

What is happening post Market Sounding?

- DVLA has been collating the wealth of information that has been gathered during the recent market sounding activities
- We are developing next steps for continued engagement with the market through the pre-procurement phase using the inputs from market sounding
- The future supplier engagement approach will be shared with the market once it has been approved. Due to the fluid nature of the future procurement this may be a staged communication as definition of the TDP and the Tower model progresses

Closing the 'Engagement Window'

- DVLA would like to thank the market for the many offers to continue discussions that have been made post market sounding
- The Agency focus is now on the definition of the TDP role. As a result the 'request to meet' option i.e. the post market sounding engagement window will be closed with effect from 15/05/12
- Requests received prior to 15/05/12 will be evaluated as previously noted and actioned accordingly
- The engagement window will be re-opened at appropriate stages as the contract let progresses

Technology Delivery Partner

- Work is continuing on the definition of the TDP role ready to initiate a future procurement action
- Should you feel that there is specific information you can provide that would support the definition of the TDP role you are still able to contact the Programme through the contract let mailbox address noted below
- DVLA intends to hold one or more events in advance of the TDP procurement to inform the market of the scope of the TDP role
