,960 to 2,270), the percentage of full-time personnel in Pay Band B and SCS who are female has increased from 16.0 per cent in 2006 to 22.1 per cent in 2012. Despite the reduction in overall personnel numbers, there are now more part-time personnel at Grade C and above (2,020) than there were in 2006 (1,250), which is an increase from 6.0 to 11.2 per cent of all personnel at Band C and above. There has been a substantial growth in male part-time personnel at Bands C and above; following a surge from 240 to 540 in 2007 numbers have remained consistenly above 500, with a peak of 680 in 2011 only falling by 60, to 620 in 2012. 47.9 per cent of male part time personnel are now at Band C and above which is an increase from 29.2 per cent in 2006 and from 41.2 per cent in 2007. This compares to 33.5 per cent of all part time personnel at Band C and above in 2012, an increase from 19.5 in 2006 and from 25.3 per cent in 2007.

Important note: the part-time grouping does not distinguish between those working close to full-time hours and those working considerably fewer hours, and does not include personnel who work alternate patterns such as compressed hours or work from home. Caution is advised when drawing conclusions based on the full-time/part-time split.

This table is a National Statistic. These statistics have previously been published in the Quarterly Civilian Personnel Report (QCPR). This is a quarterly publication and the latest figures can be found here (http://www.dasa.mod.uk/index.php?pub=QCPR).

- 1. Data by gender, grade and part time/full time hours worked are not available for Royal Fleet Auxiliaries and locally engaged civilians.
- 2. Grade equivalent is shown in terms of the broader banding structure and is based on paid grade.
- 3. The following changes have affected the continuity of the civilian data: At 1 April 2008 the Defence Aviation Repair Agency and the Army Base Repair Organisation merged to form the Defence Support Group and around 1,000 personnel transferred to the Vector Aerospace Corporation. In October 2011 responsibility for management of the Meteorological Office personnel (1,900) transferred to Department for Business, Innovation and Skills (BIS).
- 4. Includes personnel outside the Senior Civil Service but of equivalent grade, primarily Senior Medical Specialists.
- 5. Includes industrial personnel on temporary promotion to non-industrial grades and personnel for whom no grade information is available.

#### **CIVILIAN PERSONNEL**

### Table **2.30** Number of civilian personnel<sup>1</sup> by disability status and grade<sup>2</sup>, at 1 April 2012

The disability field on the department's Human Resource Management System (HRMS) was reset on 18 April 2011 to accommodate the new disability reporting requirements resulting from the 2011 census exercise. Consequently all disability records were reset and personnel were required to redeclare their disability status. Following the HRMS reset declaration rates fell to 4.6 per cent, and have increased to 29.2 per cent and as such disability representation rates can not be produced at the current time.

To observe representation rates with declaration rates as low as this would not have any statistical validity. In view of the forgoing, disability data remains unreportable for May 2011 onwards, until further notice. Data prior to this time is unaffected.

Prior to the census reset the percentage of civilian personnel with disabilities increased overall from 5.5 per cent in 2006 to 7.2 per cent as at 1 April 2011. Across the same period the rate of disability declaration within core MOD TLBs increased from 70.0 per cent in 2006 to 84.9 per cent in 2011, falling to 29.2 per cent in 2012 following the census reset. Despite the overall decline in civilian personnel strength from 107,300 in 2005 to 87,060 in 2011, the number of personnel with disabilities has increased in absolute terms from 3,390 in 2006 to 4,240 in 2011, although this can be explained at least in part by the substantial increase in the disability declaration rate across the period.

The highest representation of civilian personnel with disabilities (excluding those of unknown grade) in 2011 was found in Pay Band E (8.4 per cent). There has been a 2.4 percentage point increase in the proportion of civilian personnel with disabilities within all middle and senior management Grades (SCS to Grade C) between 2006 and 2011.

This table is a National Statistic. These statistics have previously been published in the Quarterly Civilian Personnel Report (QCPR). This is a quarterly publication and the latest figures can be found here (http://www.dasa.mod.uk/index.php?pub=QCPR).

