

Pertussis vaccination programme for pregnant women 2012-13

Provisional national data, as submitted by PCTs
for the month ending 31 December 2012

Pertussis vaccine uptake for pregnant women 2012/13
December 2012 (Data from 1 to 31 Dec 12)

England Total	2012/13					
	Response Summary			Vaccine Uptake (%)		
	No. of PCTs	No. of PCTs making a return	% of PCTs making a return	Number of pregnant women with an estimated date of delivery in the survey month	No. of pregnant women with an estimated date of delivery in the survey month that received a dose of Repevax®	Vaccine Uptake (%)
	151	144	95.4%	45793	24943	54.5%

Provisional: these data should be interpreted with caution

1. These data are based on 95.4 % of Trusts responding to the December 2012 survey and have not been extrapolated to cover all PCTs.
2. The national figures are provisional and may vary following further data validation checks.
3. The national uptake figure for December has increased by 2.5% (54.5%) compared to November 2012 (52%).
4. The denominator is determined as the number of pregnant women with an estimated date of delivery in the survey month.
5. The numerator is determined or defined as the number of pregnant women with an estimated date of delivery in the survey month that received a dose of Repevax® past the 28th week of their pregnancy.
6. The data was provided from GP Practices to Primary Care Trusts (PCTs) and include uptake from 1 December 2012 to 31 December 2012 inclusive.
7. This is the second data collection for the new programme; there remains wide variation in the reported number of pregnant women between PCTs that suggests variation in collection of relevant data. There are anomalies in the data so the uptake estimate needs to be interpreted with caution.
8. The data quality continues to improve compared to previous months.
9. These data have been provided by NHS Trusts under Review of Central Returns (ROCR) licence ROCR/OR/2160/FT6/001MAND.
