Submission of the United Kingdom's New Entrants and Closures list and New Entrants and Closures table

Dear :

Please find attached the final New Entrants and Closures list and New Entrants and Closure table for the United Kingdom, with respect to installations covered by the EU Emissions Trading System.

The attached files have been prepared by regulators in each of the United Kingdom's Devolved Administrations, with regard to installations within their respective territories. They have been prepared in accordance with relevant legislation and recent guidance provided by your services.

My authorities have also recently submitted the United Kingdom's final National Implementation Measures and National Allocation Table (NAT), which I trust has been received. Subject to your acceptance of the attached files, my authorities intend to submit NAT changes with respect to partial cessations and capacity reductions shortly.

If any further information is required,
will be able to pass instructions to the appropriate regulator.

Yours sincerely,