#### **CIVILIAN PERSONNEL**

# Table 2.31 Age profile of civilian personnel by industrial status and gender, at 1 April 2012

Since 2000 there has been a consistent trend of an ageing working population. At 1 April 2000, 14.5 per cent of civilian personnel were aged between 16 and 29, while at 1 April 2012 this had fallen to 8.9 per cent. The percentage of civilian personnel aged 50 years and over has risen from 31.9 per cent in 2000 to 42.8 per cent as at 1 April 2012. Due to a change in legislation in 2010 removing the compulsory retirement age, there are now 1,180 civilians aged 65 or above.

The percentage of core MOD civilian personnel aged 50 years and over is considerably higher for males, with 54.0 per cent of male industrial personnel and 48.6 per cent of male non industrial personnel aged 50 years and over, while 45.8 per cent of female industrials and 33.8 per cent of female non industrials were aged 50 years and over.

The percentage of core MOD civilian personnel aged 40 years and over for males is 80.4 per cent, with 70.7 per cent of female personnel aged 40 years and over. Across the whole age range 37.4 per cent of staff are female, and for personnel aged 40 years and over the proportion of female personnel is comparable at 34.4 per cent, however for female personnel below the age of 40 this proportion rises to 47.1 per cent. This change in proportion of male and female personnel below and above 40 years of age reflects a combination of developing trends in departmental recruitment, exit and retention data for age, grade and gender.

This table is a National Statistic. These statistics have previously been published in the Quarterly Civilian Personnel Report (QCPR). This is a quarterly publication and the latest figures can be found here (http://www.dasa.mod.uk/index.php?pub=QCPR).

#### **CIVILIAN PERSONNEL**

# Table **2.32** Strength of civilian personnel<sup>1</sup> by religion and grade<sup>2</sup>, at 1 April each year

Religion data are only available from 1 April 2008, and since that time declaration rates within core MOD TLBs have risen from 48.6 per cent in 2008 to 67.6 per cent in 2012. Religious representation figures are based on known declarations. Due to the low declaration rate for 2008 and 2009, it is not considered to be statistically appropriate to report representation rates for these periods. Caution should still be used when viewing representation figures from 2010 onwards as more than a third of personnel have not declared their religious beliefs and rates may not be representative of those who have not declared.

The declaration rate for industrial personnel as at 1 April 2012 was 59.6 per cent compared to 67.6 per cent for all personnel. Individual declarations are made on the HR system via the intranet, and this difference is likely related to work factors - non-industrials spend the majority of their time working on computers with the HR system easily accessible, while industrials use computers considerably less in their work.

Of those who have actively made a declaration of their religious beliefs, there has been a small decrease in the percentage declaring themselves to be Christian from 72.0 per cent in 2010 to 70.8 per cent in 2012. The percentage of those declaring religious beliefs other than Christian has remained stable between 2010 and 2012 at 5.1 per cent. Those declaring no religious beliefs have increased over the same period from 22.9 per cent to 24.1 per cent. These changes are small given the context of increasing declaration, substantial personnel reductions under SDSR and personnel changes relating to inflow and outflow.

This table is a National Statistic. These statistics have previously been published in the Quarterly Civilian Personnel Report (QCPR). This is a quarterly publication and the latest figures can be found here (http://www.dasa.mod.uk/index.php?pub=QCPR).

- 1. Civilian Level 0 is defined in the Glossary.
- 2. Grade equivalent is shown in terms of the broader banding structure and is based on paid grade.
- 3. Includes personnel outside the Senior Civil Service but of equivalent grade, primarily Senior Medical Specialists.
- 4. A new Trading Fund system for recording sexual orientation has been implemented, however data was not available for 1 April 2012 at the time of publication.
- 5. Those for whom there is no record of their religious declaration, and personnel who chose not to declare.
- 6. Religion information is not collected for Royal Fleet Auxiliary, locally engaged civilian personnel or Trading Funds.
- 7. Due to the low declaration rate for 2008 and 2009, it is not statistically appropriate to report representation rates for these periods.
- 8. Declaration rates are based on all known positive declarations, excluding those who select "choose not to declare" or have not responded.
- 9. Core MOD excludes all Trading Funds personnel, Royal Fleet Auxiliary and locally engaged civilians.

