Equality Impact Assessment - Initial Screening

Part one

The initial screening of a policy/service or function should be carried out to ascertain the impact of the policy/service or function on the protected characteristics groups;

Age, disability, gender, gender reassignment, race, religion or belief and sexual orientation, pregnancy and maternity.

This is based on existing knowledge, data and research and will lead to a decision about whether a full equality impact assessment will be necessary.

An equality impact assessment must be carried out <u>before</u> a decision is made to implement a policy/service or function.

Our service delivery equality objective for 2012-16 is <u>"to maintain a high level of accessibility to all testing services for those groups with protected characteristics</u>" use this as a basis for answering all questions.

Further guidance on the completion of this screening form can be found here: (hyperlink): A quick guide to Equality Impact Assessments.

There is a different template to be used in cases of staff issues this can be found here: (hyperlink)

Name of policy, service or function	Revised ADI Standards Checks – Assessment and Form
Current or Proposed	Proposed
Branch/Person completing Initial screening	Jacqui Turland, Laura Scanlon, Lynne
	Fitzharris, Barry Twilley, Huw Davies

Please provide a brief description of the

- Policy, Service or Function which is being assessed
- · its aim: and

who will benefit or be affected.

Approved Driving Instructors (ADIs) are required to have a periodic re-assessment (a standards check) of their instructional ability in order to retain their licence to instruct and remain on the DSA ADI register.

DSA intends to revise the standards check assessment (known internally as the check test) with examiners using a newly formatted form. The current form can be found in Annex B, with the draft proposed form in Annex C. The revised assessment will better align to DSA's published standards. Plain English and special education needs (SEN), such as font size and colourings, will be taken into account when revising the form. It will also make it clearer to both the ADI and the examiner what is to be assessed and which competencies to observe. This moves from the current fault-based recording to a wider assessment that will provide more comprehensive feedback on the ADI's strengths and areas for

development.

The proposed changes to the assessment do not represent an extra burden to the existing 46,000 ADIs on the Register as they will still require a standards check test and it will take the same time (approx 1 hour) as the current one.

The form has received positive feedback from ADI associations and no matters have been raised in relation to equality.

Initially DSA expect there to be a slight dip in satisfactory standards checks while ADIs gain a better understanding of the new process and familiarise themselves with our published standards requirements. The project will ensure effective communications ahead of introduction to get across the new assessment criteria to minimise this impact.

There are currently 85 standards check ADI examiners who will need to be retrained to carry out the revised standards check and to use the new assessment form. Their supervisors will also need training. We do not hold any information on the protected characteristics, or otherwise, of these examiners.

Examiners will receive 4 days of comprehensive training. This will take place at Cardington over a three month period. There will be the possibility of mop up sessions if required.

When completing the next section please consider the following questions:

- Is there any indication or evidence that different groups have different needs, experiences, issues or priorities, or that any part of the proposed policy/service or function could discriminate, directly or indirectly?
- Is there potential for, or evidence that, this policy/service or function may adversely affect equality of opportunity for all and may harm good relations between different groups?
- Is there an opportunity to better promote equality of opportunity or better community relations by altering the policy/service or function or working with other government departments or the wider community?
- Do people have the same levels of access?

This initial screening form when completed should be placed in the national folder, Equality Impact Assessments. Staff Network Groups(@ADA; @WAG; @Equilibrium; @RACE;), Trade Union Side (TUS) and the Engagement and Equality team and any other relevant stakeholders should be invited to comment and given two weeks to do so. Please detail the comments and actions taken in Annex A – consultation record.

For help completing this section refer to (insert Hyperlink) for a list of useful publications/organisations and internal data that can be used in conducting an assessment. This list is <u>not</u> exhaustive. Use DSA management information (DSAMI) where available to map across national external data.

