Introduction

This Report

This statistical release presents data on the Broadband Delivery UK (BDUK) rural programme. More specifically, it derives the *number of premises covered per £million of broadband delivery programme expenditure* up to December 2013. The headline statistic will be used as an input indicator¹ to measure the performance of the Department for Culture Media and Sport (DCMS).

Input indicators show what is being 'bought' with public money, i.e. the resources being invested into delivering the results that DCMS and partners are aiming to achieve.

This release provides numbers for relevant BDUK expenditure and for premises where superfast broadband services are being made available as a result of BDUK support.

Broadband Delivery UK

BDUK² aims to stimulate commercial investment to roll out high-speed broadband in rural communities. BDUK is responsible for managing the rural programme, while local authorities and devolved administrations are responsible for individual projects.

Broadband Performance Indicator

Key Findings

- 273,731 premises had superfast broadband service made available by the end of December 2013 as a result of BDUK-supported projects;
- BDUK grants to local authorities and budget transfers to devolved administrations amounted to a cumulative £14,182,547 up to the end of December 2013;
- This equates to **19,301 premises covered per £million of broadband delivery programme expenditure up to the end of December 2013.**

The numbers of premises reported here are those in intervention areas which have Next Generation Access made available at superfast speeds (above 24 Mbit/s download) as a result of BDUK-supported projects. This excludes premises which have superfast broadband available from other existing or planned sources. The data combines administrative information reported by local projects and supplier information. Adjustments are made when data are reported to BDUK on a different basis, e.g. at different download speeds.

These premises numbers therefore exclude premises which benefit from the BDUK-supported projects if their resulting speeds are below 24 Mbit/s, even if these benefits help meet BDUK's Universal Service Commitment to raise broadband speeds above 2 Mbit/s in project areas not achieving superfast speeds. They also exclude overspill effects of BDUK-supported projects on premises which already have superfast broadband available.

The expenditure figures reported here represent internal BDUK administrative information on grants to local authorities in England and budget transfers to devolved administrations related to the rural programme. Total public expenditure on the projects is higher as local authorities and devolved administrations add their own contributions and those from other sources such as the European Regional Development Fund. The total cost of projects will be higher than public expenditure on them with the difference met by supplier investment and revenue from customers.

These expenditure figures exclude BDUK support for Super-Connected Cities, the Mobile Infrastructure Project, the Rural Communities Broadband Fund, and DCMS administrative expenditure.

The timing of BDUK expenditure is only indirectly related to the timing of the availability of superfast broadband services, so the input indicator may be volatile initially. To reduce volatility later, all data reported here are cumulative from the start of the programme.

Forthcoming Releases

The intention is to publish data up the end of March 2014 in May. An exact date will be pre-released on the National Statistics Publication Hub.

Quarterly cumulative data

Table 1: Quarterly cumulative broadband data

Cumulative to end of:	Premises with superfast broadband service made available	BDUK funding (£)	Number of premises covered per £million of broadband delivery programme expenditure
December 2012	254	£ 434,735	584
March 2013	16,638	£ 6,767,185	2,459
June 2013	38,343	£ 6,767,185	5,666
September 2013	111,968	£ 10,347,568	10,821
December 2013	273,731	£ 14,182,547	19,301

Annex A: Background Note

1. Broadband Delivery UK is an Official Statistic and as such has been produced to the high professional standards set out in the Code of Practice for Official Statistics. Official Statistics undergo regular quality assurance reviews to ensure they meet customer needs and are produced free from any political interference. For more information, see <http://www.statisticsauthority.gov.uk/assessment/code-of-practice/code-of-practice-for-official-statistics.pdf>
2. This report has been produced by Henry Bottomley. Acknowledgement goes to colleagues within DCMS and BDUK partners.
3. The responsible statistician for this release is Henry Bottomley. For enquiries on this release, please contact Henry Bottomley on 020 7211 6366.
4. Next Release: the next release, scheduled for spring 2014, will present estimates up to the end of March 2014.
5. For general enquiries telephone: 020 7211 6200