#### **CIVILIAN PERSONNEL**

# Chart to Table Strength of civilian personnel by religion and grade, at 1 April each year (continued)

#### **CIVILIAN PERSONNEL**

# Table 2.33 Strength of civilian personnel<sup>1</sup> by sexual orientation and grade<sup>2</sup>, at 1 April each year

Sexual orientation data are only available from 1 April 2008, and since that time declaration rates within core MOD TLBs have risen from 46.6 per cent in 2008 to 66.6 per cent in 2012. Religious representation figures are based on known declarations. Due to the low declaration rate for 2008 and 2009, it is not considered to be statistically appropriate to report representation rates for these periods. Caution should still be used when viewing representation figures from 2010 onwards as more than a third of personnel have not declared their sexual orientation and rates may not be representative of those who have not declared.

Following substantial increases in declaration rates from 2008 to 2012, the number of Lesbian, Gay or Bisexual (LGB) civilian personnel has increased by 38.7 per cent across the period. Given the context of large numbers of personnel reductions since 2010, LGB representation rates have increased more than would be expected, from 1.3 per cent in 2010 to 1.7 per cent in 2012. This is particularly strong for personnel in Band C where representation rates have increased from 1.1 to 1.7 of declared sexual orientation.

The declaration rate for industrial personnel as at 1 April 2012 was 59.1 per cent compared to 66.6 per cent for all personnel. Individual declarations are made on the HR system via the intranet, and this difference is likely related to work factors - non-industrials spend the majority of their time working on computers with the HR system easily accessible, while industrials use computers considerably less in their work.

This table is a National Statistic. These statistics have previously been published in the Quarterly Civilian Personnel Report (QCPR). This is a quarterly publication and the latest figures can be found here (http://www.dasa.mod.uk/index.php?pub=QCPR).

#### **CIVILIAN PERSONNEL**

### Table 2.34 Intake and outflow of civilian personnel<sup>1</sup>

From 2006/07 to 2009/10 the intake rate was stable, between 6.5 and 6.8 per cent of average strength, with an intake of over 5,000 personnel each year. The intake rate fell to 2.7 in 2010/11 and further to 2.0 in 2011/12 reflecting an intake of only 1,380 in 2011/12. Trading Funds display a slightly different picture to Core MOD where despite seeing intake fall from 940 in 2009/10 to 430 in 2010/11, 2011/12 displayed an increase to 520, an intake rate of 6.1 against 4.4 for the previous year. As intake rates are also affected by changes in strength, this increased rate may also reflect the smaller Trading Fund strength following the transfer of responsibility of the Met Office to the Department for Business, Innovation and Skills (BIS) in October 2011.

Following the sharp fall in outflow after the peak in 2007/08, due to restructuring in DE&S and DSG, there has been a gradual decline from 2008/09 to 2010/11 with outflow rates falling from 9.5 to 7.3. Outflow in 2011/12 has increased substantially with 1,910 Met Office personnel transferring to BIS, which is the primary cause of the increase in the Trading Fund outflow rate from 8.1 to 34.5. Outflow in the Core MOD has increased from 4,470 to 9,420 of which 5,950 were personnel leaving under the Voluntary Early Release Scheme (VERS), as part of the reductions enacted from the Strategic Defence and Security Review (SDSR). Consequently, Core MOD outflow rates have increased from 6.9 in 2010/11 to 16.0 in 2011/12, the highest in the last 7 years.

This table is a National Statistics. These statistics have previously been published in the Quarterly Civilian Personnel Report (QCPR). This is a quarterly publication and the latest figures can be found here (http://www.dasa.mod.uk/index.php?pub=QCPR).