On the basis of the evidence available and considering the questions above, what level of impact if any is the delivery of this policy/service or function going to have on the different equality groups set out below. **Protected** Say if impact is low, medium, Reason and data/research used* Characteristic high, no impact, positive or negative impact No Positive Negative M | H | L | M | H **Impact** ADIs Age DSAs examiners are trained to deliver all assessments in a consistent manner without prejudice to this characteristic. We cannot identify any reason why ADIs with this characteristic would be less able to understand the feedback provided by the new form which is intended to make clearer those areas which would benefit from development. Profile of ADI population available in Annex D for this characteristic. **ADI Examiners** Current systems do not allow DSA to analyse examiners with this characteristic in relation to those standards checks conducted. We cannot identify any reasons why this characteristic would affect examiners' ability to conduct the assessment in a consistent manner. ADI **Disability** Plain English and special education needs (SEN), such as font size and colourings, will be taken into account when revising the form. It will also make it clearer to the ADI as it shows what is to be assessed and which competencies to observe. This moves from the current faultbased recording to a wider assessment that will provide more comprehensive feedback on the

	 		
			ADI's strengths and areas for development.
			ADI Examiners We cannot see any impact to examiners with disabilities in training for the revised Standards Check test at DSAs Training Centre, since it is fully DDA compliant.
			See comments under age characteristic.
			We do not hold any statistics on this characteristic.
Gender			ADI Profile of ADI population available in Annex E for this characteristic.
			ADI Examiners There may be a low negative impact to single parents and care givers, who are more often females, when having to attend DSA's Training Centre for a week's training. See comments under age characteristic.
Gender reassignment		√	See comments under age characteristic. We do not hold any statistics on
Race			this characteristic. ADIS A copy of the form will be available in Welsh to ensure those for whom Welsh is their first language can clearly understand the feedback. Profile of ADI population available in Annex F for this characteristic. ADI Examiners Training will be delivered in the same way as the initial training at DSA's Training Centre in

				Cardington and we are not aware of any issues arising from this.
				See comments under age characteristic.
Religion or belief			√	ADI Examiners There are prayer facilities at DSA's Training Centre for ADI Examiners receiving training on the revised assessment and form.
				See comments under age characteristic. We do not hold any statistics on
				this characteristic.
Sexual orientation			√	See comments under age characteristic.
				We do not hold any statistics on this characteristic.
Pregnancy and Maternity			√	ADIs The new standards check and form would not change the way that we arrange appointments, including for ADIs on maternity or paternity leave.
				ADI Examiners There will be a mop up training session for any ADI examiners who are unable to attend for whatever reason, including maternity or paternity leave. See comments under age characteristic.
				We do not hold any statistics on this characteristic.

*Please attach evidence used if appropriate.

Low = little affect (and broadly the same) on all protected characteristics

Medium = moderate impact on one or more protected characteristics

High = major/significant impact on one or more or all protected characteristics

What are your arrangements for monitoring the policy and its impact on end users?

After implementation we would carry out analysis to monitor whether the revised assessment and form have any effect on pass rates and general movement between grades i.e. increase percentage in higher / lower grades. We only collect ADI data for gender, age, ethnic origin and would not be able to carry out any further analysis using this data.

If there is a negative impact, rated as medium or high, complete a Full EIA (part two of this template)

DSA – Full Equality Impact Assessment

Part two

The full equality impact assessment should be carried out when the initial screening indicates there to be a potential medium or high negative impact to one or more of the protected characteristics groups in relation to the proposed function/policy or service.

This assessment should look to fill in any gaps in data and research that you have identified. Consideration should be given to what mitigation can be carried out to minimise the adverse impact on the protected characteristic groups.

This full equality impact assessment should be used in conjunction with the findings from the initial screening so that rework is avoided.

Further assessment
What alternative measures or policies were considered and what action has been taken?
What mitigating actions or adaptations to the policy/function or service have been considered?
Who have you further consulted with and what further evidence do you have since the initial screening took place.

Final decision – What is the final decision in light of the evidence above? (Do you need to timetable reviews or action plans to monitor impacts on Equality? See Annex B)		
How is policy/function or service to be implemented and by when.
