Learning Aim Reference Application (LARA) Table and Field Definitions for 2012/13 (Published Version 2)

Table Of Contents

Introduction

This document is intended for use by software suppliers and providers that write their own software. It gives notification of the full set of tables and fields that will be available in the LARA download data for 2012/13. The download will be available in the same formats as at present.

Data for the academic years 2009/2010 and 2010/2011 will still be available via the current LAD download functionality and there will be no changes made to the LAD data structures.

This document has been constructed to define what information will be available via a LARA download for the academic year 2012/2013. The document will identify, where appropriate, the following:
- Tables that are new compared with the existing LARA 2011/12 download.
- Tables that were contained on the LARA 2011/12 download and have been retained within the proposed LARA 2012/13 download. Please note that some of these tables may have had fields added to them while others may have had fields removed.
- Tables that will not exist within the LARA 2012/13 download compared to the LARA 2011/12 download.

In the production of the document the following rules have been applied:

- Fields that have been removed from a table have had their description replaced with the text – "FIELD DELETED IN LARA 2012/13". In addition these fields will be marked as deleted (D) in the 'Action' column.
- Fields that have been added will be marked as added (A) in the 'Action' column
- Fields that have been re-named will be shown within the appropriate table with the original field marked as deleted (D) and with the renamed field shown as a new field and marked (A).
- Tables that have been removed will not be shown in the document other than in a reference list.
- Tables that have been renamed will be shown in the NEW TABLES section of the document. A reference will be shown in the document indicating what they have replaced.
- A number of fields appear on EVERY TABLE in the download, except for FUND_PGWT_PERIODS and FUND_PGWT_FWK_PERIODS, and have been removed from the table definitions. These fields are:

Field Name	Data Type	Description
Created On	Date/Time	The date and time the record was created.
Created By	Text (255)	The user (or process) which created the record.
Modified On	Date/Time	The date and time the record was last updated.
Modified By	Text (255)	The user (or process) which last updated the record.

SUMMARY OF CHANGES BETWEEN LARA 2011/12 AND LARA 2012/13

This document describes the LARA downloads in a number of sections as follows:

New Tables

No new tables have been included in the LARA 2012/13 download compared with the 2011/12 version.

Existing 1112 Tables To Be Retained Within 1213

All existing tables within the 2011/12 LARA download have been retained within the 2012/13 version.
However, some of these tables have had fields removed or added and the actual changes are identified within the body of the document.

The following tables have had fields added:
- AWARDING_ORGANISATIONS
- FRAMEWORK_AIMS
- FRAMEWORK_ANNUAL_VALUES
- FRAMEWORK_CMN_COMPONENTS
- FRAMEWORK_FUNDING_DETAILS
- FRAMEWORK_FUNDING_VALUES
- FRAMEWORKS
- FUND_PWGT_FWK_PERIODS
- SUPERSEDING_FRAMEWORKS

New Funding Models Within Existing Tables

When a new model is included within the system, for example to support "Dual Running" of the Skills Funding Agency calculations, the following process is carried out:

- A new entry for the model is included within the "FUND_MODEL_ILR_SUBSETS" table.
- Any of the tables within the download that contain the field "FUND_MODEL_ILR_SUBSET_CODE" may contain records for Learning Aims or Frameworks with the new model assigned.

Please note that this process can be carried out at any time during the academic year.
The model planned to support Dual Running will be implemented before the start of the new academic year so the current 1112 downloads will contain this new model.

Download Production For 12/13

For 12/13 the system will produce two different structured downloads and they will be produced in the three standard formats as at present.

NOTIONAL_LEVELS_V2

This table defines levels of learning aims, using the system of levels which QCA started using in 2004 in their National Qualifications Framework (NQF). and later in their Qualifications and Credit Frameworks (QCF). This system includes Entry Level and Levels 1-8, with 'H-Higher' representing levels 4 and above.

This system is used by Ofqual for most qualifications, except for some NVQ qualifications and Occupational Qualifications in the NQF.

For example a Level 5 NVQ is a different level to a Level 5 Diploma in the QCF.

The Level 5 NVQ would have Level 5 in the Notional_NVQ_Level_Code field and Level H in this field (because NVQs have not had levels defined in the new system).

The Level 5 NVQ Diploma (QCF) would be Level 4 in the Notional_NVQ_Level_Code field, and Level 5 in this field.

For example a Level 5 NVQ is a different level to a Level 5 Diploma in the QCF.

The Level 5 NVQ would have Level 5 in this field and Level H in the Notional_Level_V2_Code field (because NVQs have not had levels defined in the new system).

The Level 5 NVQ Diploma (QCF) would be Level 4 in this field, and Level 5 in the Notional_Level_V2_Code field.