Source: DASA (Quad-Service)

- 1. Total intake and outflow includes all permanent, casual and Trading Funds civilian personnel, but excludes all Royal Fleet Auxiliary and locally engaged civilians. Intake is purely a record of recruitment into the Department and does not reflect movements of personnel within the Department, such as promotions and transfers. Therefore flows can only be reconciled to strength at Civilian Level 0.
- 2. The following changes have affected the continuity of the civilian data: At 1 April 2008 the Defence Aviation Repair Agency and the Army Base Repair Organisation merged to form the Defence Support Group and around 1,000 personnel transferred to the Vector Aerospace Corporation. In October 2011 responsibility for management of the Meteorological Office personnel (1,900) transferred to Department for Business, Innovation and Skills (BIS).
- 3. MOD civil servants can take normal retirement at either age 60 or age 65. As restrictions on working above normal retirement age were removed in 2010, allowing personnel to work beyond retirement age, and normal retirement age is due to increase in coming years, this category has been redefined from previous publications to incorporate normal retirement at any age, including early retirement, in line with definitions used in other National Statistics publications. As a result figures shown here have been calculated according to current definitions for the time series, and may not match those published in previous years.
- 4. Personnel exiting under the Voluntary Early Release Scheme (VERS) from 30th September 2011 onwards are listed separately from exits under alternative release or redundancy schemes.
- 5. Includes those whose reason for leaving is unknown and those who were dismissed, transferred out of MOD, privatised or at the end of casual or fixed term appointments.
- 6. Intake and Outflow for locally engaged civilians (LEC) and Royal Fleet Auxiliaries (RFA) are not available, therefore only net changes in strengths of RFAs and locally engaged civilians are listed in this table. These changes are not reflected in Total Intake or Total Outflow.
- 7. Rates are the number of people who join or leave the department per 100 of the average headcount strength in each category, but exclude the effect of net transfers between MOD Main TLB and Trading Funds.

### 2.34 Intake and outflow of civilian personnel<sup>1</sup> (continued)

#### **CIVILIAN PERSONNEL**

# Table 2.35 Intake of UK based civilian personnel by ethnic origin and grade<sup>2</sup>

These figures require newly recruited personnel to have made a declaration within the first calendar month of joining (which can be as little as one day for those joining on the last working day of the month), as evidenced by fairly high numbers of unknown ethnicity across the period. Particular caution should be used when considering representation rates of inflow for 2011/12 as Unknown is the largest ethnic origin category for all grades.

The recruitment freeze which has been in effect since August 2010 (with the exception for certain approved specialist personnel requirement) has led to considerably reduced numbers of personnel joining the Department. Caution should therefore be used when viewing ethnicity figures from 2010/11 onwards.

The data in this table are outside the scope of National Statistics. Please see further details in Chapter 2 Introduction.

#### **CIVILIAN PERSONNEL**

# Table 2.36 Outflow of UK based civilian personnel by ethnic origin and grade<sup>2</sup>

There has been a surge in outflow in 2011/12 with exits at their highest for the last seven years and considerably more than double that seen in the previous two financial years. However, the Black and Minority Ethnic (BME) outflow rate has remained consistent from last year at 2.8 per cent and is lower than the overall BME representation rate in the MOD civilian population of 3.5 (see table 2.28). This, in conjunction with a rate of intake of BME (6.7 per cent) in excess of the overall MOD civilian BME representation, is likely to explain the increase in BME representation rates from April 2011 to April 2012 (see table 2.35).

In Pay Bands C and E BME outflow rates are at lower levels than the BME representation for that grade. Both the BME representation rates for Band E and Band C have increased by 0.6 percentage points since 2010 (see table 2.28), with outflow rates falling by 0.3 percentage points for Band C and by 2.9 percentage points for band E. Despite Band E typically exhibiting a greater impact from the reductions associated with SDSR, BME personnel within this grade band have shown a smaller than expected outflow rate.

The data in this table are outside the scope of National Statistics. Please see further details in Chapter 2 Introduction.

- 7. Intake and outflow for locally engaged civilians and Royal Fleet Auxiliaries are not available, therefore, only net changes in strengths of RFAs and locally engaged civilians are listed in this table.
- 8. Rates are the number of people who join or leave the department per 100 of the average headcount strength, but exclude the effect of net transfers between MOD Main TLB and Trading Funds and promotions.

#### **CIVILIAN PERSONNEL**

### Table 2.37 Intake of civilian<sup>1</sup> personnel by gender, grade<sup>2</sup> and whether full or part-time

The recruitment freeze which has been in effect since August 2010 (with the exception for certain approved specialist personnel requirement) has led to considerably reduced numbers of personnel joining the Department, which may introduce some unquantifiable bias when comparing figures for White and BME intake. Additional caution should therefore be used when viewing ethnicity figures from 2010/11 onwards.

