Dear

Submission of final National Implementation Measures and National Allocation Table for the United Kingdom

Please find attached the final National Implementation Measures (NIMs) and National Allocation Table (NAT) for the United Kingdom.

These follow the adoption of the Commission Decision of 5 September 2013 concerning national implementation measures for the transitional free allocation of greenhouse gas emission allowances (2013/448/EU). The UK's National Implementation Measures have been updated following this Decision in line with information provided by the Commission, and taking into account the application of a cross-sectoral correction factor and changes to carbon leakage status.

We have also provided a list of installations which had ceased operations prior to 2013, and have therefore been removed from the NIMs. The majority of those listed were not eligible for free allocation prior to their closure; those installations which were eligible for free allocation have only recently been identified and confirmed as having closed.

We intend to submit the United Kingdom's New Entrants and Closures List and Table in the coming weeks, and look forward to working with the Commission over the remainder of this process.

Yours faithfully,