The percentage of MOD civilian intake that are female has remained largely constant at just over 41 per cent across the period, except in 2007/08 when it was just under 40 per cent and 2008/09 when it was slightly higher at just under 44 per cent. These percentages are consistently slightly higher than the female representation in MOD civilian strength, which is likely to provide a partial explanation for the gradual increase in female representation.

It is notable that females recruited as part-time in general predominate in Pay Bands C and E, although in the most recent financial year this is only seen in Pay Band C. It is important to note that overall levels of part time female intake have fallen by 62.9 per cent since 2009/10, compared to a fall of 25.0 per cent for Band C and a 92.3 per cent fall for Band E over the same period. This is largely explained by the fact that recruitment of specialist personnel is rare at Band E and much more synonymous with Band C recruitment.

The percentage of MOD civilian intake recruited on a part-time basis has increased from 11 per cent in 2005/06 to 14.4 per cent in 2011/12, although the overall trend has been more erratic. It has however been consistently higher than the proportion of part-time in MOD civilian personnel strength. The proportion of all males recruited as part-time has remained relatively stable at around 4 per cent, with a slight increase in the FY 2011/12 to 6.2 per cent. Females, however, show a more erratic pattern, albeit substantially greater proportions, at 20.4 per cent part-time in 2005/06, peaking at 31.8 per cent part-time in 2010/11, and reducing to 25.9 per cent in 2011/12. Although in the earlier and later years of the time series, this rate is higher than the rate of female part-time MOD civilian strength, in 2008/09 and 2009/10 the proportion of female intake which were part-time was slightly below the overall proportion of females who were part-time.

The data in this table are outside the scope of National Statistics. Please see further details in Chapter 2 Introduction.

<sup>1.</sup> Civilian Level 0 is defined in the Glossary.

<sup>2.</sup> Grade equivalent is shown in terms of the broader banding structure and is based on paid grade.

<sup>3.</sup> Includes personnel outside the Senior Civil Service but of equivalent grade.

<sup>4.</sup> Includes industrial personnel on temporary promotion to non-industrial grades and those of unknown grade.

<sup>5.</sup> Intake and Outflow for locally engaged civilians and Royal Fleet Auxiliary (RFA) are not available, therefore, only net changes in strengths of RFAs and locally engaged civilians are listed in this table.

#### **CIVILIAN PERSONNEL**

### Table 2.38 Outflow of civilian<sup>1</sup> personnel by gender, grade<sup>2</sup> and whether full or part-time

The percentage of MOD civilian outflow that are female is largely the same at the start and end of the time series at around 41.5 per cent. However, in all the interim years this percentage was slightly below 40 per cent, at its lowest in 2007/08 when it was only just above 36 per cent. Female outflow is at a slightly higher rate than female representation in the population (although this is more than balanced out by higher recruitment rates of females).

The percentage of MOD civilian outflow on a part-time basis increased substantially across the time series, ranging from 9.6 per cent in 2005/06 to a peak of 17.3 per cent in 2010/11, reducing slightly again to 15.8 per cent in 2011/12. The proportion of all males outflowing as part-time has increased from 3.3 per cent in 2005/06 to a peak of 8.1 per cent in 2009/10, subsequently reducing slightly and settling to around 7.5 per cent in the most recent two financial years. Females outflowed as part time in substantially greater proportions, at 18.5 per cent part-time in 2005/06, peaking at 33.0 per cent part-time in 2010/11, and reducing to 27.6 per cent in 2011/12.

It should be noted that reconciling of changes in the part time proportions seen in the MOD civilian strength is not possible with the inflow and outflow of part time personnel, as part time status fluctuates across the career, in different patterns generally for males and females.

The data in this table are outside the scope of National Statistics. Please see further details in Chapter 2 Introduction.

- 1. Civilian Level 0 is defined in the Glossary.
- 2. Grade equivalence is shown in terms of the broader banding structure and is based on paid grade.
- 3. The following changes have affected the continuity of the civilian data: At 1 April 2008 the Defence Aviation Repair Agency and the Army Base Repair Organisation merged to form the Defence Support Group and around 1,000 personnel transferred to the Vector Aerospace Corporation. In October 2011 responsibility for management of the Meteorological Office personnel (1,900) transferred to Department for Business, Innovation and Skills (BIS).
- 4. Includes personnel outside the Senior Civil Service but of equivalent grade.
- 5. Includes industrial staff on temporary promotion to non-industrial grades and those of unknown grade.
- 6. Intake and Outflow for locally engaged civilians and Royal Fleet Auxiliaries are not available, therefore, only net changes in strengths of RFAs and locally engaged civilians are listed in this table.

#### COMPENSATION CLAIMS MADE AGAINST THE MOD

This section describes common law non-contractual compensation claims made against the Ministry of Defence. These claims are of three broad types: employer's liability for Armed Forces personnel, employer's liability for its civilian employees, and public liability claims. **Tables 2.39 and 2.40** show numbers of new claims made and numbers of claims settled, analysed by category of claim and by cause.

The Department self insures against loss. However, it employs commercial companies as claim handlers. All settlements are paid by the Department, the companies in question receiving a fee for each claim handled. Gallagher Bassett International won a contract in respect of third party motor claims and Service and civilian employer's liability claims received after 1 May 2007. Claims received before this date are handled by:

1982 to 2007 AXA Corporate Solutions - third party motor claims

1996 to 2007 Royal & Sun Alliance (RSA) - employer's liability claims from Armed Forces personnel

1982 to 2002 AXA Corporate Solutions - employer's liability claims from civilian personnel 2002 to 2007 Royal & Sun Alliance - employer's liability claims from civilian personnel.

The MOD's Common Law Claims & Policy Division handles all other claims, including:

- high value, novel or contentious cases.
- public liability worldwide property damage and personal injury (except where there is an Area Claims Officer (ACO))
- damage or injury caused by low flying military aircraft
- maritime claims and salvage claims
- clinical negligence
- claims made against a NATO visiting force

ACOs are part of the Command Secretariat and are located in Afghanistan, Cyprus, Germany (for NW Europe) and the South Atlantic Islands. They deal with public liability claims made against the MOD within their geographic area.

#### **New claims**

The number of new claims is the number of new cases opened by the MOD's Claims branch, ACOs and commercial claims handlers during that year; re-opened cases are not included. A new claim may be in the form of a letter from a claimant or their legal representative, or in the form of proceedings issued in a court of law. The largest number of new claims is in respect of on-duty Road Traffic Accidents involving Armed Forces personnel or MOD civilians driving a MOD-owned or MOD-hired vehicle.

#### **Settled claims**

These are claims for which a full and final settlement has been made, either by agreement between the parties, or which a court has determined. Claims are not recorded as settled until the final payment is made, which is normally the claimant's solicitor's costs and disbursements. This bill is sometimes presented some months after the compensation payment has been made, so compensation and legal costs can be paid in different financial years.

#### Number of settled claims by broad cause in 2011/124

<sup>1.</sup> The cause of a claim may not be known at the New Claims stage if for example, the claimant simply states that they have a claim but does not state exactly what it is. At settlement stage, although the cause of the claim will be recorded on the claim file, it may not always be recorded on the databases from which these data are drawn.

<sup>2.</sup> It should be noted that controls over the use of asbestos were introduced in 1970. The time between exposure to asbestos dust and fibre and the first signs of disease is typically between 15 and 40 plus years.

<sup>3.</sup> A very large number of Noise Induced Hearing Loss claims were submitted in 2010/11 and 2011 / 12 by former members of the Royal Irish Regiment.

<sup>1.</sup> The Russian Federation suspended the implementation of the CFE Treaty on 12 December 2007. Consequently, Russia did not submit the annual exchange of information required by the Treaty. The given numbers of holdings are taken from the "Consolidated Information" provided by the Russian Federation on 15 December 2008 as a sign of goodwill. The information does not include the subholdings of AIFVs and HACVs, nor the holdings of Naval Infantry and Coastal Defence Forces, nor the personnel strength.

<sup>2.</sup> Since 1 Jan 2004 these figures have included the Treaty Limited Equipment and the Personnel belonging to the Naval Infantry and Coastal Defence Forces of Ukraine.
